A note about copyright

Dear Customer

What does the little © mean and why does it matter?

Your market-leading BPP books, course materials and e-learning materials do not write and update themselves. People write them: on their own behalf or as employees of an organisation that invests in this activity. Copyright law protects their livelihoods. It does so by creating rights over the use of the content.

Breach of copyright is a form of theft – as well being a criminal offence in some jurisdictions. It is potentially a serious breach of professional ethics.

With current technology, things might seem a bit hazy but, basically, without the express permission of BPP Learning Media:

- Photocopying our materials is a breach of copyright
- Scanning, ripcasting or conversion of our digital materials into different file formats, uploading them to Facebook or emailing them to your friends is a breach of copyright

You can, of course, sell your books, in the form in which you have bought them – once you have finished with them. (Is this fair to your fellow students? We update for a reason.) Please note the e-products are sold on a single user licence basis: we do not supply 'unlock' codes to people who have bought them secondhand.

And what about outside the UK? BPP Learning Media strives to make our materials available at prices students can afford by local printing arrangements, pricing policies and partnerships which are clearly listed on our website. A tiny minority ignore this and indulge in criminal activity by illegally photocopying our material or supporting organisations that do. If they act illegally and unethically in one area, can you really trust them?

Helping you with your revision

BPP Learning Media – ACCA Approved Content Provider

As an ACCA Approved Content Provider, BPP Learning Media gives you the opportunity to use revision materials reviewed by the ACCA examining team. By incorporating the ACCA examining team's comments and suggestions regarding the depth and breadth of syllabus coverage, the BPP Learning Media Practice & Revision Kit provides excellent, ACCA-approved support for your revision.

These materials are reviewed by the ACCA examining team. The objective of the review is to ensure that the material properly covers the syllabus and study guide outcomes, used by the examining team in setting the exams, in the appropriate breadth and depth. The review does not ensure that every eventuality, combination or application of examinable topics is addressed by the ACCA Approved Content. Nor does the review comprise a detailed technical check of the content as the Approved Content Provider has its own quality assurance processes in place in this respect.

BPP Learning Media do everything possible to ensure the material is accurate and up to date when sending to print. In the event that any errors are found after the print date, they are uploaded to the following website: www bpp.com/learningmedia/Errata.

Selecting questions

We provide signposts to help you plan your revision.

- A full question index

Attempting mock exams

There are three mock exams that provide practice at coping with the pressures of the exam day. We strongly recommend that you attempt them under exam conditions. **Mock exam 1** is the Specimen Exam. **Mock exams 2 and 3** reflect the question styles and syllabus coverage of the exam.

Using your BPP Practice & Revision Kit

Aim of this Practice & Revision Kit

To provide the practice to help you succeed in the examination for FBT/BT Business and Technology.

To pass the examination you need a thorough understanding in all areas covered by the syllabus and teaching guide.

Recommended approach

- Make sure you are able to answer questions on everything specified by the syllabus and teaching guide. You cannot make any assumptions about what questions may come up in your exam. The examining team aims to discourage 'question spotting'.
- Learning is an active process. Use the DO YOU KNOW? Checklists to test your knowledge and understanding of the topics covered in FBT/BT Business and Technology by filling in the blank spaces. Then check your answers against the DID YOU KNOW? Checklists. Do not attempt any questions if you are unable to fill in any of the blanks – go back to your BPP Interactive Text and revise first.
- When you are revising a topic, think about the mistakes that you know that you should avoid by writing down POSSIBLE PITFALLS at the end of each DO YOU KNOW? Checklist.
- Once you have completed the checklists successfully, you should attempt the questions on that topic. Each question is worth 1, 2 or 4 marks and carries with it a time allocation of 1.2 minutes per mark.
- You should attempt each bank of objective test questions (OTQs) and multi-task questions (MTQs) to ensure that you are familiar with their styles and to practise your technique. Ensure that you read Tackling Objective test and multi-task questions on page xii to get advice on how best to approach them.
- Once you have completed all of the questions in the body of this Practice & Revision Kit, you should attempt the MOCK EXAMS under examination conditions. Check your answers against our answers to find out how well you did.

Passing the FBT/BT exam

FBT/BT Business and Technology introduces students (who may not have a business background) to the business entity made up of people and systems which interact with each other. There is a lot to learn, but none of it is particularly difficult and a good grasp of these topics will help you in higher-level business exams.

To access FIA and ACCA syllabuses, visit the ACCA website.

www.accaglobal.com/students/fia

The exam

All questions in the exam are compulsory. This means you cannot avoid any topic, but also means that you do not need to waste time in the exam deciding which questions to attempt. There are 46 objective test questions in Section A of the exam, worth either 1 or 2 marks. In Section B of the exam there are 6 multiple task questions (one drawn from each of the six main areas of the syllabus) worth 4 marks each and are a mixture of multiple choice questions and other types of objective test (number entry, multiple response and multiple response matching) in the CBE. This means that the examining team is able to test most of the syllabus at each sitting. So you need to have revised right across the syllabus for this exam.

Topics to revise

For this exam it is important to revise the whole syllabus thoroughly. Questions can be drawn from any syllabus area.

Revision

This Practice & Revision Kit has been reviewed by the ACCA's examining team and contains questions from the Specimen Exam as mock exam 1, so if you just worked through it to the end you would be very well prepared for the exam. It is important to tackle questions under exam conditions. Allow yourself just the number of minutes shown next to the questions in the index and don't look at the answers until you have finished. Then correct your answer and go back to the Interactive Text for any topic you are really having trouble with. Try the same question again a week later – you will be surprised how much better you are getting. Doing the questions like this will really show you what you know, and will make the exam experience less worrying.

Passing the exam

The following points will help you pass the exam.

- Read the question carefully.
- Don't spend more than the allotted time on each question. Don't become bogged down. If you are having trouble with a question, stop, think, decide on your best option and answer the question. Move on!

Approach to examining the syllabus

FBT/BT is a two-hour exam structured as follows:

	No of marks
Section A:	
30 compulsory objective test questions of 2 marks each	60
16 compulsory objective questions of 1 mark each	16
Section B:	
6 compulsory multiple task questions of 4 marks each	<u>24</u>
	<u>100</u>

Note. The difference between the 2 mark and 1 mark objective test questions is that the 1 mark questions will be easier - for example, multiple choice questions will have only three possible choices instead of four.

The computer-based examination

Computer-based examinations (CBEs) are used for all of the Foundations In Accountancy exams. The CBE exams for the first seven modules including FBT can be taken at any time, these are referred to as 'exams on demand'. The Option exams can be sat in June and December of each year, these are referred to as 'exams on sitting'.

Computer-based examinations must be taken at an ACCA CBE Licensed Centre.

How do CBEs work?

- Questions are displayed on a monitor
- Candidates enter their answer directly onto the computer
- Candidates have two hours to complete the examination
- Candidates sitting exams on demand are provided with a Provisional Result Notification showing their results before leaving the examination room.
- The CBE Licensed Centre uploads the results to the ACCA (as proof of the candidate's performance) within 72 hours.
- Candidates sitting the Option exams will receive their results approximately five weeks after the exam sitting once they have been expert marked
- Candidates can check their exam status on the ACCA website by logging into myACCA

Benefits

- Flexibility – the first seven modules, exams on demand, can be sat at any time
- Results for the first seven modules can also be taken at any time and there is no restriction on the number of times a candidate can sit a CBE
- Instant feedback for the exams on demand as the computer displays the results at the end of the CBE

For more information on computer-based exams, visit the ACCA website.

www.accaglobal.com/gb/en/student/exam-entry-and-administration/computer-based-exams.html

Tackling objective test and multi-task questions

Knowledge Content

The exam contains two sections. Section A consists of 16 objective test (OT) questions worth one mark each and 30 objective test (OT) questions worth two marks each. Section B contains six multi-task questions worth four marks each. The multi-task questions are made up of OT questions and therefore being able to answer OT questions effectively, is extremely important.

OT questions

OT questions in Section A are single, short questions that are auto-marked and worth one or two marks each. You must answer the whole question correctly to earn the marks. There are no partial marks.

The OT questions in Section A aim for a broad coverage of the syllabus, and so all areas of the syllabus need to be carefully studied. You need to work through as many practice objective test questions as possible, reviewing carefully to see how correct answers are derived.

The following types of OT questions commonly appear in Section A of the BT/FBT exam:

Question type	Explanation
Multiple choice (MCQ)	You need to choose one correct answer from two or three options in the case of 1 mark questions, or one correct answer from four options in the case of 2 mark questions. Eg Q1 of the specimen exam
Multiple response (MR)	These are a type of multiple-choice question where you need to select more than one answer from a number of given options. The question will specify how many answers need to be selected. It is important to read the requirement carefully. Eg Q8 of the specimen exam
Multiple response matching (MRM)	This question type requires you identify which of two or more categories each item in a list belongs to. For example, a question might provide a list of controls, and ask you to identify for each control whether it is a general control or an application control.

Section B questions will include six multi-task questions. These will also use OT questions, but a wider range of question types will be used in the Section B questions. You may see some or all of the following types of question in your exam:

- **Multiple response questions** with more than four options - for example, choose two items from six or four from eight.
- **Gap fill questions** - where you need to complete a paragraph by filling gaps that appear in the text. Responses are selected by clicking on the gap and selecting the correct response from a drop down menu.
- **Multi response matching** - where candidates select responses according to a grid of choices. Task 1 of the skills activity below is an example of multi response matching.
- **Hotspot questions** - where you have to click on the relevant part of a symbol or diagram. For example, there may be a number of boxes where you are required to select the boxes that apply.
- **Number entry question** - where you will need to calculate a value and enter it into a box. Such questions will not be common in BT/FBT as much of the syllabus covers qualitative topics rather than quantitative.

In Section B questions, there will be partial marking. In a multiple response question for example, which requires you to select two items from six, for two marks, you would get one mark if only one of your answers was correct.

You may wish to follow the approach outlined below for Section A of the exam, or you may prefer to adapt it.

Step 1	Skim read all the MCQs and identify what appear to be the easier questions.
Step 2	Attempt each question – starting with the easier questions identified in Step 1. Read the question thoroughly. You may prefer to work out the answer before looking at the options, or you may prefer to look at the options at the beginning. Adopt the method that works best for you.
Step 3	Read the options and see if one matches your own answer. Be careful with numerical questions as the distractors are designed to match answers that incorporate common errors. Check that your calculation is correct. Have you followed the requirement exactly? Have you included every stage of the calculation?
Step 4	You may find that none of the options match your answer. <ul style="list-style-type: none"> • Re-read the question to ensure that you understand it and are answering the requirement • Eliminate any obviously wrong answers • Consider which of the remaining answers is the most likely to be correct and select the option
Step 5	If you are still unsure make a note and continue to the next question
Step 6	Revisit unanswered questions. When you come back to a question after a break you often find you are able to answer it correctly straight away. If you are still unsure have a guess. You are not penalised for incorrect answers, so never leave a question unanswered!

After extensive practice and revision of MCQs, you may find that you recognise a question when you sit the exam. **Be aware that the detail and/or requirement may be different.** If the question seems familiar read the requirement and options carefully – do not assume that it is identical.

The recommended approach to the multi-task questions in Section B is as follows:

- (1) Read the requirement of each task. There is usually a scenario associated with each MTQ which runs to around 300 words. It can feel daunting. It is important therefore to know what you are looking for when you read the scenario and this means reading the requirement of the task first, before you read the scenario.
- (2) Ensure you understand the requirements of the task. It is easy to misinterpret the requirements of a question. For example, giving the highest value when the lowest is asked for. Also the order of the information given in the scenario may be different to the order of the information given in the part of the question where you give your answer.
- (3) After reading the task, think about the technical knowledge you will need to answer the question. When you do read the scenario, you will be much more focussed on what you need to look for in the scenario.
- (4) Manage your time. You should be guided by the mark allocation in MTQs as the sub questions can have different requirements, there is no set format for these questions so you need to react to what is presented, however the rule of 1.2 minutes per mark still applies. You may have completed section A of the exam in less time, which is good news for Section B as the scenarios can be quite time consuming to read and digest. The questions in

Section B with shorter scenarios are usually quicker to attempt and may give you more time for the calculations. You do not have to answer the sub questions in order, you should play to your exam strengths, which means attempting the questions you are most confident about first.

Questions

Do you know? – The business organisation, its stakeholders and the external environment

Check that you can fill in the blanks in the statements below before you attempt any questions. If in doubt, you should go back to your BPP Interactive Text and revise first.

- Organisations can achieve results which **i.....** cannot achieve by themselves.
- A organisation (NGO) is an independent voluntary association of people acting together for some common purpose (other than achieving government office or making money).
- Stakeholders are those individuals or groups that, potentially, have an **interest** in what the organisation does. These stakeholders can be **w.....** the organisation, **c.....** to the organisation or external to the organisation.
- **G..... p.....** influences the economic environment, the framework of laws, industry structure and certain operational issues. Political **i.....** is a cause of risk.
- **P.....** is the right of the individual not to suffer unauthorised disclosure of information.
- A contract is a **l..... b.....** agreement.
- **O.....** is the contracting out of specified operations or services to an external vendor.
- The **v.... c.....** describes those activities of the organisation that add value to purchased inputs.
- The **c..... e.....** is structured by five forces: barriers to entry; substitute products; the bargaining power of **c.....**; the bargaining power of **suppliers**; **c.....** rivalry.
- Equilibrium **n..... i.....** is determined using aggregate supply and aggregate demand analysis.
- Demand pull **i.....** arises from an excess of aggregate demand over the productive capacity of the economy.
- **C.... p.... inflation** arises from increases in the costs of production.
- Economic may be measured by increases in the **real** gross national product (GNP) per head of the population.
- **Macroeconomic policy objectives** relate to economic growth, **i.....**, unemployment and the **b..... of p.....**.
- If a government decides to use fiscal policy to influence demand in the economy, it can choose either **e.....** changes or **t..** changes as its policy instrument.
- **M..... p....** uses money supply, interest rates or credit controls to influence **aggregate demand**.
- A surplus or deficit on the balance of payments usually means a **surplus or deficit on the c..... a.....**.
- The **m.... e.....** refers to the immediate operational environment including suppliers, competitors, customers, stakeholders and intermediaries.
- Elasticity, in general, refers to the relationship between two variables. Price elasticity of demand explains the relationship between **change in q....demanded and changes in p.....**
- **I..... e.....** of demand measures the responsiveness of demand to changes in household income. **C....elasticity of demand** is determined by the availability of substitute (competitors') products.
- The effects of **demand and supply** conditions on markets can be analysed by studying the behaviour of both demand and supply **c.....**

The solutions to this test are on the next page

Did you know? – The business organisation, its stakeholders and the external environment

Could you fill in the blanks? The answers are in bold. Use this page for revision purposes as you approach the exam.

- Organisations can achieve results which individuals cannot achieve by themselves.
- A non-governmental organisation (NGO) is an independent voluntary association of people acting together for some common purpose (other than achieving government office or making money).
- Stakeholders are those individuals or groups that, potentially, have an **interest** in what the organisation does. These stakeholders can be within the organisation, connected to the organisation or external to the organisation.
- Government policy influences the economic environment, the framework of laws, industry structure and certain operational issues. Political **Instability** is a cause of risk.
- Privacy is the right of the individual not to suffer unauthorised disclosure of information.
- A contract is a **legally binding** agreement.
- Outsourcing is the contracting out of specified operations or services to an external vendor.
- The value chain describes those activities of the organisation that add value to purchased inputs.
- The competitive environment is structured by five forces: barriers to entry; substitute products; the bargaining power of customers; the bargaining power of suppliers; competitive rivalry.
- Equilibrium national income is determined using aggregate supply and aggregate demand analysis.
- Demand pull inflation arises from an excess of aggregate demand over the productive capacity of the economy.
- Cost push inflation arises from increases in the costs of production.
- Economic growth may be measured by increases in the real gross national product (GNP) per head of the population.
- Macroeconomic policy objectives relate to economic growth, inflation, unemployment and the balance of payments.
- If a government decides to use fiscal policy to influence demand in the economy, it can choose either expenditure changes or tax changes as its policy instrument.
- Monetary policy uses money supply, interest rates or credit controls to influence aggregate demand.
- A surplus or deficit on the balance of payments usually means a **surplus or deficit on the current account**.
- The micro environment refers to the immediate operational environment including suppliers, competitors, customers, stakeholders and intermediaries.
- Elasticity, in general, refers to the relationship between two variables. Price elasticity of demand explains the relationship between **change in quantity demanded and changes in price**.
- Income elasticity of demand measures the responsiveness of demand to changes in household income. Cross elasticity of demand is determined by the availability of substitute (competitors') products.
- The effects of demand and supply conditions on markets can be analysed by studying the behaviour of both demand and supply **curves**.

1 Business organisations and their stakeholders

16 mins

- 1.1 'An organisation is a social arrangement which pursues collective....., which controls its own performance and which has a boundary separating it from its environment.'

Which of the following words completes this sentence appropriately?

Picklist:

- Profits
- Stakeholders
- Goals
- Tactics

(2 marks)

-
- 1.2 What is the term given to the idea that the combined output of a number of individuals working together will exceed that of the same individuals working separately?

- Sympathy
- Specialisation
- Synergy
- Systems thinking

(2 marks)

-
- 1.3 Which of the following statements is true?

- Limited company status means that a company is only allowed to trade up to a predetermined turnover level in any one year.
- For organisations that have limited company status, ownership and control are legally separate.
- The benefit of being a sole trader is that you have no personal liability for the debts of your business.
- Ordinary partnerships offer the same benefits as limited companies but are usually formed by professionals such as doctors and solicitors.

(2 marks)

-
- 1.4 An organisation is owned and run by central government agencies. The organisation should be described as which of the following statements?

- A voluntary sector organisation
- A private sector organisation
- A public sector organisation

(1 mark)

1.5 Which of the following groups may be considered to be stakeholders in the activities of a nuclear power station?

- (1) The government
 - (2) Environmental pressure groups
 - (3) Employees
 - (4) Local residents
- (1), (3) and (4)
 - (1), (2), (3) and (4)
 - (3) only
 - (1) and (3) only

(2 marks)

1.6 The term secondary stakeholders describes which group of stakeholders?

- Stakeholders who conduct transactions with the organisation
- Stakeholders who have a contractual relationship with the organisation
- Stakeholders who do not have a contractual relationship with the organisation

(1 mark)

1.7 Which of the following organisations would rely most heavily on value for money indicators and efficiency rather than information on performance and profitability?

- A private accountancy college
- A local authority
- A small retailer

(1 mark)

1.8 ADB is a business which is owned by its workers. The workers share the profits and they each have a vote on how the business is run.

Which of the following should be used to describe ADB?

- Public sector
- Private sector
- Not-for-profit
- Co-operative

(2 marks)

(Total = 13 marks)

2 The business environment

36 mins

- 2.1 What is an acronym used to describe the key elements of an organisation's external environment?
- SWOT
 - SMART
 - PEST
- (1 mark)
-
- 2.2 Which of the following is NOT a legitimate method of influencing government policy in the interests of a business?
- Employing lobbyists to put the organisation's case to ministers or civil servants
 - Giving lawmakers non-executive directorships
 - Offering financial incentives to public officials to use their influence on the organisation's behalf
 - Attempting to influence public opinion, to put pressure on the legislative agenda
- (2 marks)
-
- 2.3 is an analysis of statistics on birth and death rates, age structures of people and ethnic groups within a community.
- Which word correctly completes the sentence?
-
-
- Picklist:**
- Ergonomics
 - Economics
 - Psychographics
 - Demographics
- (2 marks)
-
- 2.4 A recent trend in organisation and management is the rise in 'virtual organisation' and 'virtual teamworking'. To which of the following environmental (PEST) factors is this most directly attributed?
- Economic
 - Socio-cultural
 - Technological
 - Political
- (2 marks)
-
- 2.5 Which of the following rights of data subjects is also known as the right 'to be forgotten'?
- Rectification
 - Portability
 - Erasure
- (1 mark)
-

- 2.6 In the context of 'best practice' employment protection law, in which of the following circumstances is dismissal of an employee automatically considered unfair?
- Selection for redundancy on the basis of age
 - Misconduct
 - Marriage to an employee of a key competitor
 - Incompetence
- (2 marks)
-
- 2.7 Which of the following socio-cultural trends will have a direct impact on most business organisations?
- (1) Increasing ethnic and religious diversity in populations
 - (2) Falling birthrates
 - (3) Focus on 'green' issues
 - (4) Increase in single-member households
- (3) only
 - (1) and (3) only
 - (1), (2) and (3) only
 - (1), (2), (3) and (4)
- (2 marks)
-
- 2.8 Porter's five forces model identifies factors which determine the nature and strength of competition in an industry. Which of the following is NOT one of the five forces identified in Porter's model?
- Substitute products or services
 - New entrants to the industry
 - Bargaining power of customers
 - Government regulation of the industry
- (2 marks)
-
- 2.9 For what function in an organisation would demographic information about social class be most relevant?
- Human Resources
 - Marketing
 - Purchasing
- (1 mark)
-
- 2.10 Which of the following is a support activity in Porter's value chain model?
- Procurement
 - Operations
 - Marketing and sales
 - Inbound logistics
- (2 marks)
-

- 2.11 Which of the following statements about the impact of technological developments on the role of accountants is NOT true?
- Automation and artificial intelligence allow the accountant to focus their time on verifying low-level transactions.
 - Distributed ledger technology reduces the need for auditors to audit all transactions.
 - Cloud accounting allows accountants to work collaboratively together and with their clients.
 - Big data and data analytics assist auditors to target key business risks (2 marks)
-

- 2.12 BCD Co is a large trading company. Steve is the administration manager and is also responsible for legal and compliance functions. Sheila is responsible for after sales service and has responsibility for ensuring that customers who have purchased goods from BCD Co are fully satisfied. Sunny deals with suppliers and negotiates on the price and quality of inventory. He is also responsible for identifying the most appropriate suppliers of plant and machinery for the factory. Sam is the information technology manager and is responsible for all information systems within the company.
- According to Porter's value chain, which of the managers is involved in a primary activity as opposed to a support activity?
- Steve
 - Sheila
 - Sunny
 - Sam (2 marks)
-

- 2.13 What is the latest stage at which a new recruit to a company should first be issued with a copy of the company's health and safety policy statement?
- When a position with the company is offered
 - As early as possible after employment
 - After the first few weeks of employment
 - During the final selection interview (2 marks)
-

- 2.14 In Porter's five forces model, which of the following would NOT constitute a 'barrier to entry'?
- Scale economies available to existing competitors
 - High capital investment requirements
 - Low switching costs in the market (1 mark)
-

2.15 Three of the following strategies are closely related. Which is the exception?

- Downsizing
- Delegating
- Delayering
- Outsourcing

(2 marks)

2.16 Which of the following would be identified as a cultural trend?

- Health and safety legislation
- Concern with health and diet
- Increasing age of the population

(1 mark)

2.17 For demographic purposes, which of the following is NOT a variable in the identification of social class?

- Income level
- Lifestyle
- Occupation
- Education

(2 marks)

2.18 Technological developments such as automation and artificial intelligence mean that the role of the accountant and auditor to record and verify day-to-day transactions has become more important.

- True
- False

3 The macro-economic environment

28 mins

3.1 Which of the following is NOT an element of fiscal policy?

- Government spending
- Government borrowing
- Taxation
- Exchange rates

(2 marks)

3.2 Which of the following is associated with a negative Public Sector Net Cash Requirement?

- The government is running a budget deficit.
- The government's expenditure exceeds its income.
- The government is running a budget surplus.
- Public Sector Debt Repayment (PSDR) is high.

(2 marks)

3.3 taxes are collected by the Revenue authority from a business, which attempts to pass on the tax to consumers in the price of goods.

Which word correctly completes this statement?

Picklist:

- Progressive
- Direct
- Indirect

(1 mark)

3.4 If a government has a macro-economic policy objective of expanding the overall level of economic activity, which of the following measures would NOT be consistent with such an objective?

- Increasing public expenditure
- Lowering interest rates
- Increasing taxation

(1 mark)

3.5 The currency in country X is the Krone while country Y uses the Euro. Country Y has recently experienced an increase in its exchange rate with Country X. Which of the following effects would result in Country Y?

- A stimulus to exports in Country Y
- An increase in the costs of imports from Country X
- Reducing demand for imports from Country X
- A reduction in the rate of cost push inflation

(2 marks)

3.6 All of the following except one are 'protectionist measures' in international trade. Which is the exception?

- Import quotas
- Subsidies for exporters
- Customs procedures
- Tariffs

(2 marks)

3.7 Are the following statements true or false?

TRUE	FALSE
------	-------

Frictional unemployment will be short term

Governments can encourage labour mobility if they want to reduce unemployment

(2 marks)

3.8 Which TWO of the following does government economic monetary policy relate to?

- Interest rates
- Taxation
- Public borrowing and spending
- Exchange rates

(2 marks)

3.9 Which of the following organisations would benefit from a period of high price inflation?

- An organisation which has a large number of long-term payables
- An exporter of goods to a country with relatively low inflation
- A large retailer with a high level of inventory on display and low rate of inventory turnover

(1 mark)

3.10 Which THREE of the following are the goals of macroeconomic policy?

- Encouraging economic growth
- Low unemployment
- Achievement of a balance between exports and imports
- Achieving zero inflation
- Maximising a currency's foreign exchange value

(2 marks)

3.11 Which of the following is an example of cyclical unemployment?

- The entry of school leavers into the labour pool each year
- Lay-offs among agricultural labourers in winter
- Automation of ticketing services in tourism
- Recession in the building industry

(2 marks)

- 3.12 A surplus on the balance of payments usually refers to a surplus or deficit on the account.

Which word correctly complete this statement?

Picklist:

Current
Capital
Financial

(1 mark)

- 3.13 Northland, Southland, Eastland and Westland are four countries of Asia. The following economic statistics have been produced for the year 20X7.

Country	Northland	Southland	Eastland	Westland
Change in GDP (%)	-0.30	+2.51	-0.55	+2.12
Balance of payments current account (\$m)	+5550.83	-350.47	-150.90	+220.39
Change in consumer prices (%)	+27.50	+15.37	+2.25	+2.15
Change in working population employed (%)	-4.76	+3.78	+1.76	-8.76

Which country experienced stagflation in the relevant period?

- Northland
- Southland
- Eastland
- Westland

(2 marks)

- 3.14 economic growth is determined by supply-side rather than by demand side factors.

Which word correctly completes this statement?

Picklist:

4 Micro-economic factors

50 mins

4.1 In a free market economy, the price mechanism:

- Aids government control
- Allocates resources
- Measures national wealth

(1 mark)

4.2 The supply curve of a firm operating in a competitive market is its

- Marginal cost curve above the average variable cost curve
- Marginal cost curve above the average total cost curve
- Average total cost curve beyond the point where the marginal cost curve cuts it from below
- Average variable cost curve below the average revenue curve

(2 marks)

4.3 A legal minimum price is set which is below the equilibrium price. What will be the impact of this?

- Excess of demand over supply
- Excess of supply over demand
- Nothing

(1 mark)

4.4 Which of the following would cause the supply curve for a good to shift to the right (outwards from the origin)?

- A fall in the price of the good
- An increase in the demand for the good
- A fall in production costs of the good
- The imposition of a minimum price

(2 marks)

4.5 When the price of a good is held above the equilibrium price, the result will be

- Excess demand
- A shortage of the good
- A surplus of the good

(1 mark)

4.6 Which of the following would NOT lead directly to a shift in the demand curve for overseas holidays?

- An advertising campaign by holiday tour operators
- A fall in the disposable incomes of consumers
- A rise in the price of domestic holidays
- A rise in the price of overseas holidays

(2 marks)

- 4.7 Which of the following would lead to a fall in the price of good Q which is a normal good?
- A rise in the price of good P, a substitute for good Q
 - A fall in the level of household incomes generally
 - A fall in the price of good T, a complement to good Q
 - A belief that the price of good Q is likely to double in the next three months
- (2 marks)
-

- 4.8 According to the theory of the firm, which of the following statements describes an oligopoly?
- There are no barriers to entry into or exit from the market
 - There is only one producer in the market
 - There are four producers exerting considerable influence in the market
 - There are many producers but they each use product differentiation to distinguish themselves from each other
- (2 marks)
-

- 4.9 Which of the following is NOT a substitute for carpets?
- Ceramic floor tiles
 - Wooden floorboard
 - Carpet underlay
- (1 mark)
-

- 4.10 Which of the following is NOT a complement to cars?
- Petrol
 - Tyres
 - Holidays
- (1 mark)
-

- 4.11 The demand for fashion goods is NOT influenced by:
- Price
 - Allocative inefficiency among producers
 - The distribution of income among households
 - Expectation of future price changes
- (2 marks)
-

- 4.12 If the price of coffee falls, which the following outcomes should be expected to occur?
- A fall in the quantity of coffee demanded
 - A rise in the price of tea
 - A fall in the demand for drinking cups
 - A fall in the demand for tea
- (2 marks)
-

4.13 What is an inferior good?

- A good of such poor quality that demand for it is very weak
 - A good for which the cross elasticity of demand with a substitute product is greater than 1
 - A good for which demand will fall as household income rises
- (1 mark)
-

4.14 Consider the price and demand for flower vases. The price of cut flowers goes up sharply. Which of the following should happen?

- The demand curve for flower vases will shift to the left and their price will rise
 - The demand curve for flower vases will shift to the right and their price will rise
 - There will be a movement along the demand curve for flower vases and their price will go down
 - The demand curve for flower vases will shift to the left and their price will go down
- (2 marks)
-

4.15 Consider the price and demand for tickets to travel by sea ferry. The price of travelling by hovercraft (a substitute form of travel) goes up. Which of the following should happen?

- The demand curve for sea ferry tickets will shift to the left, and their price will go down. More sea ferry tickets will be sold.
 - The demand curve for sea ferry tickets will shift to the right, and their price will go up. More ferry tickets will be sold.
 - The demand curve for sea ferry tickets will shift to the right and their price will go down. More sea ferry tickets will be sold.
 - The demand curve for sea ferry tickets will shift to the right and their price will go up. Fewer sea ferry tickets will be sold.
- (2 marks)
-

4.16 The summer demand for hotel accommodation in London comes mainly from foreign tourists. Demand for hotel rooms in London in summer could be reduced by a fall in the price or value of which of the following?

- (1) US dollars
- (2) Aeroplane tickets
- (3) Sterling
- Item 1 only
- Items 1 and 2 only
- Items 2 and 3 only
- Item 3 only

(2 marks)

- 4.17 ABC produces a variety of soft drink. It has two competitors but all three producers use product differentiation to distinguish themselves from each other. What type of market is this?
- Perfect competition
 - Monopoly
 - Monopolistic competition
 - Oligopoly
- (2 marks)
-
- 4.18 In a certain advanced industrialised country, the government has applied price controls over rents of both public and private rented accommodation for a number of years, and a serious problem of widespread homelessness has built up. Just recently, the rent price controls have been eased.
- Which TWO of the following consequences should now occur?
- An increase in homelessness
 - In the longer term, an increase in new building work
 - The provision of more rented accommodation
 - Fewer owner-occupied dwellings
- (2 marks)
-
- 4.19 The demand curve for a resource may shift because of:
- A change in the demand for a good whose production is dependent on the resource
 - Concerns about potential harmful pollution from the resource
 - A change in the price of a substitute resource
 - All of the above
- (2 marks)
-
- 4.20 The income elasticity of demand for a product is high. This means that:
- Sales will fall only slightly when incomes of households fall
 - Sales will rise sharply when incomes of households rise
 - The good is an inferior good
- (1 mark)
-
- 4.21 Using the point method, what is the price elasticity of demand of product X as price falls from its current price of \$20 to \$15?
- | | Old | New |
|----------|-----------|-----|
| Price | 20 | 15 |
| Quantity | 10 | 15 |
| | (2 marks) | |
-

4.22 Consumer surplus is:

- The excess between what consumers are prepared to pay for a good or service, and the prevailing market price
- The indirect tax producers pay on a good or service
- The marginal utility gained by consuming one more unit of a good or service
- The indirect tax consumers pay on a good or service

(2 marks)

4.23 Which combination of demand and supply curves would be appropriate for a firm attempting to increase its profits by increasing its market share?

- Inelastic demand, inelastic supply
- Elastic demand, elastic supply
- Inelastic demand, elastic supply
- Elastic demand, inelastic supply

(2 marks)

4.24 If the absolute value of the price elasticity of demand for dry white wine is greater than one, a decrease in the price of all wine would result in:

- A more than proportional decrease in the quantity of dry white wine purchased
- A less than proportional decrease in the quantity of dry white wine purchased
- A less than proportional increase in the quantity of dry white wine purchased
- A more than proportional increase in the quantity of dry white wine purchased

(2 marks)

4.25 Mr Smith has a limited income which restricts the number of different goods he can buy. Which of the following describes the position at which Mr Smith's utility from purchasing different goods is maximised?

- Marginal utility from each good is equal
- Marginal utility from each good is 0
- Ratio of marginal utility to price is equal for each good

(1 mark)

(Total = 42 marks)

5 Section A Multi-task questions (MTQs)

29 mins

- 5.1 (a) Are the following statements about elasticities true or false?

	TRUE	FALSE
If income elasticity is positive, the commodity is called an inferior good	<input type="radio"/>	<input type="radio"/>
If two goods are complements, the cross elasticity will be negative	<input type="radio"/>	<input type="radio"/>
If price elasticity is greater than 1, demand is said to be inelastic	<input type="radio"/>	<input type="radio"/>
Unrelated products would have a cross elasticity of infinity	<input type="radio"/>	<input type="radio"/>

(2 marks)

- (b) Which THREE of the following reasons would result in a shift of the demand curve to the right for a normal good?

- A fall in the price of substitutes
- A change in taste towards a competitor good
- An increase in household incomes
- An expected future rise in the price of the good
- A rise in the price of complements
- An increase in population

(2 marks)

- 5.2 (a) A company has recently dismissed employees in the following circumstances:

Sarah was dismissed following disciplinary proceedings, although she was not guilty of negligence, and was not given her contractual period of notice by the company.

Trevor was dismissed from the company immediately after committing an act that was found to be grossly negligent.

Umberto, a relatively new employee who was showing a lot of promise, was dismissed after telling management that he had joined a trade union.

Vanessa, having previously being rated as one of the best performing employees in the company, was dismissed after management discovered she was pregnant.

Match the following types of dismissal to the employees above.

- Unfair
- Wrongful
- Neither
- (1) Sarah
- (2) Trevor
- (3) Umberto
- (4) Vanessa

(2 marks)

- (b) Are the following statements about redundancy true or false?

	TRUE	FALSE
In the event of redundancy, an employee with one year's continuous employment is entitled to compensation	<input type="radio"/>	<input type="radio"/>
Redundancy can occur where an employer ceases to carry on business in a particular location	<input type="radio"/>	<input type="radio"/>

(2 marks)

5.3 (a) The following are steps that governments can take to influence certain areas.

- Tax incentives for investment
- Equal opportunities legislation
- Forbid takeovers
- Product safety standards

Match the steps above to the areas of government concern below.

- (1) Output capacity
- (2) Competition
- (3) Employment
- (4) Consumer protection

(2 marks)

(b) Match the following government policy tools to the policies they relate to.

- Fiscal policy
- Monetary policy
- (1) Borrowing
- (2) Taxation
- (3) Interest rates
- (4) Money supply

(2 marks)

5.4 (a) GHJ Co is a manufacturing company that makes one product. The production process is labour intensive and as a result the product is highly specialised. GHJ Co also provides its customers with maintenance and after sales service.

Department W uses materials and labour to produce the final product.

Department X stores the final product and delivers it to customers.

Department Y is in charge of advertising and promotion of the final product.

Department Z is responsible for providing spare parts to customers.

The following are all primary activities from Porter's value chain

- Operations
- After sales service
- Outbound logistics
- Marketing and sales

Match the primary activities above to the departments of GHJ Co.

- (1) Department W
- (2) Department X
- (3) Department Y
- (4) Department Z

(2 marks)

(b) Which TWO of the following factors indicate that suppliers have high bargaining power in an industry?

- There are a large number of suppliers
- There is a lack of substitute products available
- Switching costs for customers are low
- The product supplied is highly differentiated
- Product quality is not important to customers

(2 marks)

- 5.5 (a) Product BB15 has recently reduced its price by 5% which increased the sales volume by 12.5%. This price change also caused a fall in the sales volume of product CC25 by 2.5%. There was no change in the price of product CC25.

(1) What is the price elasticity of demand for product BB15?

(2) What is the cross elasticity of demand?

(3) Products BB15 and CC25 are _____

Which word correctly fills the blank above?

 ▼

Picklist:

- Complements
- Substitutes
- Unrelated

(3 marks)

- (b) For a normal, but inferior good, the demand curve slopes _____ to the right.

Which word from the list below correctly fills in the blank?

Do you know? – Business organisation structure, functions and governance

Check that you can fill in the blanks in the statements below before you attempt any questions. If in doubt, you should go back to your BPP Interactive Text and revise first.

- An organisation always exists alongside the formal one.
- Organisations can be d..... on a **functional** basis, a **geographical** basis, a **product** basis, a **brand** basis, or a **matrix** basis. Organisation structures often feature a variety of these types, as h..... structures.
- In a d..... structure some activities are **decentralised** to business units or regions.
- The strategic apex exerts a pull to centralise, leading to the s..... structure.
- **Span of control** or 'span of management' refers to the number of s..... responsible to a s.....
- Recent trends have been towards d..... organisations of levels of management.
- R..... may be **pure, applied** or **development**. It may be intended to improve products or processes.
- The function plans, organises, directs and controls the necessary activities to provide products and services, creating outputs which have added value over the value of inputs.
- The function manages an organisation's relationships with its customers.
- (HRM) is concerned with the most effective use of human resources. It deals with organisation, staffing levels, motivation, employee relations and employee services.
- Organisation c..... is 'the way we do things round here'.
- Harrison classified four types of culture, to which Handy gave the names of Greek deities.
 - Power culture (...) is shaped by one individual
 - Role culture (...) is a bureaucratic culture shaped by rationality, rules and procedures
 - Task culture (...) is shaped by a focus on outputs and results
 - Existential or person culture (Dionysus) is shaped by the interests of individuals
- Within an organisation, c..... can consist entirely of executives or may be instruments for joint consultation between employers and employees.
- Good c..... g..... involves **risk management** and **internal control**, **accountability** to stakeholders and other shareholders and conducting business in an **ethical and effective way**.
- The b.... should be responsible for taking major policy and strategic decisions.
- **Division of responsibilities** at the head of an organisation is most simply achieved by separating the roles of C....and c..... e.....
- Audit committees of independent n...- directors should liaise with **external audit**, **supervise internal audit**, and review the annual accounts and **internal controls**.
- Annual reports must convey a f... and b..... view of the organisation. They should state whether the organisation has complied with governance regulations and codes, and give specific disclosures about the board, internal control reviews, going concern status and relations with stakeholders.

Did you know? – Business organisation structure, functions and governance

Could you fill in the blanks? The answers are in bold. Use this page for revision purposes as you approach the exam.

- An **Informal organisation** always exists alongside the formal one.
- Organisations can be **departmentalised** on a functional basis, a geographical basis, a product basis, a brand basis, or a matrix basis. Organisation structures often feature a variety of these types, as **hybrid structures**.
- In a **divisional structure** some activities are decentralised to business units or regions.
- The strategic apex exerts a pull to centralise, leading to the **simple structure**.
- **Span of control** or 'span of management' refers to the number of subordinates responsible to a superior.
- Recent trends have been towards **delayering** organisations of levels of management.
- Research may be pure, applied or development. It may be intended to improve products or processes.
- The production function plans, organises, directs and controls the necessary activities to provide products and services, creating outputs which have added value over the value of inputs.
- The marketing function manages an organisation's relationships with its customers.
- Human resource management (HRM) is concerned with the most effective use of human resources. It deals with organisation, staffing levels, motivation, employee relations and employee services.
- Organisation culture is 'the way we do things round here'.
- Harrison classified four types of culture, to which Handy gave the names of Greek deities.
 - Power culture (Zeus) is shaped by one individual
 - Role culture (Apollo) is a bureaucratic culture shaped by rationality, rules and procedures
 - Task culture (Athena) is shaped by a focus on outputs and results
 - Existential or person culture (Dionysus) is shaped by the interests of individuals
- Within an organisation, committees can consist entirely of executives or may be instruments for joint consultation between employers and employees.
- Good corporate governance involves risk management and internal control, accountability to stakeholders and other shareholders and conducting business in an ethical and effective way.
- The board should be responsible for taking major policy and strategic decisions.
- Division of responsibilities at the head of an organisation is most simply achieved by separating the roles of Chair and chief executive.
- Independent non-executive directors have a key role in governance. Their number and status should mean that their views carry significant weight.
- Audit committees of independent non-executive directors should liaise with external audit, supervise internal audit, and review the annual accounts and internal controls.
- Annual reports must convey a fair and balanced view of the organisation. They should state whether the organisation has complied with governance regulations and codes, and give specific disclosures about the board, internal control reviews, going concern status and relations with stakeholders.

6 Business organisation, structure and strategy**19 mins**

6.1 Which of the following statements about an organisation chart is NOT true?

- An organisation chart provides a summary of the structure of a business.
 - An organisation chart can improve internal communications within a business.
 - An organisation chart can improve employees' understanding of their role in a business.
 - An organisation chart can indicate functional authority but not line authority within a business. **(2 marks)**
-

6.2 Which of the following is a correct definition of 'span of control'?

- The number of employees subordinate in the hierarchy to a given manager
 - The number of levels in the hierarchy 'below' a given manager's
 - The number of employees directly responsible to a manager **(1 mark)**
-

6.3 Which of the following terms is NOT used by Mintzberg in his description of organisational structure?

- Strategic apex
 - Support base
 - Technostructure
 - Operating core **(2 marks)**
-

6.4 Y plc is a growing organisation which has recently diversified into a number of significant new product markets. It has also recently acquired another company in one of its overseas markets.

What would be the most appropriate form of organisation for Y plc?

- Geographical departmentation
 - Divisionalisation
 - Functional departmentation **(1 mark)**
-

6.5 Which of the following principles of classical management is challenged by matrix management?

- Structuring the organisation on functional lines
 - Structuring the organisation on geographical lines
 - Unity of command
 - Decentralisation of decision-making **(2 marks)**
-

- 6.6 Which of the following statements about the informal organisation is NOT true?
- The influence of the informal organisation was highlighted by the Hawthorne Studies, in the way group norms and dynamics affected productivity.
 - Informal organisation can pose a threat to employee health and safety.
 - Informal organisation can stimulate innovation.
 - Managers in positions of authority generally cannot be part of the informal organisation.
- (2 marks)
-
- 6.7 Which of the following is an advantage of centralisation?
- It helps to develop the skills of junior managers
 - It avoids overburdening top managers in terms of workload and stress
 - Senior managers can take a wider view of problems and consequences
- (1 mark)
-
- 6.8 Which of the following statements is/are true?
- (1) An informal organisation exists within every formal organisation
 - (2) The objectives of the informal organisation are broadly the same as those of the formal organisation
 - (3) A strong, close-knit informal organisation is desirable within the formal organisation
 - Statement (1) only
 - Statements (1) and (3) only
 - Statements (2) and (3) only
 - Statement (3) only
- (2 marks)
-
- 6.9 What is an organisation which has removed the internal barriers which separate hierarchy levels and functions and also between the organisation and its suppliers, customers and competitors known as?
- Modular organisation
 - Hollow organisation
 - Jobless structure
 - Boundaryless organisation
- (2 marks)
-
- 6.10 Which of the following statements are true?
- (1) With a shared service centre services are likely to be less tailored
 - (2) The IT function is commonly provided using shared service approach
 - (3) A shared service centre is not part of the organisation
 - Statement (1) and (3) only
 - Statements (1) and (2) only
 - Statements (2) and (3) only
- (1 mark)
-

(Total = 16 marks)

7 Organisational culture and committees

43 mins

- 7.1 BZ Ness Ltd is an organisation with a strongly traditional outlook. It is structured and managed according to classical principles: specialisation, the scalar chain of command, unity of command and direction. Personnel tend to focus on their own distinct tasks, which are strictly defined and directed. Communication is vertical, rather than lateral. Discipline is much prized and enshrined in the rule book of the company.

From the scenario, what sort of culture does BZ Ness Ltd have, using Harrison's classifications?

- Role culture
- Task culture
- Existential culture
- Power culture

(2 marks)

- 7.2 Which of the following statements is true?

- Strong values improve corporate performance
- Strong values can replace rules and controls in an organisation
- Strong values minimise conflict within an organisation
- Strong values are dangerous if they filter out 'uncomfortable' environmental information

(2 marks)

- 7.3 Culture is the collective programming of the mind which distinguishes the members of one from another.

Which word or phrase most accurately completes the definition?

Picklist:

- Nation
- Category of people
- Social class

(1 mark)

- 7.4 Which of the following is NOT one of the terms used by Hofstede to describe a key dimension of culture?

- Power-distance
- Acquisitive/giving
- Individualism/collectivism
- Uncertainty avoidance

(2 marks)

7.5 Which is the 'deepest' set of underlying factors which determine culture, and the hardest to manage?

- Values
- Rituals
- Assumptions

(1 mark)

7.6 Who defined organisational culture as 'the set of shared, taken-for-granted implicit assumptions that a group holds and that determines how it perceives, thinks about and reacts to its environment'?

- Maslow
- Schein
- Porter
- Mintzberg

(2 marks)

7.7 Research has indicated that workers in country A display characteristics such as toughness and the desire for material wealth and possessions, while workers in country B value personal relationships, belonging and the quality of life.

According to Hofstede's theory, these distinctions relate to which of the following cultural dimensions?

- Masculinity – femininity
- Power – distance
- Individualism – collectivism
- Uncertainty avoidance

(2 marks)

7.8 The research and development (R & D) function of a business:

- (1) Is primarily concerned with market research
- (2) Can improve existing products as well as developing completely new products
- (3) Has been less important for firms manufacturing computers to meet an industry standard than for those firms developing the next generation of computers
- (4) Is always undertaken under contract by specialist external consultancies

Which of the above statements are correct?

- (1) and (2) only
- (2) and (3) only
- (1), (3) and (4) only
- (2) and (4) only

(2 marks)

- 7.9 Services have certain qualities which distinguish them from products. Because of their , physical elements such as vouchers, tickets, confirmations and merchandise are an important part of service provision.

Which of the following words most accurately completes the sentence?

Picklist:

- Intangibility
- Inseparability
- Variability
- Perishability

(2 marks)

- 7.10 U Ltd produces a portfolio of products and focuses its efforts and resources on persuading customers to buy them.

This is an example of which type of 'orientation'?

- Production
- Sales
- Marketing

(1 mark)

- 7.11 Which of the following is/are objectives of human resource management?

- (1) To meet the organisation's social and legal responsibilities relating to the human resource
- (2) To manage an organisation's relationship with its customers
- (3) To develop human resources that will respond effectively to change

- (1) and (2)
- (1) and (3)
- (1)
- (1), (2) and (3)

(2 marks)

- 7.12 Jeff, Jane and Jaitinder work in different departments in the firm XYZ Co. They are members of the permanent 'staff committee' which meets on a monthly basis to discuss staff issues such as pensions and benefits. Their purpose is to listen to communication from staff within their department and raise issues on behalf of their department at committee meetings. What is the name given to this type of committee?

- Joint committee
- Task force
- Standing committee

(1 mark)

7.13 Josh, Joanne, Ed, and Sue all work for D Co. Josh works in the finance department. Joanne works in the human resources department. Ed is Sue's line manager in the purchasing department. Which of the staff members would be involved with payroll administration?

- Josh
- Joanne
- Ed
- Sue

(2 marks)

7.14 Managers Jill and Paul are talking about how to resolve a business problem. Jill suggests that a committee should be formed to discuss the issues. Paul argues that committees are:

- (1) Time-consuming and expensive.
- (2) They invite a compromise instead of a clear-cut decision

Which of these statements is true?

- Both (1) and (2)
- (1) only
- (2) only
- Neither statement is true

(2 marks)

7.15 Diane carries out routine processing of invoices in the purchasing department of L Co. Joanne is Diane's supervisor. Lesley is trying to decide how many staff will be needed if some proposed new technology is implemented. Tracey is considering the new work that L Co will be able to offer and the new markets it could enter, once the new technology is well established.

Which member of L Co carries out tactical activities?

- Diane
- Joanne
- Lesley
- Tracey

(2 marks)

7.16 Mr Q is manager of a division which is undergoing a business downturn. He tries to shelter the workforce from the effects of downsizing: taking time for consultation, organising counselling and refusing to institute compulsory redundancies.

Which of the following cultural types identified in the Hofstede model does this manager represent?

- Low power-distance
- Low masculinity
- Low uncertainty avoidance
- High individuality

(2 marks)

- 7.17 Which of the following would NOT be an objective of stakeholder management in relation to in relation to procurement?
- Continuity of supply
 - Mutual dependency
 - Information sharing
- (1 mark)
-
- 7.18 Janet works for a toy company called K Co. She telephones Mary at P Co on a daily basis to order parts. 9 Section B MTQs

29 mins

- 9.1 (a) Paul, Mary, Alan and Kate are having a board meeting of a newly formed company and they are discussing the orientation of the company.

Paul believes that the company will actively need to persuade customers to buy their products.

Mary believes they should add additional features to their products, without carrying out market research, and this will increase demand from customers.

Alan believes the products will sell as they are and the company should produce as many items as it can.

Kate believes that they should research what customers need and value and adapt the products to meet the findings of the research.

For each board member, select the orientation they are recommending.

- (i) Paul

Picklist:

- Production orientation
- Product orientation
- Sales orientation
- Marketing orientation

- (ii) Mary

Picklist:

- Production orientation
- Product orientation
- Sales orientation
- Marketing orientation

- (iii) Alan

Picklist:

- Production orientation
- Product orientation
- Sales orientation
- Marketing orientation

- (iv) Kate

Picklist:

- Production orientation
- Product orientation
- Sales orientation
- Marketing orientation

(2 marks)

- (b) Breaking up the market into different groups, which each have common needs, wants and preferences is known as _____

Which of the options below correctly fills the blank?

Picklist:

- Undifferentiated marketing
Marketing mix
Mass marketing
Market segmentation

(2 marks)

-
- 9.2 (a) The main levels of strategy in an organisation are as follows:

- Corporate
- Business
- Operational

Match the appropriate level of strategy above to the strategic questions below.

- (1) Which business should we be in?

Did you know? – Accounting and reporting systems, technology, compliance and controls controls

Could you fill in the blanks? The answers are in bold. Use this page for revision purposes as you approach the exam.

- Accounting is a way of recording, analysing and summarising transactions of a business.
- The two most important external financial statements are the statement of financial position and the income statement. Reports produced for internal purposes include budgets and costing schedules.
- The **statement of profit or loss** is a record of income generated and expenditure incurred over a given period.
- The **statement of financial position** is a list of all the assets owned by a business and all the liabilities owed by a business at a particular date.
- The **statement of cash flows** shows sources of cash generated during a period and how these funds have been spent.
- The purchases and sales systems will be the most important components of most company accounting systems.
- Controls should be regularly checked and any problems reported to management.
- A database may be described as a 'pool' of data, which can be used by any number of applications. Its use is not restricted to the accounts department.
- Spreadsheets, too, are often used both in financial accounting and cost accounting.
- Internal controls should help organisations counter risks, maintain the quality of reporting and comply with laws and regulations. They provide reasonable assurance that the organisations will fulfil their objectives.
- Controls can be classified in various ways including administrative and accounting; prevent, detect and correct; discretionary and non-discretionary; voluntary and mandated; manual and automated.
- Internal auditors are employees of the organisation whose work is designed to add value and who report to the audit committee. External auditors are from accountancy firms and their role is to report on the financial statements to shareholders.
- An audit trail shows who has accessed a system and the operations performed.
- In a corporate context fraud can fall into one of two main categories: removal of funds or assets from a business or the intentional misrepresentation of the financial position of a business.
- There are three broad pre-requisites or 'pre-conditions' that must exist in order to make fraud a possibility: dishonesty, motivation and opportunity.
- It is the responsibility of the directors to take such steps as are reasonably open to them to prevent and detect fraud.
- The growth of globalisation has created more opportunities for money laundering which governments and international bodies are trying to combat with legislation.
- A denial of service attack involves a cyber-attacker attempting to disrupt an organisation's online activities by preventing people from accessing the organisation's website.
- **Distributed ledger technology** is a technology that allows organisations and individuals who are unconnected to share an agreed record of events, such as ownership of an asset.

10 The role of accounting**54 mins**

- 10.1 Joseph has just started his first job in an accountancy department. A qualified senior member of staff explains to him what the main aim of accounting is. Which of the following options is the correct aim of accounting?
- To maintain ledger accounts for every asset and liability
 - To provide financial information to users of such information
 - To produce a trial balance
 - To record every financial transaction individually
- (2 marks)
-
- 10.2 Which of the following statements about accounting information is NOT correct?
- Some companies voluntarily provide specially-prepared financial information to employees.
 - Accounting information should be relevant, reliable, complete, objective and timely.
 - Accountants have a strong obligation to ensure that company accounts conform to accounting standards
 - Charities and professional bodies do not have to produce financial statements in the same way as businesses.
- (2 marks)

- Teeming and lading

(1 mark)

12.2 Which of the following activities create vulnerability to fraud?

- (1) Calculating payslips
 - (2) Preparing delivery notes
 - (3) Paying supplier invoices
 - (4) Meeting budgets and performance targets
- (3) only
 - (1) and (3) only
 - (1) and (2) only
 - (1), (2), (3) and (4)

(2 marks)

12.3 X plc has a bad debt policy whereby aged receivables who are obviously not going to pay, are written off. The financial accountant does not enforce this policy.

This might be fraudulent insofar as it creates which of the following effects?

- It removes funds from the business
- It results in the understatement of profits and net assets
- It results in the overstatement of profits and net assets
- It results in the intentional overstatement of profits and net assets

(2 marks)

12.4 Dishonesty is a to act in ways which contravene accepted ethical, social, organisational or legal norms for fair and honest dealing.

Which word correctly completes this statement?

Picklist:

- Motivation
- Pre-disposition
- Stimulus

(1 mark)

12.5 All of the following, with one exception, are internal factors which might increase the risk profile of a business. Which is the exception?

- Increased competition
- Corporate restructuring
- Upgraded management information system
- New personnel

(2 marks)

12.6 Which of the following would most clearly present a personnel risk of fraud?

- Segregation of duties
- High staff morale
- Staff not taking their full holiday entitlements
- Consultative management style

(2 marks)

12.7 All of the following, except one, are potential impacts on a business of removal of significant funds or assets. Which is the exception?

- Fall in returns to shareholders
- Reduction in profits
- Increase in working capital
- Reputational damage

(2 marks)

12.8 Which of the following internal controls might be least effective in preventing fraud, if staff are in collusion with customers?

- Physical security
- Requiring signatures to confirm receipt of goods or services
- Sequential numbering of transaction documents
- Authorisation policies

(2 marks)

12.9 In a limited company, or plc, it is the ultimate responsibility of the to take reasonable steps to prevent and detect fraud.

Which word or phrase correctly completes this statement?

Picklist:

- The board of directors
- The external auditor
- The audit committee

(1 mark)

- 12.10 Which of the following is NOT a key risk area for computer fraud?
- Hackers
 - Lack of managerial understanding
 - Inability to secure access to data
 - Integration of data systems
- (2 marks)

Do you know? – Leading and managing individuals and teams

Check that you can fill in the blanks in the statements below before you attempt any questions. If in doubt, you should go back to your BPP Interactive Text and revise first.

- M..... is responsible for using the organisation's resources to meet its goals. It is accountable to the owners: shareholders in a business, or government in the public sector.
- There are three basic schools of leadership theory: ('qualities') theories, s.... theories and(including situational and functional) theories.
- Effective r..... practices ensure that a firm has enough people with the right skills.
- Recruitment is a systematic process of (a) i..... and defining skill needs and (b) attracting suitably skilled candidates.
- S..... tests can be used before or after interviews. Intelligence tests measures the candidate's general intellectual ability, and personality tests identify character traits and behavioural preferences. Other tests are more specific to the job (eg proficiency tests).
- E..... o..... is an approach to the management of people at work based on equal access to benefits and fair treatment.
- Recruitment and s..... are areas of particular sensitivity to claims of d..... – as well as genuine (though often unintended) inequality.
- The concept of 'managing diversity' is based on the belief that the dimensions of i..... difference on which organisations currently focus are crude and performance-irrelevant classifications of the most obvious differences between people.
- P.....n is the process by which the brain selects and organises information in order to make sense of it. People behave according to what they perceive – not according to what really is.
- A is a collection of individuals who perceive themselves as a group. It thus has a sense of identity.
- A team develops in stages: forming, s....., n....., performing (Tuckman) and d..... or mourning/adjourning.
- M..... is 'a decision-making process through which the individual chooses desired outcomes and sets in motion the behaviour appropriate to acquiring them'. (Huczynski and Buchanan).
- McGregor suggested that a manager's approach is based on attitudes somewhere on a scale between two extreme sets of assumptions: Theory ... (workers have to be coerced) and Theory ... (workers want to be empowered).
- The main purpose of t..... and development is to raise competence and therefore performance standards. It is also concerned with personal development, helping and motivating employees to fulfil their potential.
- I..... is the process whereby a person is formally introduced and integrated into an organisation or system.
- A..... is part of the system of performance management, including goal setting, performance monitoring, feedback and improvement planning.

Did you know? – Leading and managing individuals and teams

Could you fill in the blanks? The answers are in bold. Use this page for revision purposes as you approach the exam.

- **Management** is responsible for using the organisation's resources to meet its goals. It is accountable to the owners: shareholders in a business, or government in the public sector.
- There are three basic schools of leadership theory: trait ('qualities') theories, style theories and contingency (including situational and functional) theories.
- Effective recruitment practices ensure that a firm has enough people with the right skills.
- Recruitment is a systematic process of (a) identifying and defining skill needs and (b) attracting suitably skilled candidates.
- Selection tests can be used before or after interviews. Intelligence tests measures the candidate's general intellectual ability, and personality tests identify character traits and behavioural preferences. Other tests are more specific to the job (eg proficiency tests).
- Equal opportunities is an approach to the management of people at work based on equal access to benefits and fair treatment.
- Recruitment and selection are areas of particular sensitivity to claims of discrimination – as well as genuine (though often unintended) inequality.
- The concept of 'managing diversity' is based on the belief that the dimensions of individual difference on which organisations currently focus are crude and performance-irrelevant classifications of the most obvious differences between people.
- Perception is the process by which the brain selects and organises information in order to make sense of it. People behave according to what they perceive – not according to what really is.
- A group is a collection of individuals who perceive themselves as a group. It thus has a sense of identity.
- A team develops in stages: forming, storming, norming, performing (Tuckman) and dorming or mourning/adjourning.
- Motivation is 'a decision-making process through which the individual chooses desired outcomes and sets in motion the behaviour appropriate to acquiring them'. (Huczynski and Buchanan).
- McGregor suggested that a manager's approach is based on attitudes somewhere on a scale between two extreme sets of assumptions: Theory X (workers have to be coerced) and Theory Y (workers want to be empowered).
- The main purpose of training and development is to raise competence and therefore performance standards. It is also concerned with personal development, helping and motivating employees to fulfil their potential.
- Induction is the process whereby a person is formally introduced and integrated into an organisation or system.
- Appraisal is part of the system of performance management, including goal setting, performance monitoring, feedback and improvement planning.

- Job description
- Designing application forms
- Screening application forms

(1 mark)

16.2 A recruitment manager has prepared a statement of the key duties, tasks and reporting responsibilities involved in a particular job, as the basis for job interviewing.

What name would be given to such a statement?

- Job analysis
- Job description
- Job advertisement
- Personnel specification

(2 marks)

16.3 In the context of personnel specifications, the Seven Point Plan (Rodger) does NOT explicitly include which of the following headings?

- Physical make-up
- Interests
- Motivation
- Circumstances

(2 marks)

- 16.4 What is the current trend in human resource management?
- Centralise recruitment and selection within HR
 - Devolve recruitment and selection to line managers
 - Devolve recruitment and selection to the Board
- (1 mark)
-
- 16.5 Selection tests such as IQ tests and personality tests may not be effective in getting the right person for the job for several reasons. Which of the following criticisms of the tests is NOT justified, however?
- Test results can be influenced by practice and coaching rather than genuine ability
 - Subjects are able to deliberately falsify results
 - Tests do not completely eliminate bias and subjectivity
 - Tests are generally less accurate predictors of success than interviews
- (2 marks)
-
- 16.6 In a selection interview, the interviewer asks: 'Surely you'd agree that objectivity is a key requirement for an auditor?'
- What sort of question is this?
- Open
 - Closed
 - Problem-solving
 - Leading
- (2 marks)
-
- 16.7 Which of the following is a disadvantage of a large panel or selection board interview compared to individual or one-to-one interviews?
- A number of people see the candidate at one sitting
 - Specialists can ask questions about technical areas of the work
 - Questions tend to be more varied and more random
 - There is less opportunity for personal rapport with the candidate
- (2 marks)
-
- 16.8 In the context of selection interviews, which of the following describes the 'halo effect'?
- A tendency for people to make an initial judgement based on first impressions, and then letting this colour their later perceptions.
 - An effect whereby the interviewer changes the behaviour of the applicant by suggestion
 - A tendency to mentally assign people to a group and then attribute to them the traits assumed to be characteristic of the group as a whole
 - An effect whereby the interviewer attributes to the applicant beliefs, attitudes or feelings which he has himself
- (2 marks)
-

- 16.9 Selection tests which focus on aptitude, intelligence and personality factors are called tests.

Which word correctly completes this sentence?

Picklist:

- Proficiency
- Psychometric
- Standardised
- Sensitive

(2 marks)

- 16.10 In the context of selection, what is an assessment centre?

- A place where candidates are taken to undergo group assessments
- A series of tests and interviews undergone by an individual candidate over several days
- A series of tests, interviews and activities undergone by a group of candidates over several days
- A technique for assessing large numbers of candidates, usually for junior positions, in a cost-effective manner

(2 marks)

- 16.11 Which of the following statements about reference checking is true?

- References provide objective information about a job candidate
- Personal references are particularly valuable in assessing the qualities of a candidate
- At least two employer references are desirable

(1 mark)

- 16.12 All of the following, except one, are areas of human resource management that benefit from job descriptions. Which is the exception?

- Job evaluation
- Training needs analysis
- Recruitment
- Employee flexibility

- (2 marks)
-

- 16.17 are capacities that lead to behaviours that meet job demands within the parameters of the organisational environment.

Which word correctly completes this sentence?

Picklist:

- Attributes
 - Skills
 - Competences
- (1 mark)
-

- 16.18 The first stage in the recruitment process is:
- To write a job description
 - To write a person specification
 - To identify a vacancy
 - To liaise with recruitment consultants
- (2 marks)
-

(Total = 30 marks)

17 Diversity and equal opportunities

19 mins

17.1 Sound business arguments can be made for having an equal opportunities policy. Which of the following reasons apply?

- (1) To show common decency and fairness in line with business ethics
 - (2) To widen the recruitment pool
 - (3) To attract and retain the best people for the job
 - (4) To improve the organisation's image as a good employer
- (1), (2) and (3) only
 (2) and (3) only
 (1) and (3) only
 (1), (2), (3) and (4)

(2 marks)

17.2 Which of the following correctly describes the purpose of current Equal Pay legislation?

- To ensure that there is no element of sexual or racial discrimination in determining pay rates
- To provide that job evaluation must be used in determining pay rates
- To provide that women have the right to equal pay to work of equal value to that of men
- To ensure that women have the right to equal pay to men in the same job

17.3 Which of the following statements are true or false?

True False

Taking active steps to encourage people from disadvantaged groups to apply for jobs and training is classed as positive discrimination.

Diversity in the workplace means implementing an equal opportunities policy.

(2 marks)

17.4 Members of a religious minority in a workplace are frequently subjected to jokes about their dress and dietary customs, and a bit of name-calling, by non-religious workmates. They find this offensive and hurtful – even though their colleagues say it is 'just a bit of fun'.

What type of discrimination (if any) would this represent?

- Victimation
- Indirect discrimination
- Harassment

(1 mark)

17.5 Which of the following is a potential business benefit of a corporate diversity policy?

- Compliance with equal opportunities legislation
- Respect for individuals
- Better understanding of target market segments
- Efficiency in managing human resources

(2 marks)

17.6 Which of the following statements about disability discrimination law is NOT true?

- The requirements only effect employers of more than 20 employees
- Employers must adjust working arrangements or the physical features of premises to remove any disadvantage to disabled people
- For an individual to be defined as a disabled person, the physical or mental impairment must have an adverse effect of more than 12 months' duration
- Public bodies have additional duties to protect and promote equality for disabled people

(2 marks)

17.7 Which of the following would constitute direct discrimination?

- Setting age limits or ranges in an employment advertisement
- Offering less favourable terms to workers on flexible hours contracts
- Using word-of-mouth recruitment in a predominantly male workforce

(1 mark)

17.8 A job interviewer asks a woman about her plans to have a family. She eventually does not get the job, because she lacks qualifications which are listed as essential in the person specification. However, she later finds out that men who attended interviews were not asked questions about their plans to have a family.

Which of the following statements correctly describes the situation?

- The woman would have a successful claim of direct sexual discrimination
- The woman would have a successful claim of indirect sexual discrimination
- The organisation has laid itself open to a claim of indirect sexual discrimination, but such a claim would not be successful
- The organisation has not laid itself open to any claim of discrimination

(2 marks)

- 17.9 The concept of is based on the belief that the dimensions of individual difference on which organisations currently focus are crude and performance-irrelevant, and that an organisation should reflect the range of differences within its customer and labour markets.

Which words correctly complete this sentence?

Picklist:

- Equal opportunity
Cultural divergence
Managing diversity

(1 mark)

- 17.10 Which of the following is an example of 'positive discrimination' rather than 'positive action' on equal opportunities?

- Selecting a certain number of people from ethnic minorities for jobs, regardless of job-relevant selection criteria
- Using ethnic languages in job advertisements
- Setting targets for the number of people from ethnic minorities that the organisation would like to see in managerial positions

(1 mark)

- There is disagreement and criticism within the group
- There is competition with other groups
- Members passively accept work decisions
- Individuals achieve their own targets

(2 marks)

- 18.2 A team leader is having difficulties with conflict in the team, due to 'clashes' or incompatibilities in the personalities of two of its members. The leader draws up a list of options for managing the problem.

Which option, from the following list, would be the least practicable?

- Educate the members about personality differences
- Encourage the members to modify their personalities
- Remove one of the members from the team

(1 mark)

18.3 At the Soli-Darrety Bros factory, a project team has been put together by management. The team are engaged in debating how they are going to approach the task, and who is going to do what. Some of their first ideas have not worked out but they are starting to put forward some really innovative ideas: they get quite excited in brainstorming sessions, and are uninhibited in putting forward their views and suggestions. Factions are emerging, not only around different ideas, but around two dominating individuals who always seem to disagree.

At what stage of Tuckman's group development model is this team?

- Forming
- Storming
- Norming

(1 mark)

18.4 are mental states (made up of thoughts, feelings and intentions) which influence an individual's response to all objects and situations with which they are related.

Which word correctly completes this definition?

Picklist:

- Personality traits
- Perceptions
- Attitudes
- Emotional intelligences

(2 marks)

18.5 For which of the following applications is teamworking NOT best suited?

- Ideas generation for innovation
- Co-ordination of different functions
- Crisis decision-making
- Co-ordination of geographically dispersed workers

(2 marks)

18.6 If a team is bogged down in argument, and discussion is turning hostile, which of the following types of contribution would the team leader seek to discourage?

- Bringing-in
- Blocking
- Summarising
- Testing understanding

(2 marks)

18.7 Which of the following is NOT a key tool of team building?

- Members identify with the team
- Members are as alike as possible
- Members commit to shared objectives

(1 mark)

18.8 Grant is a member of a project team. His colleagues in the team rely on him to read and check complex project documentation. Grant has a keen eye for detail and often identifies minor details in documents that others miss but may be of significance. Despite the diligent approach, Grant always meets his deadlines. However, some of Grant's colleagues feel frustrated when he refuses to involve others. He can hold up progress as he will not agree to the team signing off project documents until all of his concerns are fully discussed.

According to Belbin's team roles theory, Grant is an example of which of the following?

- Implementer
- Completer – finisher
- Monitor – evaluator
- Shaper

(2 marks)

18.9 What is the most important attribute of a 'group', which distinguishes it from a random crowd of people?

- Purpose
- Conformity
- Identity

(1 mark)

18.10 In Belbin's model of team roles, which of the following is most important for a well-functioning team?

- A mix and balance of team roles
- Nine members, so that all roles are filled
- A focus on functional/task roles, not process roles
- As few members as possible

(2 marks)

18.11 A team is winding up a challenging project that it has been working on for some time. Next week, the same team will go on to a new project with quite different challenges.

Which stage of the group development model is this team likely to be going through?

- Norming
- Dorming
- Adjourning

(1 mark)

18.12 Which of the following would be an effective technique for encouraging healthy team solidarity?

- Discouraging competition with other groups
- Encouraging competition within the group
- Encouraging members to express disagreements
- Discouraging members from expressing disagreements

(2 marks)

18.13 An organisation has set up a team in which any member of the team can perform the full range of its tasks. The manager is able to share out tasks between members according to who is available to do a given job when it is required.

What sort of team organisation does this describe?

- Multi-disciplinary team
- Multi-skilled team
- Self-managed team
- Virtual team

(2 marks)

18.14 Team-member Tom is one of those people who is dynamic and thrives on pressure. He tends to be the one who challenges and pushes other team members, sometimes annoying or upsetting them – but also getting the team past difficult periods.

Which of Belbin's team roles does Tom exercise?

- Plant
- Co-ordinator (chair)
- Implementer
- Shaper

(2 marks)

18.15 A team is having a brainstorming session and one member suggests 'Let's move on to something else as we're getting nowhere'. What type of contribution is this?

- Proposing
- Supporting
- Blocking
- Shutting out

(2 marks)

18.16 Team-leader Arnica has given a briefing stating the current situation and asking for suggestions to move the project on. What stage is the team current at?

- Forming
- Storming
- Norming
- Performing

(2 marks)

19 Motivating individuals and groups**36 mins**

- 19.1 Phil T Luker & Son offers its employees a reward package which includes salary and company car. Its factory is safe and clean and rather smart. The work is technically challenging and employees are encouraged to produce innovative solutions to problems.

Which of the rewards offered by the firm is a form of intrinsic reward?

- The salary
- The car
- The work

(1 mark)

-
- 19.2 Which of the following is NOT a category in Maslow's hierarchy of needs theory?

- Physiological needs
- Freedom of inquiry and expression needs
- Need for affiliation
- Safety needs

(2 marks)

-
- 19.3 Keepham (Hungary) Co offers its employees:

- (1) Sensible company policies
- (2) Good salaries and bonuses
- (3) Considerate supervision
- (4) Training programmes

According to Herzberg's two-factor theory, which of these things will satisfy employees in such a way as to motivate them to superior effort in the long-term?

- (2) only
- (4) only
- (2) and (4) only
- (1), (2), (3) and (4)

(2 marks)

-
- 19.4 What term is given, in motivation theory, to the things people value and choose to pursue?

- Goals
- Innate needs
- Satisfaction

(1 mark)

19.5 Willy Dewitt-Ornott works in Sales. There is always a sales competition at the year end and the winner is likely to be made team leader. Willy's quite certain that he will be able to win and that he will have more responsibility, which he would like. But he would also have to work much longer hours, and he is quite reluctant to do this for family reasons.

If an expectancy equation were used to assess Willy's motivation to work hard at the end of the year, based on the information given, which of the following results would you expect to see?

- Valence would be high, expectancy high, motivation high
 - Valence would be high, expectancy low, motivation low
 - Valence would be around 0, expectancy high, motivation low
 - Valence would be around 0, expectancy high, motivation high
- (2 marks)
-

19.6 All of the following, except one, are alternative terms for the same thing. Which is the exception?

- Motivator factor
 - Hygiene factor
 - Environmental factor
 - Maintenance factor
- (2 marks)
-

19.7 The five core dimensions which contribute to job satisfaction are skill variety, task identity, task significance, and feedback.

Which of the following is the dimension missing from the above list?

Picklist:

- Recognition
 - Advancement
 - Autonomy
 - Rewards
- (2 marks)
-

19.8 Participation can motivate employees by making them take 'ownership' of the task and increasing their commitment. In which of the following circumstances, however, would this NOT happen?

- Participation is genuine
 - The purpose of participation is made clear
 - Everyone is allowed to participate equally
 - Efforts at participation are maintained for a reasonable period
- (2 marks)
-

- 19.9 The management of Guenguiss Cans Co runs a 'tight ship', with clocking-on timekeeping systems, close supervision and rules for everything. 'Well,' says the general manager, 'if you allow people to have any freedom at work, they will take advantage and their work rate will deteriorate'.

Which of Douglas McGregor's 'theories' does this management team subscribe to?

- Theory X
 - Theory Y
 - Theory Z
- (1 mark)
-

- 19.10 Application of process theories to motivation in practice involves all but one of the following measures. Which is the exception?

- Clarifying intended results
 - Giving feedback on actual results
 - Immediacy of reward following results
 - Consistency of reward for results
- (2 marks)
-

- 19.11 Which of the following is a potential problem with individual performance-related pay (PRP) as a motivator?

- Its effect on organisational communication
 - Its relevance to business objectives
 - The fact that it does not relate to individuals' wage or salary grades
 - Its effect on team motivation
- (2 marks)
-

- 19.12 The following, with one exception, are claimed as advantages for job enrichment as a form of job re-design. Which is the exception?

- It increases job satisfaction
 - It enhances quality of output
 - It replaces monetary rewards
 - It reduces supervisory costs
- (2 marks)
-

- 19.13 According to Maslow's hierarchy of needs, which of the following is the final 'need' to be satisfied?

- Self-realisation
 - Self-actualisation
 - Esteem needs
 - Physiological needs
- (2 marks)
-

19.14 Job evaluation puts a relative value on jobs primarily on the basis of which of the following factors?

- Equity
- Job content
- Market rates of pay

(1 mark)

19.15 In Vroom's expectancy theory, what is meant by 'valence'?

- The strength of an individual's preference for a given outcome
- The strength of an individual's motivation to act in a certain way
- The strength of an individual's belief that acting in a certain way will obtain the desired outcome

(1 mark)

19.16 Eva Moor-Drudgery used to pack chocolate bars into boxes of three dozen. Her job has been redesigned, so that she now packs them, applies a 'sell-by' date stamp, cellophanes the box and applies a promotional sticker.

Of which form of job redesign is this an example?

- Job rotation
- Job enlargement
- Job enrichment

(1 mark)

19.17 Which job design technique was advocated by the scientific management school?

- Empowerment
- Micro-division of labour
- Division of labour
- Job enlargement

(2 marks)

19.18 Javed manages a team in which individuals with strong personalities often have heated disagreements, which can lead to open conflict and disruption of work processes. Javed called the team together and explained to them that the outputs of the team should take priority and that every individual team member should try to put their personal feelings aside for the benefit of the company. He persuaded them that they would be better off by modifying their behaviour, as the team's effort was more important in meeting the objectives of the organisation, than the personal agendas of each person in it.

Which of the following is Javed's approach to addressing conflict?

- Integration
- Compromise
- Denial
- Dominance

(2 marks)

20 Training and development

34 mins

- 20.1 Trainee Sara is unhappy in her current training programme, because it is too 'hands on': she is required to attempt techniques before she has had a chance to study the underlying principles first. She spends the evenings trying to read ahead in the course textbook.

Which of Honey and Mumford's learning styles is Sara's preferred style?

- Reflector
- Pragmatist
- Theorist

(1 mark)

-
- 20.2 Which of the following is NOT a characteristic of a 'learning organisation'?

- The generation and transfer of knowledge
- Support for learning and development by all members
- A scientific approach to problem-solving, in order to minimise risk and error
- Willingness to continuously transform itself in response to a changing environment

(2 marks)

-
- 20.3 Which of the following statements about training would be the foundation of an effective training policy?

- Training is the responsibility of the HR department
- Training is all cost and no quantifiable benefit
- The important thing is to do lots of training
- Training can be an effective solution to some performance problems

(2 marks)

-
- 20.4 is 'the planned and systematic modification of behaviour through learning events, programmes and instruction which enable individuals to achieve the level of knowledge, skills and competence to carry out their work effectively'.

Which word correctly completes this definition?

Picklist:

- Conditioning
- Training
- Education

(1 mark)

20.5 The learning cycle developed by David Kolb is a process for learning.

Which of the following words correctly completes this sentence?

- Programmed
- Experiential
- Action
- Reflection

(2 marks)

20.6 All the following, with one exception, are clear benefits of training and development for an organisation. Which is the exception?

- Increased organisational flexibility
- Less need for detailed supervision
- Enhanced employability of staff members
- Improved succession planning

(2 marks)

20.7 Which of the following are 'on the job' training methods?

- (1) Day-release
- (2) Job rotation
- (3) Coaching
- (4) Temporary promotion
- Method (3) only
- Methods (1) and (3) only
- Methods (2), (3) and (4) only
- Methods (1), (2), (3) and (4)

(2 marks)

20.8 You have been asked to comment on the most effective approach for training accounts staff in the use of a new payroll system. Which of the following arguments would you put forward for choosing an on-the-job approach?

- Ability of learners to concentrate on the learning process
- Risk of errors
- Relevance to the informal customs and practices of the department
- Application of learned skills to the job

(2 marks)

20.9 The effectiveness of a training scheme may be measured at different levels. Which of the following levels would be most appropriate for a team leader seeking to evaluate a training programme designed to improve the productivity of her section?

- Level 1: trainee reactions
- Level 2: trainee learning
- Level 3: job behaviour
- Level 5: ultimate value

(2 marks)

- 20.10 development is a process whereby employees are offered a wide range of developmental opportunities, rather than focusing on skills required in the current job.

Which word or phrase correctly completes this sentence?

Picklist:

- Management
Career
Personal

(1 mark)

-
- 20.11 Peter has been identified, using Honey & Mumford's learning styles questionnaire, as a Pragmatist learner. He is now preparing a personal development plan to improve his sales skills.

Which of the following training methods would Peter prefer and include in his plan?

- On-the-job coaching by his supervisor
- A group workshop in 'interpersonal skills practice'
- Personal development journaling
- A computer-based training module on sales

(2 marks)

-
- 20.12 The HR manager of a firm has been asked to explain to the finance director the quantifiable benefits of training programmes. Which of the following might she hesitate to put forward?

- Increased speed of working
- Increased accuracy of work
- Increased employee satisfaction

(1 mark)

-
- 20.13 (1) The growth or realisation of a person's ability and potential through the provision of learning and educational experiences.
(2) The planned and systematic modification of behaviour through learning events, programmes and instruction which enable individuals to achieve the level of knowledge, skills and competences to carry out their work effectively.

Which of the following statements is correct?

- 1 is the definition of development and 2 is the definition of training
- 1 is the definition of education and 2 is the definition of development
- 1 is the definition of training and 2 is the definition of development
- 1 is the definition of education and 2 is the definition of training

(2 marks)

- 20.14 Which of the following documents would be part of a formal training needs analysis exercise?
- An email reminding you that a new piece of legislation is about to come into effect
 - A health and safety officer's report showing that a department failed its assessment in a recent fire evacuation drill
 - A set of competence standards for your job or department
 - Feedback from a colleague about the standard of your work
- (2 marks)
-

- 20.15 is learning through a network of computers or the internet (but not stand-alone CD-Rom or tuition software), so that learning support is available from online tutors, moderators and discussion groups.

What term is used for this learning technology?

Picklist:

- E-learning
 - Computer based training
 - Blended learning
 - Computer based assessment
- (2 marks)
-

- 20.16 The stages of Kolb's experiential learning cycle are as follows.

- (1) Draw conclusions from the experience
- (2) Have an experience
- (3) Plan the next steps
- (4) Reflect on the experience

Which is the correct order?

- (2), (4), (1), (3)
 - (2), (3), (4), (1)
 - (2), (4), (3), (1)
- (1 mark)
-

- 20.17 What is a competence framework used for?

- To identify present level of competence
 - To identify training needs
 - To evaluate training success or failure
- (1 mark)
-

(Total = 28 marks)

21 Performance appraisal

26 mins

- 21.1 Which of the following is NOT a purpose of performance appraisal?
- Job evaluation
 - Identification of training needs
 - Succession planning
- (1 mark)
-
- 21.2 A manager is assessing the performance of her team members. In accordance with the appraisal system of the organisation, she has been given a list of characteristics and performance elements, with notes on how to interpret and apply the terms: 'integrity', 'punctuality' and so on. She is required to comment on how each appraisee measures up in terms of each factor.
- Which appraisal technique is this organisation using?
- Overall assessment
 - Grading
 - Behavioural incident
 - Guided assessment
- (2 marks)
-
- 21.3 All of the following, except one, are sound principles for devising performance measures. Which is the exception?
- They should be related to actual key tasks of the job
 - They should be easily achievable
 - They should be within the control of the individual
 - They should be observable or measurable
- (2 marks)
-
- 21.4 In an appraisal interview, the manager tells the subordinate how he has been assessed – good and bad – and then gives him a chance to put questions, suggest improvement targets, explain shortcomings and identify problems.
- Using Maier's classification, what is the name given to this approach to appraisal interviewing?
- Tell and sell
 - Tell and listen
 - Problem solving
 - Sell and listen
- (2 marks)
-
- 21.5 Which of the following is likely to be the most objective approach to appraisal?
- Self appraisal
 - Peer appraisal
 - Upward appraisal
 - 360-degree feedback
- (2 marks)
-

21.6 is 'a process to establish a shared understanding about what is to be achieved, and an approach to managing and developing people in order to achieve it'.

Which two words correctly completes this definition?

Picklist:

- Performance appraisal
Performance management
Peer appraisal

(1 mark)

21.7 Which of the following are meaningful criteria for measuring the effectiveness of an appraisal scheme?

- (1) Serious intent
(2) Fairness
(3) Efficiency
(4) Co-operation
(5) Results

- (2), (3) and (5) only
 (3) and (5) only
 (1), (2), (3) and (4) only
 (1), (2), (3), (4) and (5)

(2 marks)

21.8 is the name given to gathering of appraisals from the individual, superiors, subordinates, peers and co-workers and customers.

Which word or phrase correctly completes this sentence?

Picklist:

- Multi-source feedback
Management by objectives
Performance management

(1 mark)

21.9 Appraisal is a complex human relations and political exercise. Which of the following is NOT necessarily a helpful factor in the design of an appraisal scheme?

- The purpose of the system is positive and clearly expressed
 There is reasonable standardisation throughout the organisation
 Time is allowed for appraisee preparation and appraiser training
 There is an implied link between assessment and reward

(2 marks)

- 21.10 Which of the following is NOT a barrier to effective appraisal?
- Appraisal is seen as a way of wrapping up unfinished business for the year
 - Appraisal is seen as conforming to Human Resource procedures
 - Appraisal is seen as an opportunity to raise workplace problems and issues
 - Appraisal is seen as an annual event
- (2 marks)
-

- 21.11 Which of the following criteria would NOT be suitable for evaluating an appraisal system?
- Serious intent
 - Fairness
 - Bonuses awarded
- (1 mark)
-

- 21.12 Which of the following is an advantage to all employees of having a formal appraisal system?
- Suitable promotion candidates are identified
 - It provides a basis for medium- to long-term HR planning
 - Individual objectives are related to the objectives of the whole organisation
 - It provides a basis for reviewing recruitment and selection decisions
- (2 marks)
-

- 21.13 A sales team is assessed according to the number of sales calls made, number of leads generated, and number and value of sales made.

Which appraisal technique is described in this example?

- Behavioural incident
 - Rating scale
 - Guided assessment
 - Results-oriented
- (2 marks)
-

22 Section D MTQs

29 mins

- 22.1 (a) Peter, Gloria, Shirley and Matthew are part of a newly formed team.

Peter is a reliable employee who likes to take ideas from other people and turn them into actions. He is not very flexible and tends to be resistant to change or new possibilities.

Gloria is a dynamic individual who responds best when under pressure. She is driven to overcome any obstacles, but has a tendency to hurt other people's feelings.

Shirley is single-minded and dedicated to her work. She has a lot of specific knowledge, but only contributes to discussions on these areas and lacks the ability to see the bigger picture.

Matthew is strategically minded. He likes to see all the available options before judging them. He has a proven track record of good judgements, but can be overly critical and does not inspire others that he works with.

For each team member listed below, select the appropriate Belbin team role from the list below:

- (i) Peter

Picklist:

Shaper
Monitor-Evaluator
Implementer
Specialist

- (ii) Gloria

Picklist:

Shaper
Monitor-Evaluator
Implementer
Specialist

- (iii) Shirley

Picklist:

Shaper
Monitor-Evaluator
Implementer
Specialist

- (iv) Matthew

Picklist:

Shaper
Monitor-Evaluator
Implementer
Specialist

- (b) _____ occurs when an individual is penalised for giving information in a discrimination claim against an employer.

Which word correctly fills in the blank?

Picklist:

- Indirect discrimination
- Harassment
- Victimisation

(1 mark)

- (c) Encouraging individuals from disadvantaged groups to apply for jobs and training is known as positive action.

- True
- False

(1 mark)

- 22.2 (a) Indicate whether the following are extrinsic rewards, intrinsic rewards or incentives.

	Extrinsic reward	Intrinsic reward	Incentive
A feeling of achievement	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
A promise of additional time off for meeting a target	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Working conditions	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Salary	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

(2 marks)

- (b) Which TWO of the following steps would be classified as job enrichment?

- Giving an employee freedom to decide how the job should be done
- Increasing the number of tasks an employee participates in
- Transferring an employee from one job to another
- Encouraging employee participation in planning decisions of superiors
- Dividing a job up into a small number of sequential tasks

(2 marks)

- 22.3 (a) Shaun likes to understand basic principles and take a hands-off approach based on logical argument. He wants to participate in a structured training programme which is run by teachers.

Louise needs to work at her own pace and tends to be fairly slow and cautious in her learning. She likes to observe things, take time to think about them and then produces a carefully thought-out conclusion.

Susan only likes to study if she can see a link to a real practical problem. She likes to learn new techniques through on-the-job training, but tends to discard good ideas which require some development to work properly.

Tony is flexible and optimistic, but does not have any patience with theories. He wants to receive hands-on training and enjoys practical problems.

Honey and Mumford classified the four following learning styles:

- Theorists
- Reflectors
- Activists
- Pragmatists

Match the learning styles above to the following individuals below.

- (1) Shaun
- (2) Louise
- (3) Susan
- (4) Tony

(2 marks)

- (b) Which TWO of the following are off-the-job training methods?

- Job rotation
- Computer-based training
- Temporary promotion
- Demonstration
- College courses

(2 marks)

-
- 22.4. (a) George, Helen, Josh and Leigh are all on development programmes.

George is learning skills that are not directly required in his current role, but should allow him to contribute more flexibly and innovatively to the organisation in the future whichever role he is in.

Helen is gaining experience of each of the different functions in her company as well as a variety of position and work settings as preparation for increased responsibility in the future.

Josh is receiving training to ensure his professional standards in his accountancy work are maintained and enhanced through education, development and training.

Leigh is partway through a series of planned secondments within her department and has recently been working in two project group for implementing new systems.

The following are all different approaches to development:

- Management development
- Personal development
- Professional development
- Career development

Match the development approaches above to the following individuals below.

- (1) George
- (2) Helen
- (3) Josh
- (4) Leigh

(2 marks)

- (b) Which TWO of the following are necessary for a training programme to be effective?
- Training should be expensive
 - There should be clear objectives
 - Training should be off-the-job
 - There should be timely feedback
 - Training should be on-the-job

(2 marks)

- 22.5 (a) Company W assess the performance of its sales staff by the number of clients visited and the number of products they each sell.

Company X rates its managerial staff. Each manager is awarded a score from 1 (excellent) to 4 (poor), based on feedback from subordinates and superiors.

Company Y appraises the performance of its staff through assessors commenting on a number of desired characteristics and performance elements.

Company Z compares attributes displayed by its staff to a series of attributes that indicate either unsatisfactory or unsatisfactory performance in their job role.

The following are different types of appraisal techniques

- Guided assessment
- Grading
- Behavioural-incident method
- Results-oriented scheme

Match the appraisal techniques above to the following companies below.

- (1) Company W
- (2) Company X
- (3) Company Y
- (4) Company Z

(2 marks)

- (b) The manager does not criticise, but instead discusses issues with the employee. The employee is encouraged to think things through and commits to personal improvement.

Which of Maier's three approaches to appraisal interviews is this an example of?

- Tell and sell
- Tell and listen
- Problem-solving

(1 mark)

- (c) Performance appraisal can be used to identify potential candidates for promotion.

- True
- False

(1 mark)

22.6 (a) What type of power describes the behaviour of a manager who is refusing a request for one of his team members to help with the workload of another department?

- Expert power
- Negative power
- Coercive power
- Physical power

(1 mark)

(b) Fiedler, Heifetz and Bennis are theorists who wrote about management and leadership. Match each of the statements below with each theorist's findings.

	Fiedler	Heifetz	Bennis
Individuals at all levels can exert a leadership influence	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
There are 'psychologically close' and 'psychologically distant' managers	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The manager 'does things right' while the leader 'does the right thing'	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Do you know? – Personal effectiveness and communication in business

Check that you can fill in the blanks in the statements below before you attempt any questions. If in doubt, you should go back to your BPP Interactive Text and revise first.

- T... is a scarce resource and managers' time must be used to the best effect.
- The c..... of c.....n will impact on the effectiveness of the communication process. The characteristics of the message will determine what communication tool is best for a given situation.
- C..... is an interpersonal interview, the aim of which is to facilitate another person in identifying and working through a problem.
- Counselling is facilitating others through the process of d..... and e.....g their own problems: it is primarily a non-directive role.
- Communication is a two-way process involving the t..... or e..... of information and the provision of feedback. It is necessary to direct and co-ordinate activities.
- Communication in an organisation flows d....., u....., s..... and d.....
- Data and information come from s..... both inside and outside an organisation. An organisation's information systems should be designed so as to obtain – or capture – all the relevant data and information required.
- I..... communication supplements the f..... system.
- B..... to communication include 'noise' from the environments, poorly constructed or coded/decoded messages (distortion) and failures in understanding caused by the relative position of the senders and receivers.

Did you know? – Personal effectiveness and communication in business

Could you fill in the blanks? The answers are in bold. Use this page for revision purposes as you approach the exam.

- Time is a scarce resource and managers' time must be used to the best effect.
- The channel of communication will impact on the effectiveness of the communication process. The characteristics of the message will determine what communication tool is best for a given situation.
- Counselling is an interpersonal interview, the aim of which is to facilitate another person in identifying and working through a problem.
- Counselling is facilitating others through the process of defining and exploring their own problems: it is primarily a non-directive role.
- Communication is a two-way process involving the transmission or exchange of information and the provision of feedback. It is necessary to direct and co-ordinate activities.
- Communication in an organisation flows downwards, upwards, sideways and diagonally.
- Data and information come from sources both inside and outside an organisation. An organisation's information systems should be designed so as to obtain – or capture – all the relevant data and information required.
- Informal communication supplements the formal system.
- Barriers to communication include 'noise' from the environments, poorly constructed or coded/decoded messages (distortion) and failures in understanding caused by the relative position of the senders and receivers.

23 Personal effectiveness and communication

- Notice boards
 - Organisation manual
 - Team meetings
 - Team briefings
- (2 marks)
-
- 23.12 What is the technical term given to a fault in the communication process where the meaning of the message is lost 'in translation' from intention to language, or from language to understanding?
- Noise
 - Redundancy
 - Distortion
 - Feedback
- (2 marks)
-
- 23.13 According to Leavitt, which of the following communication patterns is the fastest in terms of problem solving?
- Y
 - Circle
 - Chain
 - Wheel
- (2 marks)
-
- 23.14 Which of the following defines coaching?
- Developing the individual by helping to build on skills and overcome weaknesses
 - Provision of one-way instruction on formal tasks required to carry out the immediate job
 - Offering career guidance in order to maximise the individual's potential
 - Provision of objective advice to overcome the individual's personal problems
- (2 marks)
-
- 23.15 Which of the following statements about non-verbal communication is NOT true?
- Non-verbal cues can be used to reinforce or undermine spoken messages
 - People pay less attention to non-verbal cues than to what is being said
 - Non-verbal cues include tone of voice and silences
 - Non-verbal cues are a key source of feedback
- (2 marks)
-

23.16 In the context of work planning and personal development planning, a SMART framework is often used as a checklist of the characteristics of effective goals.

What does the 'M' in SMART stand for?

- Manageable
- Measurable
- Motivational

(1 mark)

23.17 ABC has promised customer DEF that a product will be delivered on a certain date. The product is in fact delivered nearly a month late. As a direct result DEF misses an important deadline and has to pay penalties.

In what way has ABC failed DEF?

- Failed to communicate
- Failed to meet deadlines
- Failed to comply with job specifications
- Failed to deliver the exact product needed

(2 marks)

23.18 When considering a personal development programme for an employee, what should be the first stage?

- Planning a learning and development programme
- Establishing learning targets
- Broadening the employee's knowledge and experience
- Setting up a competence framework

(2 marks)

23.19 Which of the following situations may give rise to a source of positive or constructive conflict?

- Hostility between employees
- The task is lost sight of due to individual arguments
- A dispute focuses attention on individual contributions

29 mins

- 24.1 (a) Which TWO of the following conditions would show that a task is important to an organisation?
- The task will satisfy a key customer
 - The task comes in an email marked urgent
 - The task will add value to the organisation
 - The task has already been delegated by two superiors
- (2 marks)
- (b) Are the following statements true or false?

True False

A meeting without a clear objective will always give value to everyone attending for the time taken.

Time management can be improved by setting aside times when an individual is not contactable by others.

(2 marks)

-
- 24.2 (a) Trevor, Joss, Michael and Leona are all managers in HGF Co experiencing conflict in their teams.

Trevor responds to conflict by encouraging the individuals to bargain and negotiate.

Joss puts emphasis on the task in hand and stresses that the group effort must be superior to individual effort.

Michael likes to use his power as manager to force a settlement on his team. This causes some resentment amongst his team members.

Leona ignores the conflict in the hope that the issue is trivial and the team will then continue to operate as normal.

The following are management responses to conflict:

- Denial
- Compromise
- Dominance
- Integration/Collaboration

Match the management responses above to the managers below.

- (1) Trevor
- (2) Joss
- (3) Michael
- (4) Leona

(2 marks)

- (b) Are the following statements about conflict resolution true or false?

True False

Compromises result in all parties being satisfied

A win-win situation is rare, but is the best solution to conflict resolution

A lose-lose situation is not possible

Win-lose situations can result in damaged relationships within the team

(2 marks)

	Data	Information
Completed questionnaires for market research	<input type="radio"/>	<input type="radio"/>
Company website page	<input type="radio"/>	<input type="radio"/>
Calculations showing whether an investment is profitable	<input type="radio"/>	<input type="radio"/>
An individual employee's test score	<input type="radio"/>	<input type="radio"/>
Variance reports for a department manager	<input type="radio"/>	<input type="radio"/>
The average employee assessment grade for a company	<input type="radio"/>	<input type="radio"/>

(3 marks)

(b) A five-year cash forecast would be classified as which of the following levels of information?

- Operational
- Management
- Strategic

(1 mark)

24.4 (a) On 1 August, the financial controller of XYZ Co is told it is her responsibility to let everyone in the finance department know about a compulsory meeting to be held on 15 September.

The financial controller sends an email to all members of the finance department, informing them about the time, date, place and purpose of the meeting. The email is sent on 13 September.

Which of the following desirable qualities of formal communication is lacking in this scenario?

- Clarity
- Recipient
- Medium
- Timing

(2 marks)

(b) Which THREE of the following statements about informal communication are true?

- The grapevine operates outside the place of work
- Information is not divulged randomly
- It can bypass secretive management
- The grapevine fills a gap created by an ineffective formal communication system
- It is less current than formal communication
- It relates to internal politics

(2 marks)

- 24.5 (a) Which TWO of the following are examples of misunderstanding in the communication process?
- Slang is used in task instructions
 - A meeting goes on for too long for participants to pay attention to everything
 - An email sent to all employees using IT jargon
 - The sender of an email has not included details of the location of the meeting
 - A manager is constantly dealing with queries from subordinates and misses a meeting
- (2 marks)
- (b) _____ occurs when an individual thinks that they have been wrongly treated by a colleague or supervisor.
- Which of the following correctly fills the blank?
- Indirect discrimination
 - Direct discrimination
 - A grievance
- (1 mark)
- (c) The meaning of a message is lost at the coding and decoding stage.
- Which of the following is the correct term for this loss of meaning?
- Feedback
 - Distortion
 - Noise
- (1 mark)
-

- 24.6 (a) Peggy, Operations Director at X Ltd, has delegated the task of identifying reasons for recent bottlenecks in manufacturing processes to Susan. This will involve Susan in interviewing relevant operators, foremen and supervisors, and also liaising with other departments, to establish why the bottlenecks are occurring. Peggy would like a report on her desk in two weeks' time as she is due to report to the board. Susan is worried about the project, as she is very busy with her routine workload.
- Place the suggested steps below in the correct order, so that Susan can plan her time effectively.
- Identification of information sources within the business
 Collation of information
 Establishing priorities with Peggy
 Sequencing of interviews with relevant staff
 Delegation of routine tasks
 Report writing
- (3 marks)
- (b) Jim has been asked to coach John in certain technically demanding aspects of his accounting role in order to improve John's performance. Which of the following is NOT part of this role?
- Showing John where to find company information on relevant accounting standards
 - Demonstrating the company's new accounting software
 - Inviting John to the annual audit planning meeting
 - Helping John to prepare for his upcoming appraisal
- (1 mark)
-

Do you know? – Professional ethics in accounting and business

Check that you can fill in the blanks in the statements below before you attempt any questions. If in doubt, you should go back to your BPP Interactive Text and revise first.

- Organisations are not autonomous; they exist to serve some e..... p....., usually manifested in a group such as shareholders in a company or trustees of a charity. In particular, the **strategic apex must not lose sight of this accountability**.
- All managers have a **duty of f.... s.....** to the external purpose of the organisation and this lies most heavily on the shoulders of those at the strategic apex.
- E.... and are about right and wrong behaviour. Western thinking tends to be based on ideas about **duty** and **consequences**. Unfortunately, such thinking often fails to indicate a single clear course of action.
- E.....thinking is also influenced by the concepts of **virtue** and **rights**.
- Ethical c..... by all members should be a major concern for management. Inside the organisation, a **c..... based** approach highlights **conformity with the law**.
- An **i..... based** approach suggests a **wider remit**, incorporating ethics in the organisation's **values and culture**.
- Organisations sometimes issue codes of conduct to
- As an accountant, your values and attitudes **flow through** everything you do professionally. They contribute to the **trust** the wider c..... puts in the profession and the **perception** it has of it.
- The (IFAC) is an international body representing all the major accountancy bodies across the world. Its mission is to develop the **high standards** of professional accountants and enhance the quality of services they provide.

Did you know? – Professional ethics in accounting and business

Could you fill in the blanks? The answers are in bold. Use this page for revision purposes as you approach the exam.

- Organisations are not autonomous; they exist to serve some external purpose, usually manifested in a group such as shareholders in a company or trustees of a charity. In particular, the **strategic apex** must not lose sight of this accountability.
- All managers have a **duty of faithful service** to the external purpose of the organisation and this lies most heavily on the shoulders of those at the strategic apex.
- Ethics and morality are about right and wrong behaviour. Western thinking about ethics tends to be based on ideas about duty and consequences. Unfortunately, such thinking often fails to indicate a single clear course of action.
- Ethical thinking is also influenced by the concepts of **virtue and rights**.
- Ethical conduct by all members should be a major concern for management. Inside the organisation, a **compliance based** approach highlights conformity with the law.
- An **integrity based** approach suggests a wider remit, incorporating ethics in the organisation's values and culture.
- Organisations sometimes issue codes of conduct to employees.
- As an accountant, your values and attitudes flow through everything you do professionally. They contribute to the trust the wider community puts in the profession and the perception it has of it.
- The **International Federation of Accountants (IFAC)** is an international body representing all the major accountancy bodies across the world. Its mission is to develop the high standards of professional accountants and enhance the quality of services they provide.

25 Ethical considerations**41 mins**

- 25.1 Managers are said to have a responsibility (or duty of faithful service) in respect of the entities whose purposes they serve.

Which term correctly completes this sentence?

**Picklist:**

- Financial
Ethical
Fiduciary

(1 mark)

- 25.2 What is the name given to an approach to ethical decision-making which considers the 'right' decision to be the one which results in the greatest good to the greatest number of people in a given situation?

- Utilitarianism
- Deontology
- Virtue ethics

(1 mark)

- 25.3 X plc is trying to get a trading permit, for which it qualifies. Unfortunately, there is a backlog at the issuing office, and X plc has been notified that there will be a delay in the processing of its permit. The divisional manager offers a donation to the issuing office's staff welfare fund, if the official concerned will expedite the paperwork.

Which of the following statements is true of this action?

- It is not unethical, because the money is offered for positive purposes.
- It is not unethical, because X plc is legally entitled to the benefit it is claiming.
- It constitutes bribery.
- It constitutes grease money.

(2 marks)

- 25.4 Which of the following is an approach to ethics which combines a concern for the law with an emphasis on managerial responsibility?

- Compliance based
- Integrity based
- Environmental based
- Economic based

28.1 Which of the following did Henri Fayol include in his five functions of management?

- (1) Motivating
 - (2) Co-ordinating
 - (3) Commanding
 - (4) Controlling
- (1), (2) and 3) only
 - (2), (3) and (4) only
 - (1) and (4) only
 - (3) and (4) only

(2 marks)

28.2 Which of the statements below describes contingency theory?

- Organisational design will be determined by a number of factors all of which depend on the others
- Companies must plan for changes to their organisation
- Companies should focus on the short-term as the future is uncertain

(1 mark)

28.3 Peter Drucker grouped management activities or operations into five categories.

Which of the following is NOT one of those categories?

- Setting objectives
- The job of measurement
- Planning and control

(1 mark)

28.4 Different types of power may be exercised within an organisation by different individuals.

Which type of power is associated with formal authority?

- Resource power
- Expert power
- Position power

(1 mark)

28.5 Rensis Likert identifies four management styles. What are they?

- Benevolent autocratic, participative, democratic, exploitative autocratic
 - Benevolent authoritative, participative, exploitative authoritative, democratic
 - Exploitative autocratic, benevolent autocratic, participative, laissez faire
 - Benevolent autocratic, consultative participative, exploitative, laissez faire (2 marks)
-

28.6 A company has established a project team to design a new information system. The team has had a few meetings to discuss how they are going to tackle the work, and who would do what, but some early ideas have been unsuccessful. Group members are still putting forward a number of very innovative ideas, but they often disagree strongly with each other. The group members appear to be dividing into two 'camps' each of which has an unofficial 'leader'. These two individuals agree about very little and appear to dislike each other. According to Tuckman, which stage in development has the project team reached?

- Norming
- Performing
- Storming

(1 mark)

28.7 In the context of human resource planning, which TWO of the following documents are the outputs of a process of job analysis?

- (1) Human resource plan
- (2) Job description
- (3) Person specification
- (4) Performance appraisal

- (1) and (2)
- (1) and (3)
- (2) and (4)
- (2) and (3)

(2 marks)

28.8 Belbin described the most effective character mix in a team. This involves eight necessary roles, which should ideally be balanced and spread in a team.

A person who is highly strung, extrovert and passionate about the task fits into which of Belbin's roles?

- Plant
- Completer Finisher
- Resource Investigator
- Shaper

(2 marks)

28.9 Which of the following team member roles is NOT from Belbin's list of group rules?

- Shaper
- Plant
- Attacker
- Finisher

(2 marks)

28.10 Which of the following are positive aspects of teamworking?

- (1) Control
 - (2) Work organisation
 - (3) Knowledge generation
 - (4) Decision making
- (1), (2) and (3)
 - (1) and (2)
 - (1), (2) and (4)
 - All four

(2 marks)

28.11 Tuckman identified four stages in group development, which occur in a particular order.

What is the order in which the stages occur?

- Forming, storming, norming, performing
- Forming, storming, performing, norming
- Storming, norming, forming, performing
- Storming, forming, performing, norming

(2 marks)

28.12 'The justification for empowering workers, or removing levels in hierarchies that restrict freedom, is that not only will the job be done more effectively but the people who do the job will get more out of it in terms of growth, challenge, responsibility and self-fulfilment'.

The thinking is in line with which management writer?

- Herzberg
- Fayol
- Taylor
- Weber

(2 marks)

28.13 Bruce has been on a training course to help him develop his negotiation skills and learn some new techniques.

He has been practising three of these back in the office – can you identify them?

- (1) Look for a wide variety of possible solutions
 - (2) Try to develop options that would result in mutual gain
 - (3) Create a trusting supportive atmosphere in group
 - (4) Define the problem carefully
- (1), (2) and (3)
 - (2), (3) and (4)
 - (1), (2) and (4)
 - (1), (3) and (4)

(2 marks)

28.14 There are many different methods of communication, each with its own features and limitations. Can you identify the three features/advantages of conversation as a communication technique from the list below?

- (1) Requires little or no planning
 - (2) Gives a real impression of feelings
 - (3) Complex ideas can be communicated
 - (4) Usually unstructured so can discuss a wide range of topics
- (1), (2) and (3)
 - (2), (3) and (4)
 - (1), (2) and (4)
 - (1), (3) and (4)

(2 marks)

28.15 Which of the following would Herzberg class among 'hygiene factors'?

- (1) Salary
 - (2) Job security
 - (3) Gaining recognition
 - (4) Challenging work
- (2) and (4) only
 - (1) only
 - (1), (2), (3) and (4)
 - (1) and (2) only

(2 marks)

- 28.16 Vocabulary and style should contribute to the clarity of message in a presentation. It is recommended that short simple sentences are used and the presenter should avoid certain expressions.

Which of following list should be avoided?

- (1) Acronyms
 - (2) Jargon
 - (3) Colloquialisms
 - (4) Double meanings
- (2) and (3) only
 - (2), (3) and (4) only
 - (1), (2) and (4) only
 - (3) and (4) only

(2 marks)

-
- 28.17 Electronic mail has so many features and advantages that it is easy to forget that there may be limitations associated with it. Can you identify the disadvantages of email from the list below?

- (1) People may not check their email regularly
 - (2) Complex images do not transmit well
 - (3) Requires some computer literacy to use effectively
 - (4) Lack of privacy – can be forwarded without your knowledge
- (1), (2) and (3) only
 - (2), (3) and (4) only
 - (1), (2) and (4) only
 - (1), (3) and (4) only

(2 marks)

- The central strategy-setting component of organisation structure

(2 marks)

32.3 Z plc sources a range of complex components from suppliers which are critical to the quality of Z plc's final product. Any disruption to the supply of these components will mean that Z plc cannot maintain its service levels to its own customers.

In the purchasing of these components, which TWO of the following will NOT be a component of Z plc's supply strategy?

- Long-term partnership relations with key suppliers of the components
- A small number of suppliers of the components
- Outsourcing production of the product to low-cost countries
- Consolidating purchases of the components and sourcing from a single supplier to reduce sourcing costs

(2 marks)

32.4 In Robert Anthony's hierarchy, which of the following is the term given to the process of establishing means to corporate ends, mobilising resources and innovating?

- Strategic management
- Tactical management
- Operational management

(1 mark)

32.5 is the system by which organisations are directed and controlled by their senior officers.

Which two words correctly complete this definition?

 ▾

32.6 Which of the following statements is true of a 'progressive tax'.

- It takes a higher proportion of a poor person's salary than of a rich person's.
- It takes the same proportion of income in tax from all levels of income.
- It takes a higher proportion of income in tax as income rises.

(1 mark)

32.7 In employment protection law, which of the following would constitute unfair dismissal?

- Dismissal because the employer has ceased to carry on the business
- Dismissal because the employer has relocated the place of work
- Dismissal because demand for the type of work done by the employee(s) is expected to decline
- Dismissal because the employee is pregnant

(2 marks)

32.8 Various groups of people might be interested in financial information about an organisation, for various reasons.

Match up each of the following groups with the primary nature of their interest in financial information.

Groups	Interest
(i) Shareholders	(1) Ability to maintain and repay loans
(ii) Financiers	(2) Potential social contributions and impacts
(iii) Employees	(3) Management stewardship
(iv) Public	(4) Attainment of performance objectives

(2 marks)

32.9 The website of a university contains a dedicated site for academic researchers, giving them access to the university's archived material, if they register and obtain a password to enter the site.

Of which type of network is this an example?

- Internet
- Intranet
- Extranet

(1 mark)

- 32.10 Which of the following is a feature of an ineffective job advertisement?
- It narrows the pool of people who might go on to apply for the job
 - It provides all information necessary to make an application
 - It maximises the attractiveness of the job and organisation to potential applicants
 - It is relevant and appropriate to the nature of the job and the desired applicants
- (2 marks)

32.15 What is the main focus of International Accounting Standards (IASs)?

- Financial control
- Accountancy training
- Financial reporting
- Corporate governance

(2 marks)

32.16 A large supermarket chain has purchased land for a new out-of-town shopping development in an area of recognised natural beauty. The organisation is now preparing plans for infrastructure development (road access, parking, power) and construction.

Into which quadrant of the above power/interest matrix would the organisation place local nature appreciation groups, and what strategy does this indicate?

- Consult and involve
- Keep informed
- Keep satisfied
- Minimal effort

(2 marks)

32.17 What is a fraud response plan?

- A strategy for preventing and controlling fraud
- A framework of disciplinary rules and sanctions to be applied when fraud is discovered
- A strategy for investigating and dealing with the consequences of suspected or identified fraud

(1 mark)

32.18 In which of the following areas is economic growth most clearly beneficial, as an objective of macro-economic policy?

- Employment
- Public services
- Environment

(1 mark)

32.19 According to Warren Bennis, which TWO of the following attributes distinguishes a leader, as opposed to a manager?

- Administers and maintains
- Focuses on people
- Innovates
- Focuses on systems

(2 marks)

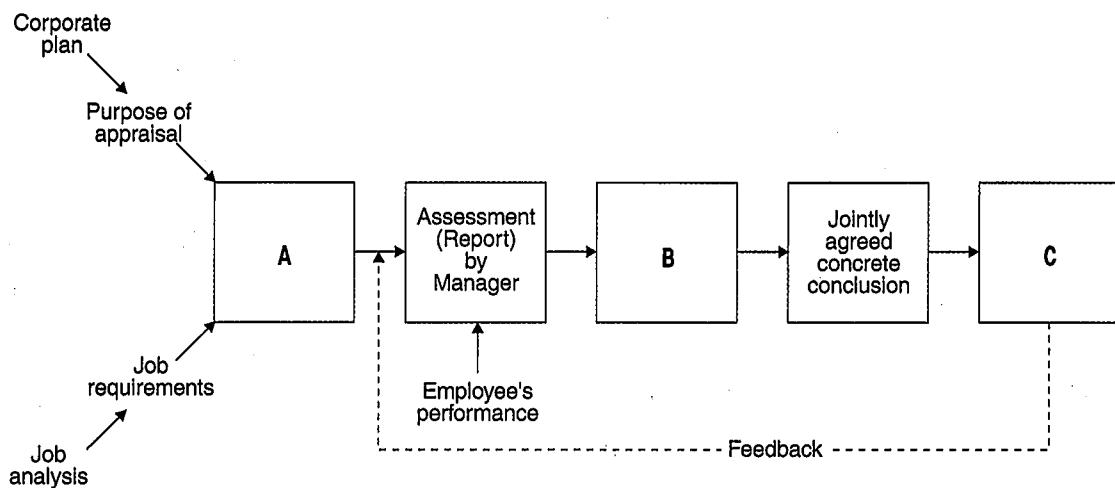

32.20 Comfy Dentistry, a large dental practice, is concerned with the security of its patient records. The manager amends the disciplinary rules of the practice, so that unauthorised disclosure of data by personnel can be made grounds for dismissal.

What type of approach to data security does this reflect?

- Correction
- Detection
- Threat avoidance
- Deterrence

(2 marks)

-
- 33.2 At a chocolate manufacturing company, one of the production mixers has recently been made redundant. Fellow shop-floor staff are outraged: he was 'the only one who knew anything about chocolate' and they had relied on his judgement for years. Protests are ignored. A week later, cement is found in a batch of crunchy bars. Two weeks later, staff refuse to work overtime. The mixer is finally reinstated.

Which TWO types of power are illustrated in this scenario by the mixer and the shop floor staff?

- Position power
- Expert power
- Personal power
- Negative power

(2 marks)

33.3 In a particular work team, Jemima is acknowledged to be the 'ideas' person who 'thinks outside the box' with creative solutions to difficult problems. However, she tends to look at the big picture, not at the details. Frank spots the gaps in Jemima's suggestions, and encourages the team to consider other options.

Match each character in this scenario with the role that they occupy in Belbin's team role model.

Characters	Roles	
(i) Jemima	(1) Monitor-Evaluator	
(ii) Frank	(2) Team worker	
	(3) Plant	(2 marks)

33.4 Which of the following statements about outsourcing is true?

- In order to maintain control, the organisation should outsource activities in areas of its own core competence.
- Outsourcing to external contractors harnesses specialist expertise, but at the cost of lost economies of scale.
- Outsourcing carries commercial and reputational risks. (1 mark)

33.5 Victor Vroom's 'expectancy theory' is an example of which type of motivational theory?

- Content theory
- Process theory
- Hierarchy theory (1 mark)

33.6 In the context of improving organisational communication, which of the following would be helpful measures in addressing the problem of information overload on managers?

- Using email.
- Introducing reporting by exception
- Holding regular staff meetings
- Speed reading training for managers (2 marks)

33.7 Which of the following is represented by Blake and Mouton's managerial grid?

- The balance in a manager's leadership style between concern for the task and concern for people and relationships
- The success of a manager's performance, for the purposes of appraisal
- A manager's position on the continuum between concern for task and concern for people and relationships
- A matrix organisation structure, combining functional and line authority (2 marks)

33.8 In the context of selection interviewing, which TWO of the following types of question might you use to pin down a candidate who seems reluctant or unable to give a definite answer?

- Open
- Closed
- Leading
- Probing

(2 marks)

33.9 In the context of motivation, workers may have the attitude that work is not an end in itself, but a means to other ends, through earning financial rewards.

What term is given to this attitude?

- Theory Y
- Job enrichment
- Instrumental orientation

(1 mark)

33.10 In the context of performance appraisal, what does the term 'tell and listen' refer to?

- An approach to appraisal interviewing
- An approach to upward appraisal
- A barrier to effective appraisal

(1 mark)

33.11 Which of the following statements about training and development is false?

- A gap between current performance and required performance is a learning gap which requires training.
- Training and development activities can have measurable benefits for organisations.
- Education may form part of training, which in turn may form part of employee development.
- A 'learning organisation' is one which facilitates the learning of all its members.

(2 marks)

33.12 According to the hierarchy of needs (a motivational theory put forward by Maslow) which TWO of the following rewards might you pursue in order to have your esteem needs satisfied?

- Opportunity to undertake further professional development
- Award of a departmental prize for your performance
- Receiving praise on an achievement from your work team
- Being invited to join colleagues for lunch

(2 marks)

- 33.13 If a team has been functioning for some time, it may grow complacent with its performance, and start to devote more attention to relationship and power issues within the group.

In the group development model, which of the following terms would be used for this stage of the team's development?

- Forming
- Norming
- Dorming
- Storming

(2 marks)

- 33.14 In a typical recruitment and selection process, in what order would the following steps be carried out. Assign each a number in the sequence, from 1 (first) to 5 (last).

- (i) Preparing job descriptions
- (ii) Selection interviewing
- (iii) Reference checking
- (iv) Selection testing
- (v) Preparing person specifications

- 1(i), 2(ii), 3(iii), 4(iv), 5(v)
- 1(ii), 2(iv), 3(i), 4(iii), 5(iv)
- 1(iii), 2(i), 3(v), 4(ii), 5(iv)
- 1(i), 2(v), 3(ii), 4(iv), 5(iii)

(2 marks)

- 33.15 One of the distinctions between coaching and mentoring is that a is not usually the immediate superior of the person being helped.

Which word correctly completes this sentence?

- Coach
- Mentor

(1 mark)

- 33.16 A popular approach to self development is for employees to reflect on work incidents, and assess whether and how they might adjust their behaviour to gain more successful outcomes in future.

On which school of learning theory is this approach based?

- Behaviourist psychology
- Cognitive psychology
- Contingency theory
- Learning styles

(2 marks)

- 33.17 Which TWO of the following factors establish the independence of an internal auditor?
- The auditor's mandatory authority
 - The auditor's involvement in the activities being appraised
 - The auditor's own professionalism
 - The auditor's freedom from accountability
- (2 marks)
-
- 33.18 A manager is coming up to retirement in a year's time. In which of the following circumstances would the organisation be most likely to consider external recruitment, rather than internal promotion, to fill the position?
- The organisation has a policy of staff development and succession planning
 - The organisation is looking to introduce a culture of innovation for the first time
 - The organisation has a very strong managerial culture, which it wishes to preserve
- (1 mark)
-
- 33.19 In which of the following areas is there an advantage to using formal off-the-job training courses as opposed to on-the-job or experiential learning methods?
- Level of risk for acquiring new skills
 - Relevance of learning to the job
 - Application of learning to the job
 - Continuity of work effort
- (2 marks)
-
- 33.20 occurs when a person is penalised for giving information or taking action in pursuit of a claim of discrimination.
- Which word or words correctly complete this statement?
-
- ▼

- 33.21 Which of the following would be considered a potentially sensitive or negative element of an effective equal opportunities policy?
- Flexible working and career break programmes
 - Monitoring numbers and performance of ethnic minority staff
 - Diverse job interview panels
 - Counselling and disciplinary policies on discrimination
- (2 marks)
-

- 33.22 Which of the following checks would the external audit function be responsible for?
- Separation of duties for independent proving of work
 - Arithmetic checks on the accuracy of data recording and calculation
 - Creating and preserving records that confirm accounting entries
 - Considering whether directors act on internal audit information
- (2 marks)
-
- 33.23 The effectiveness of training programmes can be evaluated using a five-level model by Hamblin. Assign the correct number from 1 to 5 to each of the following levels.
- (i) Ultimate value
 - (ii) Changes in job behaviour
 - (iii) Trainee reactions
 - (iv) Trainee learning
 - (v) Impact on organisational results
- 1(i), 2(ii), 3(iii), 4(iv), 5(v)
 - 1(iii), 2(iv), 3(ii), 4(v), 5(i)
 - 1(ii), 2(iii), 3(iv), 4(i), 5(v)
 - 1(iii), 2(i), 3(v), 4(ii), 5(iv)
- (2 marks)
-
- 33.24 In the context of data security, which TWO of the following are examples of physical access controls to protect computer equipment or data storage media?
- Card entry systems
 - Back-up controls
 - Personal identification numbers
 - Logical access systems
- (2 marks)
-
- 33.25 An organisation's employees are one of its connected stakeholders.
- True
 - False
- (1 mark)
-

(Total = 42 marks)

Answers

1 Business organisations and their stakeholders

1.1 Goals

Rationale: Collective goals or aims are a feature of organisations.

Pitfalls: Watch out for closely related terminology like 'goals' and 'tactics'. You might have thought 'tactics' would fit here, but they are the lower level plans of functions: they may not be shared by the organisation as a whole.

Ways in: If you didn't know the definition, you could have got to the answer by ruling out the other options. Stakeholders doesn't fit 'pursues'; profits are not the objective of all organisations; and tactics are at a lower level than goals.

1.2 Synergy

Rationale: Synergy is the $2 + 2 = 5$ factor, and is one of the key reasons for the formation of teams and organisations.

Pitfalls: You need to read all the options carefully, especially if they look similar and all 'sound' plausible.

Ways in: You should be able to define the other options, to confirm that they do not fit the definition given.

1.3 For organisations that have limited company status, ownership and control are legally separate.

Rationale: In a limited company, the owners (shareholders) are separate from the managers of the concern (board of directors).

Pitfalls: Some options look plausible because of the wording. 'Limited' doesn't mean 'only being allowed to trade up to' – but looks as if it might. The second half of the statement about partnerships is true – but this doesn't mean that the first half is also true.

Ways in: You should have been able to rule out A (no company's turnover is limited), C (sole traders do have personal liability for debts: they do not have 'limited liability') and D (ordinary partnerships are different from limited companies).

1.4 A public sector organisation

Rationale: Such an organisation is part of the public sector. The voluntary sector comprises charities and other organisations whose members are volunteers. Private sector comprises non-governmental organisations, such as limited companies.

Pitfalls: Watch out for 'public' and 'private' sector terms – and be able to distinguish clearly between them.

1.5 (1), (2), (3) and (4)

Rationale: All these groups have a legitimate stake in the enterprise: the government, as a regulator; employees, as participants in the business; and environmental pressure group and local residents, because of potential impacts.

Pitfalls: Don't forget external stakeholders!

1.6 Stakeholders who do not have a contractual relationship with the organisation

Rationale: Secondary stakeholders are stakeholders who do **not** have a contractual relationship with the organisation. Primary stakeholders are stakeholders who do have a contractual relationship with the organisation.

1.7 A local authority

Measures such as value for money or efficiency are often used in not-for-profit organisations such as local authorities.

1.8 Co-operative

Rationale: A co-operative is a business which is owned by its workers or customers, who share the profits. Other features include open membership, democratic control, distribution of surplus in proportion to purchases and promotion of education.

2 The business environment

2.1 PEST

Rationale: PEST stands for Political, Economic, Socio-cultural and Technological.

Pitfalls: SWOT (Strengths, Weaknesses, Opportunities, Threats) is a related exercise, as PEST data is fed into the O/T part of the business appraisal.

Ways in: You could eliminate as many distractors as you could identify; SMART (Specific, Measurable, Attainable, Relevant, Time-bounded) refers to objective-setting.

2.2 Offering financial incentives to public officials to use their influence on the organisation's behalf

Rationale: This would be interpreted as corruption. The other options are usually legitimate methods of influence. Although giving lawmakers non-executive directorships may be questionable in some parts of the world, in others like the UK it is perfectly legitimate.

2.3 Demographics

Rationale: The statement defines demographics. Ergonomics is a study of the interaction of humans and their environments (used in design of office equipment and furniture, for example). Psychographics is the study of psychological factors (used in selection testing, for example). Economics is the study of economies.

Ways in: You could eliminate as many distractors as you could define in other ways.

2.4 Technological

Rationale: Virtual organisation is the collaboration of geographically dispersed individuals and teams, specifically using the latest information and communication technology (ICT) enablers: the Internet, web-conferencing and so on.

2.5 Erasure

Rationale: Erasure is also known as the right 'to be forgotten'. Data subjects may request information held about them be destroyed.

Ways in: Think about what the other terms mean. Rectification means to change for errors or misstatements, portability means that the data can be moved.

2.6 Selection for redundancy on the basis of age

Rationale: This constitutes unfair selection for redundancy (on the basis of recent age discrimination legislation): redundancy is potentially fair grounds for dismissal as long as the basis of selection is fair. Misconduct and incompetence are potentially fair grounds: there should be a reasonable attempt at performance or disciplinary management (warnings, training etc). You may have hesitated over marriage to an employee of a key competitor, but this is an example of 'substantial reasons' that would be considered by a tribunal.

Ways in: You could narrow the options by considering that there must be some way for companies to dismiss incompetent or deliberately obstructive employees.

2.7 (1), (2) and (3) only.

Rationale: Increasing diversity has an impact on HR policies in regard to equal opportunity and prevention of discrimination. Falling birth rates creates an aging workforce and skill shortages. All organisations need to take account of environmental regulation and consumerism. An increase in single-member households will impact on some organisations: notably, those which market goods and services to this segment (eg single-serve pack sizes), but the questions said 'most' organisations.

Pitfalls: You need to think through a range of compliance, marketing and skilling issues when appraising socio-cultural factors.

2.8 Government regulation of the industry

Rationale: The other forces are bargaining power of suppliers and rivalry amongst current competitors in the industry.

Pitfalls: The five forces model is basic: you really need to learn the details ...

2.9 Marketing

Rationale: Socio-economic groupings are often the basis on which markets are segmented, so that products/services and marketing messages can be targeted appropriately (to people with the right levels of income, aspiration, education and so on). You might have paused over Human Resources, because social class includes education factors, but the data cannot be used to predict skill availability.

2.10 Procurement

Rationale: Procurement, technology development, HR management and infrastructure are support activities. Inbound and outbound logistics, operations, marketing/sales and service are primary activities.

2.11 Automation and artificial intelligence allow the accountant to focus their time on verifying low-level transactions.

Rationale: Automation and artificial intelligence support the automatic and intelligent processing of transactional information to free the accountant to work on value-adding services rather than focussing on low-level transactions. The other options are all correct statements concerning the impact of technology on the role of accountants.

2.12 Sheila

Steve, Sam, and Sunny all have support roles and the words 'administration' and 'information technology' should have immediately indicated a support role for Steve and Sam. Sunny's procurement role is not so clear cut but the responsibilities for dealing with the suppliers are sufficient to conclude that Sunny also has a support role.

2.13 As early as possible after employment

Rationale: After the first few weeks of employment is incorrect because waiting a few weeks leaves the employee open to risks in those weeks. The other options are incorrect because there is no certainty that the job will be offered or accepted.

2.14 Low switching costs in the market

Rationale: Low switching costs means that it will be easy for customers to change from existing suppliers to a new supplier: this would facilitate entry to the market. The other options should clearly pose difficulties to a new entrant: not yet big enough to benefit from economies of scale (against competitors who are); high start-up costs; high degree of recognition of and loyalty to existing brands.

2.15 Delegating

Rationale: Outsourcing (contracting some of the firm's activities to external providers) and delayering (removing levels of the organisation hierarchy) are strategies for downsizing (reducing the number of staff permanently or directly employed by the firm). Delegating is the process whereby a superior gives a subordinate part of his or her own authority to make decisions.

2.16 Concern with health and diet

Rationale: Health and safety legislation may reflect a cultural trend (increasing expectation of quality of working life, say), but it is a compliance issue. Increasing age of the population is a demographic trend.

2.17 Lifestyle

Rationale: Lifestyle is generally considered a reflection of economic status and conditions, not a determinant of them. (For market segmentation purposes, for example, lifestyle factors are often measured in terms of attitudes, interests and opinions, rather than purely economic factors.)

2.18 False

Rationale: Technological developments, such as automation and artificial intelligence, mean that the role of the accountant and auditor to record and verify day-to-day transactions has become less important as the role switches to more high-level tasks such as report writing.

3 The macro-economic environment

3.1 Exchange rates

Rationale: Exchange rates are a target of monetary policy: government policy on the money supply, the monetary system interest rates, exchange rates and the availability of credit. Fiscal policy is government policy on the three other options.

Pitfalls: This whole syllabus area is full of fine distinctions in terminology, which lend themselves to testing in a Multiple Choice and Objective Testing format.

Ways in: If you knew that there was a distinction between fiscal and monetary policy, you might have identified exchange rates as the only monetary issue.

3.2 The government is running a budget surplus.

Rationale: A budget surplus occurs when a government's income exceeds its expenditure: there is a negative PSNCR or PSDR. When a government's expenditure exceeds its income, so that it must borrow to make up the difference, there is a positive PSNCR and we say that the government is running a budget deficit.

Ways in: If you recognised that a negative PSNC means no borrowing, you might have been able to start eliminating some options ...

3.3 Indirect

Rationale: The definition clearly distinguishes an indirect tax (eg sales tax) from a direct tax, which is paid direct by a person to the Revenue authority (eg income tax, corporation tax, capital gains tax and inheritance tax). Progressive refers to the proportion of income taken by a tax.

3.4 Increasing taxation

Rationale: Increasing taxation lowers demand in the economy because people have less of their own money after tax for consumption or saving/investment. Increasing public expenditure should increase the level of consumer demand. Decreasing taxation has the opposite effect. Lowering interest rates should stimulate investment (by companies) and consumer expenditure, even if only after a time lag.

3.5 A reduction in the rate of cost push inflation

Rationale: An increase in the exchange rate makes a country's exports more expensive to overseas buyers, and imports cheaper: it therefore has the opposite of the first three effects. The lower cost of imports, however, is likely to reduce the rate of domestic inflation.

Pitfalls: The permutations of increases/decreases in interest rate can be confusing: ensure that the logic makes sense to you!

Ways in: You could group the second and third options together (increased cost = reduce demand): since both cannot be the answer, and there is only one answer, neither of these options can be correct. This gets you quite a long way towards the solution ... So if you don't know an answer, don't panic: logic can often help!

3.6 Subsidies for exporters

Rationale: Subsidies for exporters will encourage domestic exports, but will not help to protect domestic producers against overseas producers. The other options are tariff (taxes and duties on goods entering the country) and non-tariff barriers to trade.

3.7 Frictional unemployment will be short term: True

Governments can encourage labour mobility if they want to reduce unemployment: True

Rationale: Frictional unemployment occurs when there is difficulty in matching workers quickly with jobs. This means that frictional unemployment is temporary and short term. A government can encourage labour mobility by offering individuals financial assistance with relocation expenses and by improving the flow of information on vacancies.

3.8 Interest rates, exchange rates

Rationale: Government policy on taxation, public spending and public borrowing relates to fiscal policy. Government policy on interest rates and exchange rates are part of the monetary policy.

3.9 An organisation which has a large number of long-term payables

Rationale: Debts lose 'real' value with inflation: a company that owes a lot of money would effectively pay less (in real terms) over time. The other organisations would suffer because: inflation would make exports relatively expensive and imports relatively cheap; business might be lost due to price rises; and the cost of implementing price changes would be high.

3.10 Encouraging economic growth, low unemployment, achievement of a balance between exports and imports

Rationale: The four main objectives of macroeconomic policy relate to economic growth, stable (not zero) inflation, unemployment and the balance of payments (balance between exports and imports).

3.11 Recession in the building industry

Rationale: Recession is part of the business cycle: demand for output and jobs falls, and unemployment rises until recovery is well under way. The first option is an example of frictional unemployment; the second option is seasonal unemployment; the third option is technological unemployment.

Pitfalls: It is easy to confuse cyclical with seasonal unemployment, or frictional unemployment that occurs on a seasonal basis. You need to associate cyclical employment firmly with **business** cycles.

3.12 Current.

Rationale: It is particularly tempting to equate a trade surplus or deficit with a 'profit' or 'loss' for the country, but this is not the case.

3.13 Northland

Rationale: Stagflation occurs when economic growth (defined by the change in national income in a period) is low or negative, and inflation is high. So the relevant figures are percentage change in GDP and change in consumer prices. Northland and Eastland both experienced negative growth, however, Northland had a high level of price inflation as well.

3.14 Potential.

Rationale: Potential growth is the rate at which the economy would grow if all resources were utilised; it is therefore determined by factors in the capacity of the economy (supply side), such as increases in the amount of resources available, or in the productivity or resources. Actual growth is determined both by growth in output (supply side) and aggregate demand (demand side).

4 Micro-economic factors

4.1 Allocates resources

Rationale: In a free market economy, it is the interaction of supply and demand through the price mechanism that determines what should be produced and who should get it.

4.2 Marginal cost curve above the average variable cost curve

Rationale: The supply curve for a perfectly competitive firm is its marginal cost curve above the average variable cost curve. The firm will not continue to produce if price is less than average variable cost.

4.3 Nothing

Rationale: A minimum price (floor price) only leads to excess supply if it is set higher than the equilibrium price.

4.4 A fall in production costs of the good

Rationale: The other options relate to movements along the supply curve.

4.5 A surplus of the good

Rationale: The effect of price being above the equilibrium (market clearing) price is that supply will extend and demand will contract.

4.6 A rise in the price of overseas holidays

Rationale: A rise in the price of overseas holidays will lead to a movement along the demand curve rather than a shift in the demand curve.

4.7 A fall in the level of household incomes generally

Rationale: Generally, if incomes fall, demand will fall.

4.8 There are four producers exerting considerable influence in the market

Rationale: The first option is one of the conditions for a perfect market, the second is a monopoly and the fourth is monopolistic competition.

4.9 Carpet underlay

Rationale: Carpet underlay is a complement to carpet.

4.10 Holidays

Rationale: An increase in demand for cars will lead to an increase in demand for petrol and tyres. It will not increase the demand for holidays although people may use their cars to go on holiday.

- 4.11 Allocative inefficiency among producers
Rationale: This is a supply-side factor.
- 4.12 A fall in the demand for tea
Rationale: Coffee and tea are substitute products. Thus, a fall in the price of coffee will result in higher demand for coffee and lower demand for its substitute product, tea. The price of tea might therefore fall. Demand for drinking cups is probably insufficiently related to the consumption of coffee to make them a complementary product to coffee. Even so, lower coffee prices would be likely to raise the demand for drinking cups rather than reduce it.
- 4.13 A good for which demand will fall as household income rises
Rationale: The term 'inferior good' is a technical term in economics. An example of such a good might be small 'starter' homes.
- 4.14 The demand curve for flower vases will shift to the left and their price will go down
Rationale: It is assumed that cut flowers and flower vases are complementary goods. The rise in price of cut flowers will have an adverse effect on demand for flower vases, and the demand curve for flower vases will shift to the left. Given no change in supply conditions for vases, the new equilibrium price for vases will be lower.
- 4.15 The demand curve for sea ferry tickets will shift to the right, and their price will go up. More ferry tickets will be sold.
Rationale: As sea ferry tickets and hovercraft tickets are substitute goods, an increase in the price of hovercraft tickets will cause a shift to the right (increase in demand) for sea ferry tickets. Given no change in supply conditions, the consequence will be an increase in the number of sea ferry tickets sold, at a higher price than before.
- 4.16 Item 1 only
Rationale: A fall in the price of sterling would make London hotels cheaper for foreign tourists. A fall in the price of aeroplane tickets would make London cheaper to visit for foreign tourists. Events 2 and 3 would lead to a rise in demand for hotel rooms. In contrast, a fall in the value of the US dollar would make the UK more expensive to visit for US tourists and tourists from other countries where the US dollar is widely used, and demand for hotel rooms in London would fall.
- 4.17 Oligopoly
Rationale: This is an example of oligopoly.
- 4.18 In the longer term, an increase in new building work, the provision of more rented accommodation
Rationale: When rent controls are eased, the effect is similar to raising or removing minimum prices in the rented housing market. We should expect higher rents, more supply of housing, and a closing of the gap between demand for rented housing and supply of rented accommodation. The reverse of the first option should happen, and homelessness should decrease. Given widespread homelessness, it is unlikely that the easing of rent controls will have any effect on demand for owner-occupied dwellings.
- 4.19 All of the above
Rationale: All of the options may cause the demand curve for a resource to shift.
- 4.20 Sales will rise sharply when incomes of households rise
Rationale: The income elasticity of demand measures the responsiveness of demand to changes in consumers' incomes. An 'inferior' good has a negative income elasticity: as incomes fall, more is bought.

4.21 **Answer: 2**

Rationale: Percentage change in quantity = 50%. Percentage change in price = 25%.

4.22 The excess between what consumers are prepared to pay for a good or service, and the prevailing market price

Rationale: Consumer surplus is the excess between what consumers are prepared to pay for a good or service and the prevailing market price they have to pay to purchase it.

4.23 Elastic demand, elastic supply

Rationale: To increase market share requires greater quantities of the firm's products to be both demanded and supplied. To sell more, a firm needs to lower price. For this to be profitable, demand must be elastic. To produce more, supply must also be elastic.

4.24 A more than proportional increase in the quantity of dry white wine purchased

Rationale: Assuming a normal good, a decrease in price results in a greater quantity being demanded. Given that demand is price elastic, the increase in quantity will be proportionally greater than the price fall.

4.25 Ratio of marginal utility to price is equal for each good

Rationale: Imagine you can buy a second car for \$10,000 or buy a bike for \$100 and they both give you the same extra utility. You wouldn't choose to buy the car as you're paying much more to achieve the same utility as you could get from buying the bike. If you get 10 times more utility for one thing compared to another you'd be prepared to pay 10 times more for it.

5 Section A MTQs

5.1 (a) If income elasticity is positive, the commodity is called an inferior good.
False. An inferior good would have negative income elasticity

If two goods are complements, the cross elasticity will be negative.
True

If price elasticity is greater than 1, demand is said to be inelastic.
False. If price elasticity is less than 1, demand is said to be inelastic

Unrelated products would have a cross elasticity of infinity.
False. Unrelated products has a cross elasticity of zero.

(b) An increase in household incomes

An expected future rise in the price of the good
An increase in population

5.2 (a) (1) Wrongful Wrongful dismissal relates to the method of dismissal
(2) Neither This dismissal would not be classified as unfair or wrongful
(3) Unfair This dismissal is unfair to the employee
(4) Unfair This dismissal is unfair to the employee

(b) In the event of redundancy, an employee with one year's continuous employment is entitled to compensation.

False. There is no entitlement to compensation with less than 2 years' continuous employment.

Redundancy can occur where an employer ceases to carry on business in a particular location. True

- | | | | |
|-----|-----|---|--|
| 5.3 | (a) | (1) Tax incentives for investment | Tax incentives will encourage investment which will increase output capacity |
| | | (2) Forbid takeovers | Forbidding takeover will mean more competitors in an industry and encourages competition |
| | | (3) Equal opportunities legislation | Equal opportunities will positively influence employment |
| | | (4) Product safety standards | Product safety standards will ensure a minimum safety level for consumers |
| | (b) | (1) Fiscal policy
(2) Fiscal policy
(3) Monetary policy
(4) Monetary policy | |
| 5.4 | (a) | (1) Operations
(2) Outbound logistics
(3) Marketing and sales
(4) After sales service | |
| | (b) | There is a lack of substitute products available and the product supplied is highly differentiated. | If there are a lack of substitutes then the customer has less choice of suppliers and similarly if the product is highly differentiated. |
| 5.5 | (a) | (1) $12.5\% / -5\% = -2.5$
(2) $-2.5\% / -5\% = +0.5$
(3) Since the cross elasticity of demand is positive, the products are substitutes. | |
| | (b) | Downwards. An inferior good still has a downward sloping demand curve, but less of the product is demanded when incomes rise. | |
| 5.6 | (a) | They are aimed at promoting social, political or environmental change, they often raise funds through donations and they are measured in terms of effectiveness and efficiency. | The description 'NGO' generally applies to groups whose primary aim is not a commercial one, aimed at promoting social, political or environmental change. NGOs are not necessarily charities, although they tend to raise funds through donations. They are measured in terms of effectiveness and efficiency, rather than customer satisfaction or profit targets. |
| | (b) | VFM. NCOs are measured on their effectiveness and efficiency in how they manage their resources – 'value for money' | |

6 Business organisation, structure and strategy

- 6.1 An organisation chart can indicate functional authority but not line authority within a business.

Rationale: Line authority can easily be shown on the organisation chart.

Pitfalls: You may have hesitated if you didn't know the difference between functional authority (where an expert department has authority over the activities of other departments in the areas of its expertise eg the HR department setting recruitment policy for the sales and production departments) and line authority (direct authority flowing down the chain of command). However, you only needed to know the meaning of line authority to see that the statement was untrue.

Ways in: You may have paused to ask whether an organisation chart can improve internal communications, but it does in one key way: by highlighting the length and complexity of lines of communication between people who need to co-ordinate their work.

- 6.2 The number of employees directly responsible to a manager

Rationale: This is the definition of span of control: all the others are distractors.

Pitfalls: All the distractors are plausible: note the need to think them through carefully. The first option is close to the correct definition – but if you think about it, the number of subordinate employees includes all those below the manager, whereas span of control is direct reports only.

- 6.3 Support base

Rationale: Support base is not one of Mintzberg's components of organisation structure: the other correct terms are middle line and support staff.

Pitfalls: The basic terminology of well-known models is must-learn material!

- 6.4 Divisionalisation

Rationale: While there may be elements of functional and geographical organisation, Y plc's situation suits divisionalisation: more or less autonomous product and regional businesses, with co-ordination from head office. 'Diversification' and 'acquisition' are good pointers to divisionalisation.

Pitfalls: Don't get sidetracked by the link between 'overseas markets' and 'geographical'.

- 6.5 Unity of command

Rationale: Matrix organisation is based on dual command: the classical principle of unity of command is 'one person, one boss'.

- 6.6 Managers in positions of authority generally cannot be part of the informal organisation.

Rationale: The first option A is a fact. The second option is true, because of informal 'short cuts' which are often developed and shared, by-passing health and safety rules and procedures. The third option is true, because the 'grapevine' encourages knowledge sharing and multi-directional communication. The fourth option is not true: managers can feed information into the grapevine and be part of their own informal networks.

- 6.7 Senior managers can take a wider view of problems and consequences

Rationale: A centralised organisation is one in which authority is concentrated in one place. If all decisions are made in the same place then it will be easier for the decision-makers to see the 'bigger picture' and therefore understand the consequences of their decisions. The first two options are advantages of decentralisation, where decisions are delegated.

6.8 Statement (1) only

Rationale: Statement (2) is not true, because the informal organisation has its own agenda. Statement (3) is not true, because a strong informal organisation with its own agenda can undermine the formal organisation: create damaging rumours, safety/quality shortcuts, distractions from task goals etc.

6.9 Boundaryless organisation

Rationale: This describes a boundaryless organisation. A hollow organisation splits people and activities into core and non-core. In modular organisations different elements or components of the product or service the organisation produces are outsourced to different suppliers. In a jobless structure the employee becomes not a job-holder but a seller of skills.

6.10 Statements (1) and (2) only

Rationale: The shared service centre is created within the organisation and is a part of it, although its relationship is similar to that of an external service provider.

7 Organisational culture and committees

7.1 Role culture

Rationale: The role culture is a bureaucratic or mechanistic culture, as described in the scenario. Task culture is project-focused; existential culture is person-focused; and power culture is leader-focused.

Pitfalls: If you didn't know Harrison's model well, you might have confused 'focus on the task' (see in the scenario) with a task culture, or the strong central leadership with a 'power' culture.

7.2 Strong values are dangerous if they filter out 'uncomfortable' environmental information

Rationale: This is a problem with strong cultures (and ultra-cohesive groups).

Pitfalls: The other statements are plausible: you need to come up with counter-arguments to show that they are not always true. B is most plausible because it makes a limited claim that values 'can' replace rules: think of health and safety or financial controls, however, to disprove the claim.

Ways in: You could rule out two of the statements because they are dogmatic (so that just one counter-example would make them untrue).

7.3 Category of people.

Rationale: There are many spheres of culture: nation, ethnic group and social class are only three of them. 'Culture' applies to categories of people including genders, social classes and organisations.

7.4 Acquisitive/giving

Rationale: The fourth dimension in Hofstede's model is masculinity-femininity.

7.5 Assumptions

Rationale: Assumptions are foundational ideas that are no longer even consciously recognised or questioned by the culture, but which 'programme' its ways of thinking and behaving. Values and beliefs are the next level up: they are consciously held concepts which give meaning to the next level up again – observable factors such as rituals, artefacts and behaviour.

7.6 Schein

Rationale: This is just a case of learning who is associated with which theory and definition.

7.7 Masculinity – femininity

Rationale: Make sure that you learn the distinctions between the cultural dimensions.

7.8 (2) and (3) only

Rationale: R & D tends to be concerned with product research (not market research), and many organisations have internal R & D functions.

Pitfalls: Be aware of the difference between product and market research.

Ways in: If you were able to rule out statement (1), you were only left with two options to choose from – and you should be able to rule out statement (4) if you know any organisations with an internal R & D department, leaving you with the correct option.

7.9 Intangibility.

Rationale: Intangibility refers to the fact that there are no material or physical aspects to a service: physical elements help to reduce this effect, and make the provision concrete for the customer. Inseparability and perishability refer to the fact that services are created and consumed at the same time: they cannot be stored – and pose challenges to demand forecasting and scheduling. Variability refers to the fact that services are specific to the situation and cannot easily be standardised.

Ways in: What do physical elements do for a customer purchasing eg a train ride or legal advice? If you knew the meaning of the term 'intangible', the answer to this question would get you to the correct answer.

7.10 Sales

Rationale: A sales orientation assumes that customers must be persuaded to buy the products that the firm produces. A production orientation assumes that customer will buy whatever is produced: the focus of the firm is on meeting demand. A marketing orientation seeks to determine the needs, wants and values of customers and to produce what customers want to buy.

Pitfalls: Don't confuse selling and marketing!

7.11 (1) and (3)

Rationale: HRM is concerned with the most effective use of human resources. It deals with staffing levels, motivation, employee relations and employee services. It is the marketing function which manages an organisation's relationship with its customers, not HRM. Note that increasingly, HRM is undertaken by line managers as well or instead of HR departments.

7.12 Standing committee

Rationale: A standing committee is formed for a particular purpose on a permanent basis. Joint committees are formed to co-ordinate the activities of two or more committees: they need not be permanent. Task forces are specifically not permanent: they fulfil their allocated task and then wind up.

Pitfalls: The confusion of related terminology is often the target of testing.

7.13 Josh

Rationale: HR and line departments generally provide details of salary/wage rates, time sheets etc – but the finance department generally administers payroll, so Josh is likely to be responsible.

7.14 Both (1) and (2)

Rationale: Time, expense and compromise decisions are some of the disadvantages of a committee so Paul is correct. There are, however, many advantages to committees as well.

7.15 Lesley

Rationale: Diane and Joanne work at operational level as they are concerned with routine activities. Lesley is at an intermediate level and is managing resources. She is therefore part of tactical management. Tracey is concerned with direction setting for the business and is therefore part of strategic management.

7.16 Low masculinity

Rationale: Low masculinity (or femininity) is about high regard for values such as focus on relationships and quality of working life, and the acceptability of such values for both men and women: Mr Q's nurturing style would score on this dimension. His approach does not really say anything about power-distance (command-and-control v delegation-and-involvement). There are elements of uncertainty-avoidance in his attempt to minimise staff insecurity – but this would be high UA, not low UA.

Pitfalls: Don't confuse the masculine/feminine dimension with straightforward gender stereotypes!

7.17 Mutual dependency

Rationale: Dependency increases stakeholder power and creates risks and constraints. A buyer would not necessarily want a supplier to be dependent on its business (for ethical reasons), any more than it would want to be dependent on a supplier (for bargaining and supply risk reasons).

Pitfalls: You may have hesitated over information-sharing, because of intellectual property and confidentiality issues – but it is necessary for high-interest, high-power 'key players'.

7.18 Janet only

Rationale: Internal stakeholders include employees and management and so Janet is the only internal stakeholder. Customers and suppliers (like Mary at P Co) are connected stakeholders. Pressure groups such as D Group are external stakeholders.

7.19 Giving a ruling on matters in dispute

Rationale: All the other options are duties of the Committee secretary.

7.20 Committee secretary

Rationale: You should have been able to rule out the chair of a committee. An ordinary committee member will receive communications, not produce them.

7.21 Ascertaining whether specific matters fall within the terms of reference of the committee

Rationale: The Secretary does not agree the minutes, and may indeed sometimes not be a committee member at all.

7.22 Standing committees

Rationale: Ad hoc committees are non-permanent committees, often formed for a particular purpose. The terms 'management committee' and 'executive committee' are generally interchangeable. They refer to the committee of executives that will meet regularly to formulate, implement and review operational matters. In a large company, they usually include the two or three executives who serve as executive directors as well as other senior managers who are not executive directors. Standing committees are a permanent feature of the governance of a company and include the audit committee and the remuneration committee (larger companies also have a nomination committee and perhaps a risk committee). Standing committees meet regularly (though not necessarily monthly).

8 Corporate governance and social responsibility

8.1 (3) only

Rationale: Statement (1) is incorrect, because there is no such 'guarantee'; statement (2) because it is not necessarily so, and statement (4) because other organisations (eg charities, government bodies) are often more concerned with social responsibility than businesses.

Ways in: It is always worth checking to see if logic helps. Words like 'guarantee' often signal an untrue statement, because they make such extreme claims. And if statement (1) is therefore incorrect, you've halved your options. It should then be obvious that (4) is incorrect (if you think about a hospital, say).

8.2 Agency theory

Rationale: Agency theory suggests that managers will look after the performance of the company if doing so serves their own interests: hence performance incentives and rewards. Stewardship theory views the managers as stewards of the assets of the firm. Stakeholder theory argues that managers have a duty of care to a range of organisational shareholders.

Ways in: You could have ruled out stakeholder theory as irrelevant, and then worked on the implications of stewardship and agency.

8.3 Maximising shareholder wealth

Rationale: The objective of corporate governance is overall performance, enhanced by good supervision and management, within best practice guidelines. Business is to be conducted in a way that is both ethical and effective from the perspective of all stakeholders – not just shareholders.

8.4 Strategic importance

Rationale: Corporate governance includes the selection of senior officers (with influence over the future direction of the organisation), and relationships between the organisation and its key stakeholders. It is therefore regarded as being of strategic importance.

8.5 Domination of the board by a single individual

Rationale: This is a feature of poor corporate governance because it makes way for self-interested decision-making. The others may 'look' like negatives, but are in fact the opposites of three other features of poor corporate governance: lack of independent scrutiny; lack of supervision; and an emphasis on short-term profitability (which can cause pressure to conceal problems or manipulate accounts).

Ways in: You could have got to the answer with logic, with a sound grasp of corporate governance – but it would be worth learning the list of features of poor corporate governance, so you can recognise them in an exam question.

8.6 The board of directors

Rationale: These are some of the roles fulfilled by the board. The audit committee reviews financial statements, audit procedures, internal controls and risk management. The Public Oversight Board monitors and enforces legal and compliance standards. The nomination committee oversees the process for board appointments.

Pitfalls: You need to be able to distinguish clearly between all the various participants in the corporate governance system.

Ways in: Strategy formulation should have steered you towards the correct answer.

- 8.7 (1), (2) and (4) only

Rationale: Professional ethics concern the individual ethical sphere, not the wider sphere of Corporate Social Responsibility which operates at the level of the firm. All of the others are CSR principles: human rights as a component of ethical trading and investment; employee welfare as part of ethical employment; and support for local suppliers as an example of sustainability.

Pitfalls: The combinations were designed to test if your thinking was limited to internal organisational matters or commercial matters.

- 8.8 Corporate social responsibility

Rationale: Employment protection is just one example of an area which is subject to law. Corporate governance is an area which is subject to codes of best practice (and law in some countries). CSR is therefore the area subject to least regulation and most managerial discretion.

- 8.9 To provide guidance on the standards of the best practice that companies should adopt

Rationale: Codes of practice are usually associated with a principles-based approach (rather than a rules-based approach) and so the first two options should have been easily eliminated. The words 'guidance' and 'should adopt' were the key words to lead to the correct option.

- 8.10 A remuneration committee made up of independent non-executive directors

Rationale: Only this option fulfils the requirement for full independence of the body that sets directors' remuneration (to avoid directors' awarding themselves unjustifiable rewards!). A nomination committee has the separate task of overseeing board appointments.

- 8.11 To set out the directors' analysis of the business, in order to provide investors with a historical and prospective view through the eyes of management.

Rationale: This is the definition used by the Accounting Standards Board. The third option is another corporate governance report that may be required. The first option is just a distractor.

- 8.12 (1), (2) and (3)

Rationale: 4 is incorrect and can actually be problematic for non-executive directors. Non-executive directors often have limited time to devote to the role as they are likely to have other time consuming commitments.

9 Section B MTQs

- 9.1 (a) (i) Sales orientation
(ii) Product orientation. Adding additional features but without actually researching what customers want is product orientation, which is a variant of production orientation.
(iii) Production orientation
(iv) Marketing orientation
(b) This is known as market segmentation.

- 9.2 (a) (1) Corporate Corporate strategy is concerned with what types of business the organization is in.
- (2) Business Business strategy is how an organisation approaches a particular market area.
- (3) Operational This relates to a functional decision and therefore is at the operational level.
- (4) Business Business strategy is how an organisation approaches a particular market area.
- (b) Managers are able to take a wider view, procedures and documentation can be standardised. The other statements are advantages of decentralisation or delegation.
- 9.3 (a) (i) This company has a high individualism culture.
 (ii) This company has a high uncertainty avoidance culture.
 (iii) This company has a low masculinity culture.
 (iv) This company has a low power distance culture.
- (b) (i) Attitudes are patterns of collective behaviour such as greeting styles, business formalities, social courtesies and ceremonies.
 (ii) Artefacts are concrete expressions such as architecture and interior design, dress code and symbols.
- 9.4 (a) (1) Support staff Support staff provide ancillary services.
 (2) Operating core Production is part of the operating core, taking inputs and converting them into outputs.
 (3) Middle line Middle managers such as a production manager form the middle line of an organisation.
 (4) Strategic apex The board would form the strategic apex of the organisation.
- (b) Technostructure
 Machine bureaucracies are characterised by multiple layers of management, formal (often rigid) procedures and standardised production processes, so the technostructure is very important
- 9.5 (a) Arranging an overdraft Treasury department
 Managing foreign currency exposure Treasury department
 Recording financial transactions Financial accounting department
 Cash budgeting Treasury department
 Reporting to shareholders Financial accounting department
 Repaying loans Treasury department
 The treasury department plans and controls the sources and uses of funds by the organisation.
 (b) Money markets are markets for trading short-term financial instruments.
- 9.6 (a) (i) To define the purpose of the company
 (ii) To define the values by which the company will perform its daily duties
 (iii) To identify the stakeholders relevant to the company
 (iv) To develop a strategy combining these factors
 (v) To ensure implementation of this strategy
- (b) Chairing management committee meetings. Chairing management committee meetings is part of the usual responsibilities of the CEO.

10 The role of accounting

- 10.1 To provide financial information to users of such information
Rationale: This is the main or overall aim of accounting.
- 10.2 Charities and professional bodies do not have to produce financial statements in the same way as businesses.
Rationale: Non-commercial undertakings still prepare annual financial statements, for accountability to their trustees, members or funding bodies.
- 10.3 The Management Accountant
Rationale: The Management Accountant provides information for management: cost accounting, budgets and budgetary control and financial management of projects. The Financial Controller is responsible for routine accounting, accounting reports, cashiers' duties and cash control. A Treasurer would be responsible for treasury management: raising and investing funds and cash flow control.
- 10.4 Time sheets
Rationale: Time sheets are used to calculate hours worked and overtime, in order to calculate gross pay (before deductions). The system information for management (payroll analysis), information for employees (pay slips) and methods of payment (credit transfer forms), are all outputs.
Pitfalls: It is worth sorting out the inputs, processing and outputs of any financial system.
- 10.5 To ensure that all credit notes received are recorded in the general and payables ledger
Rationale: All the other aims relate to the control system relating to receivables and sales.
Pitfalls: You have to get straight in your mind which transactions and controls relate to payables/purchases and which to receivables/sales.
- 10.6 A true and fair view of the statement of affairs of the company as at the end of the financial year
Rationale: The first option refers to the statement of profit or loss, not the statement of financial position. The second option refers to audit reports.
Pitfalls: If you were in a hurry, you might have selected the first option immediately you saw the words 'true and fair'. Avoid such mistakes by reading through all question options carefully, keeping an open mind.
- 10.7 Specialised capabilities
Rationale: An integrated package is expected to do everything, so it may have fewer facilities than specialised modules (especially as it also requires more computer memory). The other options are advantages of integration: ability to update multiple records from one data entry; ability to extract data from all relevant sources to compile specified reports; and less likelihood of discrepancies in different records.
- 10.8 Module.
Rationale: A suite is a set of several modules. A spreadsheet is a type of program, and a format for displaying and processing data: it is often used to integrate data from accounting modules for decision-support and management information systems. A database is a collection of data.
- 10.9 There is much stronger provision for data security
Rationale: There is no scope for data in manual systems to be affected by cyber-attacks and they are not vulnerable to corruption or loss of data through user error.

- 10.10 Automatic correction of all data entered by the operator into the spreadsheet
Rationale: Unfortunately: 'garbage in, garbage out'...
- 10.11 National legislation
Rationale: Mandatory reports to government and shareholders are required under national legislation. Codes of corporate governance are principles-based and voluntary in nature. International and local Accounting Standards do affect the content and presentation of accounts but it is national legislation which dictates the requirements for preparation and filing of accounts
- 10.12 1A computer-based accounting system will always reject inaccurate financial information input to the system's database
Rationale: 'Garbage in, garbage out'!
- 10.13 The analysis of those items where performance differs significantly from standard or budget
Rationale: Exception reporting focuses attention on those items where performance differs significantly from standard or budget.
Pitfalls: The word 'exceptional' was placed in other options as a distractor!
- 10.14 This company's computer system does not receive email from customers or suppliers
Rationale: Back-up storage, virus detection software and password protection are basic security requirements of any computer system, regardless of whether they are connected to the Internet. Because this system is not so connected, however, it cannot receive email.
Pitfalls: Make sure you distinguish between intranet (internal network) and Internet (world wide network), and read questions carefully to see which is being discussed.
- 10.15 Executive Support
Rationale: This is the definition of an Executive Support System. It is distinguished from a DSS by supporting decision-making at a higher and less structured level. Expert systems draw on a knowledge base to solve well-defined technical problems.
Pitfalls: 'Management', 'Expert' and 'Decision' were plausible distractors: make sure you can distinguish between the different types of system, and how they contribute to decision-making and problem solving.
- 10.16 Data is always in numerical form whereas information is always in text form.
Rationale: Data is any kind of unprocessed information, and information is any kind of processed information.
- 10.17 Database management system
Rationale: The database management system (DBMS) is the software that builds, manages and provides access to a database. Data storage is carried out in the database itself. The database administrator is a person (not a part of the system) who controls the system. EPOS is a form of data collection and input.
- 10.18 Loss or corruption of data is almost always non-deliberate.
Rationale: Data can be lost or corrupted as the result of deliberate actions such as fraud, sabotage, commercial espionage or malicious damage – as well as human error. The other statements are true: new staff pose a security risk because of the risk of human error (if they are inexperienced or untrained); it is impossible to prevent all threats (important to be realistic!); and smoke detectors are an example of protection from physical risks (in this case, fire).
Pitfalls: Don't forget physical security measures: you may have discounted the fourth option too quickly. Data security also involves protection against fire, flood, interruption of power source and so on.

10.19 Productivity

Rationale: Office automation systems (OAS), with functions such as word processing, digital filing, email, schedulers and spreadsheets, are primarily designed to streamline administrative tasks: document management, communication, data management.

10.20 Managers of the company

Rationale: Managers need most information, at a significant level of detail, to enable them to make planning and control decisions. They have special access to information, because they can arrange to obtain the information they need through the accounting system. Shareholders are entitled to certain information, focused on particular areas of interest (mainly profits). Financial analysts may only have access to public information and reports.

10.21 The audit committee of the board of directors

Rationale: In order to control the risks of fraud and error, the internal audit department should be separate from the finance department.

10.22 Information and Communication Technology (ICT) systems

Rationale: A quick phone call may be a more efficient way of obtaining or giving information than email, for example. You may have hesitated over the third option because of often-stated warnings about 'garbage in, garbage out'. The risks of input error are the same – but computerised systems reduce the further risk of computation errors.

10.23 Purchasing/procurement

Rationale: The purchasing or procurement function is responsible for authorising purchases (and suppliers) and approving. The other functions contribute, however: production, by requisitioning only needed items; goods inwards, by checking that what was purchased is what is in fact received; and accounts, by seeking proper documentary evidence and authorisation for payment.

10.24 The credit control department

Rationale: This should be obvious from the context (debts represent goods bought on credit: hence, credit control) – but make sure that you could define the roles of all the other options, if you needed to!

10.25 IFAC

Rationale: IFAC is the International Federation of Accountants. It produces an ethical code but it is not part of the regulatory system.

10.26 IASB

Rationale: International Financial Reporting Standards are issued by the IASB.

10.27 National legislation

Rationale: Of the choices offered, only national legislation is entirely legally binding, though elements of all of the distractors may be accepted and incorporated in legislation subsequent to the publication of the standards and principles.

11 Control, security and audit

11.1 To eliminate the possibility of impacts from poor judgement and human error

Rationale: The other options were identified as aims of internal controls in the Turnbull report. However, the report also states that even a sound system of internal control reduces, but does not eliminate, the possibilities of poorly judged decisions, human error, deliberate circumvention of controls and unforeseeable circumstances. Systems only provide reasonable (not absolute) assurance.

Ways In: If you had to guess, you could probably see that the correct answer is an exaggerated claim. Look out for options that say 'always' or 'never' or 'total', in a similar vein: these are much more likely to be untrue than true, in the complex world of business...

11.2 Non-discretionary.

Rationale: Non-discretionary controls are as described: as opposed to discretionary controls which are subject to human choice. 'Mandated' is a similar idea, but mandated controls are required by law and imposed by external authorities (as opposed to voluntary controls, chosen by the organisation). Detect controls are controls designed to detect errors once they have happened. Administrative controls are to do with reporting responsibilities, communication channels and other means of implementing policies.

Pitfalls: There is so much terminology in this area: fertile ground for exam questions. Be able to use distinctions within classifications (as in 'discretionary and non-discretionary', or 'prevent, detect, control') as well as across classifications, as in this question.

11.3 Organisation

Rationale: Organisation in this context means identifying reporting lines, levels of authority and responsibility to ensure that everyone is aware of their control responsibilities. The full mnemonic stands for: Segregation of duties; Physical; Authorisation and approval; Management; Supervision; Organisation; Arithmetical and accounting; and Personnel.

11.4 Systems for authorising transactions within specified spending limits

Rationale: This is an internal control, rather than an internal check. Internal checks are more about dividing work (so that the work of one person can be independently proved by that of another) and using 'proof measures' to ensure the accuracy of records and calculations.

11.5 Internal audit is an independent appraisal activity

Rationale: Internal audit is independent, but is still part of the internal control system: it is a control which examines and evaluates the adequacy and efficacy of other controls. Internal auditors should report direct to the audit committee of the board of directors (in order to preserve independence). It is external audit which is for the benefit of shareholders: internal audit is a service to management.

Ways in: Once you realised that the options were circling round different aspects of the definition of internal audit, and the difference between internal and external audit, you would be better able to sort out which statement was given to you 'straight' – and which were opposites of the true points.

11.6 Weather

Rationale: This should be straightforward if you think through what the potential threats involve. Lightning strike or electrical storms are a key cause of power supply failures and surges which may effect computer functions. Fire and accidental damage are also physical threats to data and equipment. Hacking is a non-physical threat involving unauthorised access to data (possibly resulting in data theft or destruction).

11.7 System recovery procedures

Rationale: System recovery procedures are set in place for activation in the event of breakdown, to get the system up and running again: this is a contingency control, because it plans for a 'worst case scenario'. Password access is an example of a **security control**: protecting data from unauthorised modification, disclosure or destruction of data. Audit trails (showing who has accessed a system and what they have done).

Pitfalls: There is a lot of vocabulary and procedure in this area: make sure that you could answer questions on a variety of different data security controls.

11.8 The independence of controls from the method of data processing

Rationale: It would be a limitation if controls **depended** on the method of data processing. The others are limitations, because: the costs of control must not outweigh the benefits; there is always potential for both human error and deliberate override of controls by management; and controls are designed to cope with routine transactions, not non-routine transactions.

11.9 The primary responsibility of external auditors is to investigate financial irregularities and report them to shareholders

Rationale: The primary responsibility of the external auditor is to report to shareholders on whether the client's financial statements are accurate and free from bias ('true and fair'). The other options are true.

11.10 To identify errors and omissions in financial records

Rationale: Substantive tests 'substantiate' the figures in the accounts. They are used to discover **whether** figures are correct or complete, not **why** they are incorrect or incomplete, or how the figures 'got there'. Establishing whether internal controls are being applied as prescribed is the aim of **compliance** tests.

11.11 Correct

Rationale: Correct controls are designed to enable the organisation to minimise the effect of errors: in this case, restoring data from the back-ups if the main data store is corrupted. Prevent controls are designed to prevent errors from happening in the first place, and detect controls are designed to detect errors once they have happened.

11.12 Audit trails.

Rationale: Audit trails enable system administrators to maintain security, check transactions (in order to identify errors and fraud), recover lost transactions and monitor the use of network resources. Passwords are access controls and archives are long-term back-up storage: both are good system controls.

Pitfalls: There is lots of terminology in this area: get to grips with all the basic terms and procedures.

11.13 Operational audit

Rationale: A systems audit is based on the testing and evaluation of internal controls. A probity (or transaction) audit checks account entries to identify errors or omissions which may indicate fraud. A social audit measures the social responsibility or social impacts of the business.

Pitfalls: This is another area of distinctive clusters of terminology: make sure you can identify operational, systems and transactions audits – and the types of tests they use (compliance v substantive).

11.14 No audit manuals or working papers are available for inspection

Rationale: This may suggest that internal audit work is not properly planned, reviewed or documented: a failure of due professional care. The other options show good status, scope and technical competence.

12 Identifying and preventing fraud

12.1 Teeming and lading

Rationale: Collusion is working with another party (eg customers or suppliers) to commit fraud. Misrepresentation is stating that something is so, when it is not, in order to mislead (eg overstating profits).

12.2 (1), (2), (3) and (4)

Rationale: Payslips can be deliberately miscalculated to pay extra amounts. Staff may collude with customers to under-record quantities of despatched goods on delivery notes so the customer pays less: conversely, employees may collude with suppliers to pay invoices for larger quantities than were actually delivered. Option (4) may have made you hesitate: it seems such a positive, desirable thing! However, profits in excess of target may be siphoned off, with less scrutiny once targets have been met.

12.3 It results in the intentional overstatement of profits and net assets

Rationale: One form of fraud is the intentional misrepresentation of the financial position of the business. Bad debt policy may be unenforced deliberately, in order to overstate profits.

12.4 Pre-disposition

Rationale: This is an important distinction in making sense of the three prerequisites for fraud: dishonesty (a willingness to act dishonestly), motivation (an incentive or reason to act dishonestly) and opportunity (an opening to act dishonestly).

12.5 Increased competition

Rationale: Increased competition is a risk factor (because it may put pressure on managers to manipulate results) – but it is an external factor. The others are internal factors which increase risk because they disrupt supervision and control or introduce unknown factors.

Pitfalls: Look carefully at question stems for qualifier key words such as 'internal' and 'external'.

12.6 Staff not taking their full holiday entitlements

Rationale: This may seem like normal behaviour in a 'workaholic' office culture, but failure to take full holiday entitlement may signal an employee trying to prevent a temporary replacement from uncovering a fraud. The other options are factors in reducing risk: lack of segregation enables fraud to go undetected; low staff morale is often a motive for fraud (in retaliation against the firm); and an autocratic management style may prevent questioning.

Pitfalls: Ensure that you know what 'segregation of duties' means: otherwise, it might look like a risk factor (because it sounds like allowing people to work independently and unsupervised, say).

12.7 Increase in working capital

Rationale: There is a reduction in working capital, which makes it more difficult for the company to operate effectively, potentially resulting in corporate collapse. The other effects should be obvious (remember, we are talking about removal of funds or assets and not overstatement of profits and/or net assets). Reputational damage refers to loss of shareholder and market confidence in the organisation's management when the fraud emerges.

12.8 Requiring signatures to confirm receipt of goods or services

Rationale: This should be clear from the context, because of the collusion with customers (if you remembered what collusion was). Physical security refers to keeping assets under lock and key: not to be dismissed as a fraud prevention measure! Sequential numbering works because it is easy to spot if documents are missing. Authorisation policies increase checks and accountabilities.

12.9 The board of directors.

Rationale: The directors are responsible for the conduct of the business, the deterrence and detection of fraudulent (and other dishonest) conduct, and the reliable reporting of financial information. The responsibility of the external auditor is only to express an opinion on the financial statements, although audit procedures should have a reasonable expectation of detecting misstatements arising from fraud. The audit committee reviews the organisation's performance in fraud prevention, but also reports to the board.

12.10 Inability to secure access to data

Rationale: There are plenty of ways of securing access to data, using available software tools: password protection, encryption and so on. (Of course, the firm has to use them, but that is a separate issue!) Hackers are unauthorised people breaking into the system. Lack of managerial understanding creates loopholes in controls, and the ability to conceal fraud by technical staff. Integrated systems also help to conceal fraud, by ensuring that alterations to records are consistent: fewer discrepancies to trigger investigation.

12.11 Investors and suppliers

Rationale: Investors will be making decisions (and taking risks) on inaccurate information. Suppliers will extend credit without knowing the true financial position of the company. (Staff and customers will eventually be effected if shortfalls in working capital threaten the business ...)

12.12 Fraud awareness training and recruitment controls

Rationale: These are measures for fraud prevention and control. A fraud response plan specifically deals with investigating and dealing with the consequences of identified frauds. This includes taking immediate steps to secure the security of records that will be investigated and launching an investigation into the method and extent of fraud.

12.13 Limitation control

Rationale: Limit controls limit opportunity for fraud: another example is limiting access to the computer network by means of passwords. Segregation of duties means ensuring that functions which **together** facilitate fraud are performed by **different** individuals: eg separating the cheque signing function from the authorisation of payments. Appropriate documentation involves recording, authorising and tracking transactions through purchase requisitions, orders, invoices and so on.

12.14 Performance-based rewards for managers reduce the risk of fraud

Rationale: Performance-based rewards increase pressures and motivation for managers to manipulate results.

Ways in: A good approach for these sorts of question is to work systematically through the options to eliminate those which are clearly true. That way, even if you are left with an option you are not sure about (because performance-related pay for managers is such a popular strategy, say), it is the best option you've got.

12.15 Money laundering.

Rationale: The statement is the definition of money laundering.

12.16 Placement

Rationale: The order is placement, layering and integration.

13 Financial technology (Fintech)

13.1 Big data

Rationale: A company that uses big data for competitive advantage streams vast volumes of data from many internal and external sources, and applies data analytics to obtain value from the data.

13.2 Velocity

Rationale: Velocity concerns the speed of data and is therefore connected to the ability to stream large amounts of data into an organisation's systems in real time. If velocity was not quick enough, the data would be subject to a time-lag which might undermine its usefulness.

13.3 Risk management

Rationale: Data analytics on big data can assist with the identification, quantification and management of business risk. It is not used in connection with the other options.

13.4 Open data

Rationale: Open data originates from the public sector data (for example transport, government financial and public service data). Processed data originates from existing databases of business and other organisations. Machine-generated data originates from fixed and mobile sensors, as well as computer and website logs.

13.5 Users of cloud accounting software are completely reliant on the provider of the software to ensure their data is secure and to take backups of it

Rationale: Users of cloud accounting software are completely reliant on the provider of the software to ensure their data is secure and to take backups of it. The other options are disadvantages of traditional accounting software.

13.6 Distributed ledger

Rationale: Distributed ledger technology allows people who do not know each other to trust a shared record of events.

13.7 Downloading bank transactions into the accounting system

Rationale: Automation allows certain routine procedures to be undertaken without the input of a human (such as the automatic download of bank transactions). The other options are all areas of work that require human input or artificial intelligence.

13.8 Posting transactions to nominal codes

Rationale: Artificial intelligence allows a system to learn certain basic tasks and perform them in future (such as identifying transactions and posting them to appropriate nominal codes). The other options are all areas of work that require human input or simple automation.

13.9 Verify the ownership of assets

Rationale: Distributed ledgers give auditors reassurance about the ownership of assets. They do not reduce the need for an audit opinion or to check for material misstatement.

14 Section C MTQs

- 14.1 (a) (1) To assess the ability of the company to pay its debts
(2) To assess tax payable by the company
(3) Assessing how effectively management is running the company
(4) To advise clients
- Suppliers will want to know whether the company is able to pay its debts.
Tax authorities want to assess whether tax paid is adequate for the level of profits.
Shareholders want to assess the effectiveness of management in performing its stewardship function.
Financial analysts need information to advise investors whether to invest or not.
- (b) False
Charities and public sector organisations also need to prepare accounts.
- (c) A true and fair
True and fair is usually taken to mean accurate and not misleading.
- 14.2 (a) Balancing of accounting entries
Non-discretionary. This control is built in to the system.

Authorisation of non-current asset purchase
Discretionary. This control can be bypassed so is discretionary.

Password access to the system
Non-discretionary. This control is built in to the system.

Review of the audit trail
Discretionary. This control can be bypassed so is discretionary.
- (b) A systems
Operational audits can be concerned with any sphere of a company's activities and a transactions audit aims to detect fraud.
- (c) False
The existence of the controls is not enough. The controls also need to be applied properly and honestly in order for them to be effective.
- 14.3 (a) Processing is faster, Corrections can be made quicker
Information is more accessible in a computerised system and the risk of errors is reduced rather than eradicated.
- (b) Module
This is the definition of a module.
- (c) False
A database should be evolve both in the short term and also the long term.
- 14.4 (a) Door locks, Intruder alarms
These controls are designed to restrict physical access.
- (b) Input control
These are all examples of input controls.
- (c) Contingency
Contingency controls help an organisation recover in the event of a disaster.

- 14.5 (a) (i) Failure to report
By not reporting suspicions of fraud, Stella is committing an offence.
- (ii) Tipping off
By informing the financial controller, James is tipping off the client and may prejudice the investigation.
- (b) (i) Layering
Layering involves the transfer of monies from business to business or place to place to conceal the original source.
- (ii) Placement
Placement is the initial disposal of the proceeds of criminal activity into apparently legitimate business activity or property.
- 14.6 (a) Use of control totals
Internal checks are checks on day to day transactions, where the work of one person is proved independently, or is complementary to the work of another. A control total is a total of any sort, used by comparing it with another total that ought to be the same. The other options in the question are features of the overall internal control system.
- (b) Work relates to the financial statements, and the financial records that underlie them
External audit
Designed to add value and improve an organisation's operations
Internal audit
Enables an opinion to be expressed on the financial statements
External audit
Report is to those charged with governance
Internal audit
Work relates to the operations of the organisation
Internal audit
Independent of the company and its management
External audit

15 Leading and managing people

15.1 Position power

Rationale: Position power is legitimate organisational authority, by virtue of a position in the organisation hierarchy: managers depend largely on it for their influence. Leaders are often required to exercise informal, interpersonal forms of influence, such as person power (charisma, inspiration) and expert power (valued knowledge). Physical power (intimidation) should be used by neither managers nor leaders!

Pitfalls: the classifications of power are a rich source of related terminology, and hence a potential source both of confusion – and of exam questions!

15.2 FW Taylor

Rationale: Frederick Taylor is associated with scientific management. The other writers are associated with the human relations school, focusing on the role of 'higher order' needs (such as challenge and interest in the work) in human motivation.

Ways in: You could halve your options by realising that Maslow and Herzberg belong to the same school: therefore the 'odd one out' must be one of the other two.

15.3 Country club

Rationale: The 'country club' is low-task, high-people focus and 1.9 on Blake and Mouton's managerial grid. This describes Monica. Impoverished is 1.1 (both low), task management is 9.1 (all about the task), and damped pendulum is 5.5 (swinging between the two extremes).

15.4 (1), (2) and (3)

Rationale: Psychologically distant managers (PDMs) maintain distance from their subordinates and they prefer formal procedures rather than informal ones, for example, a formal consultation method.

Ways in: Hopefully you were able to rule out the fourth statement and therefore option D. Psychologically close managers are closer to their subordinates. If you remembered that PDMs prefer formal procedures then you may have been able to work out that statements 1, 2 and 3 were correct.

15.5 Authority

Rationale: The essence of delegation is that the superior gives the subordinate part of his or her own authority. Power is not conferred by the organisation, so it cannot be delegated: it must be possessed. The most important thing to note is that responsibility is not delegated: the superior makes the subordinate responsible to him for the authority he has delegated, but he remains responsible for it to his own boss.

Pitfalls: It is easy to confuse these concepts, which is why they would make an excellent exam question.

15.6 Multi-skilled teamworking

Rationale: Skilling was an important aspect of scientific management – but multi-skilled team working wasn't. Taylor's approach to job design was to break jobs down into single, simple tasks which were given to an individual as a whole (specialised, repetitive) job for an individual. The other options are key techniques.

15.7 Awareness of the importance of group dynamics and worker attitudes as an influence on productivity

Rationale: The second option is not a central concern of human relations: rather, this could apply to the scientific management school. The third option is a contribution of the contingency school. The fourth option has not yet been provided by any school of management or motivation theory: apart from anything else, business success depends on factors other than the productivity of the workers.

15.8 Democratic

Rationale: Democratic is a 'joins' style: decision is more or less by vote or consensus. Consultative means that the leader takes subordinate views into account, but still makes the decision. Autocratic is basically a 'tells' style and persuasive is a 'sells' style.

15.9 Monitor

Rationale: The monitor role involves scanning the environment and gathering information from a network of contacts. As spokesperson, the manager can then provide information on behalf of the department or organisation to interested parties. As disseminator, (s)he can also spread relevant information to team members. The role of leader means hiring, firing and training staff.

Pitfalls: The other options all information roles, so the distinction between them is quite fine. However, questions have been set at this level of detail, so such models are worth learning.

15.10 Supervision.

Rationale: This is the key definition of the supervisory role: it is between non-managerial and managerial, acting as an information filter and overlap (since supervisors both do operational work and fulfil some managerial functions at a low level). Middle line and junior management are higher, since they are already managerial positions.

15.11 It is most popular among subordinates

Rationale: A consultative style is the most popular among subordinates, although a 'sells' style is perceived to be most used by leaders – and a 'tells' style encourages the highest productivity in many circumstances.

15.12 Authority

Rationale: Responsibility is the duty to perform an action. Power is the ability to perform an action (and in particular, to influence others). Influence is a process by which a person can direct or modify the behaviour of another person.

Pitfalls: These are fine distinctions in meaning – but they underpin the idea of management and leadership and are an excellent source of potential exam questions.

15.13 Figurehead

Rationale: Interpersonal roles are based on the manager's formal authority: they include the roles of figurehead, leader and liaison. Informational roles are based on the manager's position in internal and external information networks: they include monitor, spokesperson and disseminator. Decisional roles relate to the work of the manager's department: entrepreneur, disturbance handler, resource allocator and negotiator.

15.14 Contingency theories

Rationale: Contingency theories are based on the belief that there is no 'one best way' of leading but that effective leaders adapt their behaviour to changing variables. Adair's model sees the leadership process in a context made up of the task needs, individuals' needs and group needs.

15.15 Adair's leadership model focuses on what leaders do and not what they are: False

The Ashridge leadership model proposes a democratic approach to leadership: True

Rationale: This is just textbook knowledge. You must ensure that you understand the main principles associated with the management theories in the study text.

15.16 Action-centred leadership

Rationale: This is a description of John Adair's action-centred leadership model. Contingency theory is more general: indeed, Adair's model is within the contingency school of thought. The managerial grid is based on two dimensions: concern for task and concern for people. Dispersed leadership (Heifetz) is the idea that individuals at all organisational levels can exert a 'leadership influence'.

15.17 Organising

Rationale: Planning is about determining objectives and how to reach them. Controlling is measuring and adjusting activities in line with plans.

Ways in: even if you didn't recognise the description of organising, you could probably have eliminated the other options.

15.18 Motivating

Rationale: Fayol's five functions of management are: planning, organising, commanding, co-ordinating and controlling. It is assumed that subordinates will carry out a command whether motivated or not.

15.19 Developing people

Rationale: Drucker grouped the work of the manager into five categories, the fifth being developing people. The other options are from Mintzberg's managerial role types.

15.20 Bennis

Rationale: Heifetz wrote on dispersed leadership, Fielder carried out research on the notion of leadership and Blake and Mouton published the managerial grid.

15.21 Heifetz

Rationale: This question is a test of whether candidates can recognise the essential features of leadership theories and attribute them to the relevant writer. Kotter's theory is concerned with the leader's responsibilities in coping with changes, and focuses on differences between 'leadership' and 'management'. Adair's work relates to the effectiveness of leaders in achieving a balance between achieving the task, maintaining the team and developing individuals. Mintzberg considers the roles of leaders. It is Heifetz who proposed that leaders can emerge informally in his theory of dispersed leadership.

16 Recruitment and selection

16.1 Screening application forms

Rationale: Screening means sorting through application forms received, in order to separate out candidates which are clearly ineligible for the vacancy, immediately worth short-listing and so on. It is selection because it is part of the process of measuring candidates against requirements, and selecting those who are most suitable. Recruitment is the process of defining requirements and reaching potential applicants.

16.2 Job description

Rationale: This is job description rather than job analysis, because a job description is the statement produced from a process of job analysis. This is job description rather than personnel specification, because it addresses the requirements of the **job**, rather than the qualities of the ideal job holder or person. Job advertisement is just a distractor.

Pitfalls: The difference between job description and personnel specification has cropped up frequently in exams over the years. There is potential for confusion: remember that one describes the 'job', the other the 'person' ...

16.3 Motivation

Rationale: 'Motivation' is a heading in an alternative method of person specification (the Five Point Pattern of Personality, by J Munro Fraser). Rodger's Seven Points are: physical make-up, attainments (qualifications), general intelligence, special aptitudes, interests, disposition (temperament) and circumstances.

16.4 Devolve recruitment and selection to line managers

Rationale: The current trend is to devolve recruitment and selection (among other HRM activities) increasingly to line managers, who handle recruitment within their own departments.

16.5 Tests are generally less accurate predictors of success than interviews

Rationale: All the other criticisms about the reliability of selection tests are valid – and yet tests are still more reliable than interviews at predicting performance in the job!

16.6 **Leading**

Rationale: A leading question pushes the interviewee to give a certain answer. (In this case, it is obvious that the interviewer expects the interviewee to agree.) An open question requires self-expression; a closed question invites a one word either/or answer, and a problem-solving question presents candidates with a situation and asks them to say how they would deal with it.

Pitfalls: This is an easy aspect of interviewing technique to set questions on: make sure you can identify all types of questions.

16.7 **Questions tend to be more varied and more random**

Rationale: This is a disadvantage because there may not be a clear interview strategy, and candidates may have trouble switching from one topic to another. The first option is an advantage, because it reduces individual bias, and saves time in sharing assessments (eg compared to a series of one-to-one interviews). The second option is an advantage, because a single interviewer may not be able to spot candidate weaknesses in technical areas. The fourth option is an advantage, because personal rapport may lead to favourable bias on the part of an interviewer.

16.8 **A tendency for people to make an initial judgement based on first impressions, and then letting this colour their later perceptions.**

Rationale: These are all different types of bias and errors of judgement in interviewing. The first option is halo effect. The second option is contagious bias. The third option is stereotyping. The fourth option is projection.

Ways in: Stereotyping is probably the most recognisable of the options, so you could at least narrow your options by ruling the third out option.

16.9 **Psychometric**

Rationale: Proficiency tests focus on current ability to perform tasks. 'Standardised' is a desirable quality of any type of test, meaning that it is applicable to a representative sample of the population being tested. 'Sensitive' is another desirable quality meaning that the test can discriminate between different candidates.

16.10 **A series of tests, interviews and activities undergone by a group of candidates over several days**

Rationale: Assessment centres are group assessments, usually used for higher-level positions, because of the time and costs involved in exploring candidates' personalities and skills in depth.

Pitfalls: Don't fall for the common trap of thinking that an assessment 'centre' is a place!

16.11 **At least two employer references are desirable**

Rationale: Two employer references provide necessary factual information and comparison of views (to minimise bias). The other options are untrue: references are highly subjective and/or deliberately limited and personal references are selected to be supportive (you can choose your friends in a way you can't choose your employers!).

16.12 **Employee flexibility**

Rationale: Job descriptions can be narrow and restrictive, giving people a limited sense of what is their 'job' and what isn't. This can create demarcation lines which prevent people from flexibly switching tasks, or working effectively in multi-skilled teams. The other options are all potential uses of job descriptions, because they clearly state all the elements of a job: for calculating their value to the organisation (job evaluation), identifying gaps in job holders' ability (training needs analysis) and preparing selection criteria (recruitment).

16.13 Local newspapers

Rationale: A professional journal would not be read by the target audience. National newspapers will be too expensive, given that most of the audience will not be the firm's target group: low level positions are more likely to attract local applicants.

Pitfalls: If asked about choice of advertisement media, you need to think about cost and audience targeting together.

16.14 Innovation

Rationale: Succession planning develops managers in order to ensure managerial continuity over time – and internal promotion is a key way of grooming managers for higher positions. Induction time would be shorter, because an internal promotee is already familiar with the organisation's culture, structures, systems and personnel. Innovation is not necessarily supported by internal promotion, because it does not bring 'new blood' into the organisation.

16.15 Getting as much information as possible about the applicant

Rationale: 'Maximum' information is not the point of interviews: squeezing as many questions as possible into the time allowed can restrict the flow of communication and put unnecessary pressure on the candidate, while a lengthy open-ended interview will be costly. The **relevance** of the information for selection is more important.

16.16 The organisation has complex cultural, business and technical selection criteria for its staff, but is considering using a consultancy for the first time, because it requires new people urgently in order to exploit an opportunity

Rationale: The key factors here are the urgency, and the fact that the consultants do not know the organisation: there is not enough time to give the consultants an adequate understanding of the complex recruitment needs. In the first option, consultants would bring a 'fresh eye' and avoid bringing the same old types of people into the organisation. In the second option, consultants would provide expertise and resources to handle large-scale recruitment, which the organisation lacks in-house. In the third option, the organisation can be confident that use of consultants would not be resented and resisted.

Ways in: It helps if you have a checklist in your head of reasons to outsource recruitment: 'new blood', resources/expertise and internal support would certainly be on that list. 'Lead time to brief consultants on the needs of the organisation' would be on the list of reasons not to use consultants ...

16.17 Competences

Rationale: Attributes are simply 'characteristics' of any kind. Skills are learned behaviours, rather than capacities.

16.18 To identify a vacancy

Rationale: This should have been fairly straightforward. It would be quite difficult to write a job description or a person specification if a vacancy had not first been identified.

17 Diversity and equal opportunities

17.1 (1), (2), (3) and (4)

Rationale: As well as compliance with relevant legislation, these are the main arguments for having an equal opportunities policy. It is good HR practice to attract and retain the best people for the job, regardless of race or gender.

17.2 To provide that women have the right to equal pay to work of equal value to that of men

Rationale: This does not imply that the woman has to be in the same job. Job evaluation is recommended as a way of establishing relative values of jobs, but is not compulsory. Equal Pay deals only with sexual discrimination – not race or other grounds.

17.3 They are both false.

Rationale: Positive discrimination refers to actions being taken which give preference to a protected person, regardless of genuine suitability and qualification for the job. Statement 1 is not positive discrimination as the steps are only taken to encourage people to apply. It does not say that they will necessarily be accepted.

Diversity goes further than equal opportunities. The ways in which people meaningfully differ in the work place include not only race and ethnicity, age and gender but personality, preferred working style, individual needs and goals and so on.

17.4 Harassment

Rationale: Harassment is the use of threatening, intimidating, offensive or abusive language or behaviour focused on the race, religious belief, sex or sexual orientation of another person. This sounds like victimisation, but victimisation is a separate form of discrimination, involving penalising someone because they are involved in a claim of discrimination against an employer.

17.5 Better understanding of target market segments

Rationale: A business can better understand (and meet) the needs of market segments if it employs representatives of those segments: this is a business benefit, because it enhances customer loyalty, sales revenue, profitability etc. The first option is a legal/moral benefit (and addresses equal opportunities rather than diversity). The second option is a benefit to employees in a diverse organisation. The fourth option is not true of diversity, which requires significant management investment and less 'standardised' HR solutions.

17.6 Employers must adjust working arrangements or the physical features of premises to remove any disadvantage to disabled people

Rationale: The duty is to make 'reasonable' adjustments. The other statements are true.

17.7 Setting age limits or ranges in an employment advertisement

Rationale: Now that age discrimination legislation is in force, this would be direct discrimination (akin to saying 'blue-eyed, English-speaking people only need apply'). The other options may well be construed as indirect discrimination.

17.8 The organisation has laid itself open to a claim of indirect sexual discrimination, but such a claim would not be successful

Rationale: The organisation has laid itself open to a claim of indirect discrimination, because if the selection decision had been made on the basis of a question asked of a woman but not of men, it may have been construed as such. The claim would not succeed because the organisation would be able to justify the apparently discriminatory conditions on non-discriminatory (job-relevant) grounds.

Pitfalls: You need to get to grips with the basics of how this works, and recognise examples when you see them.

17.9 Managing diversity

Rationale: Equal opportunity is a narrower concept based on eradicating discrimination based on the crude dimensions of individual difference. The other option is just a distractor.

17.10 Selecting a certain number of people from ethnic minorities for jobs, regardless of job-relevant selection criteria

Rationale: Positive discrimination (treating a minority group 'unfairly' well) is not permitted, except in relation to training provision. 'Quotas' are positive discrimination, because selection decisions cannot be justified on non-discriminatory grounds: 'targets' are 'positive action' – because they lead organisations to encourage under-represented groups to apply for jobs, and make non-discrimination a performance measure for selectors.

18 Individuals, groups and teams

18.1 Members passively accept work decisions

Rationale: Members of an effectively functioning group will take an active interest in decisions affecting their work. The first option is healthy, particularly in avoiding problems that occur when groups seek consensus at all costs (eg 'group think'). The second option is healthy, as it unites and stimulates the group. The fourth option can be a sign that the group is supporting the performance of its members – not just that they are focusing on their own performance at the expense of the group.

Pitfalls: If you were trying to go by 'common sense' instead of knowledge, you might think that intra-team disagreement and inter-team competition were negatives: not so. There are no 'trick' questions, but questions can be designed to separate those who have studied from those who are guessing!

18.2 Encourage the members to modify their personalities

Rationale: Personality is a relatively stable and distinctive concept: it is very difficult (if not impossible) to change personality, and the attempt has radical effects! The other options are constructive approaches to handling personality clashes in a team.

18.3 Storming

Rationale: This is typical of 'storming' behaviour. Forming would be more tentative: just getting to know one another. Norming would be further along in the process of settling into shared values and behaviours.

Pitfalls: Don't assume that 'storming' is all about conflict! If you did this, you might have mistaken this description for norming, say.

Ways in: Underline some key words in the micro-scenario: 'debating', 'factions', 'disagree'

...

18.4 Attitudes

Rationale: This is the definition of attitudes. Personality traits are relatively stable, enduring qualities of an individual's personality (eg 'impulsiveness'). Perceptions are how people 'see' things, according to how the brain selects and organises information. Emotional intelligence is a concept popularised by Daniel Goleman to describe awareness of, and ability to manage, one's own emotions and those of others. None of these concepts is explicitly mentioned in the syllabus – but you are required to know something about the 'characteristics of individual behaviour', so it is worth getting to grips with some of the basics.

Ways in: Perceptions are about thinking, emotions are about feeling – and the question asked for something that combines thinking, feeling and intention.

18.5 Crisis decision-making

Rationale: Teams are not the best vehicle for crisis decision-making, because group decision-making takes longer, and decisions may protect the team at the expense of the right (possibly tough) solution. Teams are, however, great for decision-making where the hearing of different viewpoints is beneficial. They are also great for ideas generation (think of group brainstorming) and coordination (teams are often cross-functional). You might have hesitated over the fourth option, but it is important to realise that distance is now no obstacle to team working (think of virtual teams, connected by IT and communications links).

Pitfalls: Don't forget 'virtual' teams in your thinking.

18.6 Blocking

Rationale: Blocking (or difficulty stating) is where members put obstacles in the way of proposals: this may be a positive contribution in circumstances where the proposals are risky or unrealistic – but it is probably contributing to the problem here. Bringing-in is encouraging the contribution of others; summarising, drawing together passages of discussion; testing understanding, checking whether points have been understood. They are generally supportive behaviours, which could be used to get the team back into constructive discussion.

18.7 Members are as alike as possible

Rationale: 'Compatibility' is not the same as 'homogeneity': teams need diversity, in order to have a mix and balance of contribution and roles. The other options correspond to team identity, and shared objective: two of the key tools of team building.

18.8 Completer – finisher

Rationale: The key words in the question were 'keen eye for detail', 'always meets deadlines' and 'reluctant to involve others'. These phrases are typical characteristics of a completer-finisher.

18.9 Identity

Rationale: The definition of a group is, basically, 'any collection of people who perceive themselves to be a group' (Handy). Identity means that there are acknowledged boundaries to a group, which define who is 'in' and who is 'out', 'us' and 'them'. Groups may have a defined purpose, but not always. Conformity can be an attribute of groups or crowds.

Pitfalls: Note that this wasn't a question about the difference between a group and a team – although this too would make a good exam question...

18.10 A mix and balance of team roles

Rationale: This should be straightforward if you have understood the Belbin model. A healthy team has a mix and balance of roles. However, members can adopt more than one role, or switch roles as required: there need not be nine members with fixed roles. Belbin argues that it is the process roles (how people behave, contribute and interact with others), rather than the functional roles (technical skills and operational knowledge) that impact on team functioning – although functional roles are still important for getting the task done!

18.11 Adjourning

Rationale: Adjourning is where the group sees itself as having fulfilled its purpose, and there is a process of disconnecting from the task and group – because there will have to be a renegotiation of aims and roles for the new task. Dorming is where a group grows complacent about performance. Norming is a much earlier stage in the cycle, where the group reaches agreement about work methods, roles and behaviours.

Pitfalls: Dorming and adjourning are all late stages of group development, and can be confused if you are not clear about them. Although 'forming, storming, norming and performing' is better known, these additional stages are part of Tuckman's model.

- 18.12 Encouraging members to express disagreements
- Rationale:** Competition with other groups enhances solidarity, and competition within a group destroys it, so the first and second option are the opposite of solidarity-enhancing. The fourth option would lead to 'group think': inability to confront problems, lack of criticism of poor decisions, false consensus. It may create high solidarity, but not healthy solidarity.
- 18.13 Multi-skilled team
- Rationale:** A multi-skilled team is one which brings together versatile individuals who can perform any of the group's tasks. Multi-disciplinary (or multi-functional) teams bring together individuals with **different** skills and specialisms, so that their skills can be pooled or exchanged. Self-managed teams are given discretion to plan their own task sharing and work methods, within defined task objectives: there is no suggestion that this is the case here. A virtual team is a geographically dispersed team, connected by information and communication technology (ICT) links.
- 18.14 Shaper
- Rationale:** The Shaper is the 'dynamo' of the team: one of the forms of leadership in Belbin's model. The Plant is the ideas person and creative problem-solver. The Co-ordinator is the chairperson, clarifying goals, delegating, promoting decision-making. The Implementer is the person who turns ideas into practical actions.
- Pitfalls:** There are several 'leader' roles in Belbin's model: you need to distinguish between them. The Plant is an ideas leader; Resource investigator an entrepreneur; Co-ordinator a task organiser; and the Shaper an interpersonal leader.
- 18.15 Shutting out
- Rationale:** You may have hesitated between the third and fourth options. However blocking is putting obstacles in the way of a proposal without offering any alternatives; whereas shutting-out is interrupting or overriding others and taking over.
- 18.16 Performing
- Rationale:** The team is executing its task and the team briefing is dealing with progress to date.

19 Motivating individuals and groups

- 19.1 The work
- Rationale:** Intrinsic rewards are 'part of' the work itself: extrinsic rewards are 'external' to the work itself.
- Pitfalls:** Potential confusion between intrinsic and extrinsic: a classic exam test!
- 19.2 Need for affiliation
- Rationale:** Affiliation is actually a category in another need model by David McClelland. The other options are Maslow's (although freedom of inquiry and expression overarches the hierarchy itself).
- 19.3 (4) only
- Rationale:** In Herzberg's theory, only training is a 'motivator factor'. The others are all 'hygiene' factors: if they are inadequate, employees will be dissatisfied, but even if they are got right, they will not provide lasting satisfaction or motivation. Herzberg argued that satisfaction comes only from the job.
- Pitfalls:** Herzberg is often examined, and students frequently get the basics of the theory wrong! Make sure you can sort the motivator factors from the hygiene factors.

19.4 Goals

Rationale: Goals are things people choose to pursue; each individual will have their own goals, which may vary with time, circumstances and other factors. The idea of innate (in-born, instinctive) needs is that they are biological or psychological imperatives, common to all people. (This is what makes it possible to have need theories with discussion of only a few innate needs.) Satisfaction arises when a goal is achieved.

19.5 Valence would be around 0, expectancy high, motivation low

Rationale: Willy's expectancy (expectation that by working hard he will be given the team leadership) is high, but valence (importance to Willy of becoming a team leader) is neutral, because he has both positive and negative feelings about it. Since Motivation = E × V, if V is 0, motivation is also 0.

Pitfalls: Make sure you get valence and expectancy the right way round, and that you recognise why Willy's valence is 0.

Ways in: Work through the equation, calculating your own values for V and E ...

19.6 Motivator factor

Rationale: Herzberg used the other three terms to describe the same set of factors: the ones that maintain morale but do not positively motivate (maintenance); prevent dissatisfaction but do not promote satisfaction, in the same way that hygiene prevents ill-health but does not promote well-being (hygiene); and that relate to the environment of work rather than to the work itself (environmental). The opposite set of factors is 'motivator' factors in the work itself, which – according to Herzberg – positively create satisfaction and motivation to superior performance.

Pitfalls: An exam question may refer to hygiene factors by any one of its three names, so it is worth using this question to check that you know them all!

19.7 Autonomy

Rationale: Autonomy is a degree of freedom or discretion in the job: the removal of restrictive controls.

Ways in: You may have spotted that all the core dimensions are all intrinsic to the job itself: they are all what Herzberg would call 'motivator' factors. You could then eliminate some of the options that are clearly extrinsic to the job, or 'hygiene' factors ...

19.8 Everyone is allowed to participate equally

Rationale: Participation will only work if the individual has the ability and information to participate effectively (the principle of 'capacity'): otherwise, they will feel frustrated and under pressure. You may have hesitated over the fourth option, but this is necessary for people to take participation seriously (the principle of 'consistency').

19.9 Theory X

Rationale: Theory X is the managerial assumption that most people dislike work and responsibility and will avoid them if possible they have to be coerced and controlled to work adequately – hence the kinds of management measures described. Theory Y is the managerial assumption that people can be motivated to accept challenge and responsibility and contribute willingly to the firm – resulting in a quite different management style!

Pitfalls: You really do need to know which way round X and Y are! (If it helps, think of X as a 'cross' against workers' names ...)

19.10 Immediacy of reward following results

Rationale: The other options are essential for an individual to work out how much effort will be required, and whether it will be worth it for the rewards expected (due to consistency) to be available. However, 'immediacy' is not necessarily required: people may have a high tolerance for 'delayed gratification', and be willing to wait for rewards as long as they have a reasonable expectation that they will eventually accrue. (As a student, for example, you may be working sacrificially hard now, in order to gain qualifications that will benefit your career in several years' time.)

19.11 Its effect on team motivation

Rationale: Team members may work for individual rewards, rather than contributing to the group, especially since there is a problem offering rewards for less measurable criteria such as team-work. The first option is clearly a benefit. The second option is a benefit of PRP because it relates rewards directly to business objectives. You may have hesitated over the third option but this is a benefit because PRP is a way of rewarding employees when there is no other way to do so (eg because they have reached the top of the salary/wage range their position is eligible for).

19.12 It replaces monetary rewards

Rationale: Job enrichment cannot offer management a cheap way of motivating employees: even those who want enriched jobs will be expected to be rewarded with more than job satisfaction. The other options have been found in practice to be benefits of job enrichment.

19.13 Self-actualisation

Rationale: According to Maslow, self-actualisation is the final 'need' to be satisfied. It is the fulfilment of personal potential. Maslow claims that this can rarely be satisfied.

Ways in: It might be worth memorising the triangular diagram and perhaps adding pictures to help you remember.

Pitfalls: You may have hesitated over the first option but this was just a fictitious distracter. Esteem needs and physiological needs are lower down the hierarchy.

19.14 Job content

Rationale: Job evaluation focuses on job content, to measure the relative value of jobs, compared to each other, **not** their worth in money terms. Actual pay levels are set with reference to the other options, among others.

19.15 The strength of an individual's preference for a given outcome

Rationale: The first option is valence (V). The third option refers to 'expectancy' (E). The second option is 'force of motivation (F): the product of valence and expectancy. Hence the equation: $F = V \times E$.

19.16 Job enlargement

Rationale: Eva's new tasks are of the same skill level and responsibility as her original task, so her job has been horizontally enlarged rather than vertically enlarged (which would be job enrichment). If she had gone from just packing one shift, to just stamping on the next shift (and so on), this would have been job rotation.

Pitfalls: Any area like this where students frequently confuse similar terminology is ripe for testing. Read, think and check your answers carefully, to avoid careless errors!

19.17 Micro-division of labour

Rationale: Micro-division of labour (or job simplification) is breaking down jobs into their smallest possible components, and having one person carry out one component. Division of labour is specialisation, but not to this extent. Job enlargement implies greater task variety, and empowerment, greater task significance and responsibility.

19.18 Integration

Rationale: The correct answer is implied in the scenario, in that the manager is urging team members to put their feelings aside for the benefit of the team. In other words, Javed is seeking greater integration in relation to their goals and objectives.

20 Training and development

20.1 Theorist

Rationale: The Theorist seeks to understand basic principles and to take an intellectual, 'hands off' approach prior to trying things. Pragmatists are the opposite. You may have hesitated over the first option, but Reflectors learn by thinking things through, rather than necessarily by applying theoretical concepts.

Pitfalls: This is an area ripe for exam questions, because of the clarity of the style classifications. Make sure you can identify the label to go with a description and vice versa.

Ways In: You could probably rule out Pragmatist quite quickly, because of Sara's dislike of 'hands on' methods.

20.2 A scientific approach to problem-solving, in order to minimise risk and error

Rationale: The scientific approach to problem-solving is a characteristic of learning organisation, but this involves experimentation and learning by testing ideas and making mistakes. Learning organisations have a high tolerance for risk, and regard errors as learning opportunities.

Ways In: If you don't recognise the concept or model, don't give up and guess: think through the options and how they relate to each other. A question phrased 'which is not...?' suggests that you are looking for the 'odd one out'. If you look at the options, you should find three that are compatible with each other – leaving one that isn't.

20.3 Training can be an effective solution to some performance problems

Rationale: This is a positive and realistic view of the benefits and limitations of training: not all performance problems are amenable to training, and may need other sorts of intervention (discipline, counselling, equipment repair, job re-design, motivation and so on). The first option would fail to involve trainees and line managers, who are key stakeholders in training. The second option would limit training provision, ignoring its significant benefits. The third option would fail to design training programmes appropriately for specific training needs and learner style preferences.

20.4 Training

Rationale: Conditioning may have sounded familiar if you only read as far as 'modification of behaviour', but it involves specific repetition-and-reward techniques. Education is the gradual acquisition of knowledge, by learning and instruction, often leading to qualifications.

Pitfalls: This kind of related terminology lends itself to exam questions. Training, education and development all involve 'learning', but the learning experiences are of different types, and with different overall aims.

20.5 Experiential

Rationale: The learning cycle is experiential learning or 'learning by doing'. 'Action learning' sounds similar, but is actually a specific learning method by which managers are brought together as a problem-solving group to discuss real work issues. Programmed learning is highly structured learning, which doesn't apply here. Reflection is a way of thinking about what you have learnt.

20.6 Enhanced employability of staff members

Rationale: 'Employability' refers to an individual's having a portfolio of skills and experience that are valuable in the labour market, thus enhancing his or her mobility (and ability to get a job outside the present employer). This is a double-edged sword for the organisation: it is socially responsible and fosters employee satisfaction but may also cause a skill drain to other organisations. You should be able to see how training contributes to the other options, and why they are benefits for the organisation.

Pitfalls: Look out for qualifier keywords like 'for an organisation' (that is, **not** 'for the individual'). Think carefully through 'which is the exception?' questions, too. Logically, an option may be an exception for more than one reason: in this case, because it isn't a benefit (but a drawback) **or** because it isn't a benefit to the **organisation** (but a benefit to the individual). In a well designed question, you should get the same answer either way!

20.7 Methods (2), (3) and (4) only

Rationale: Day release is 'off-the-job', because the learning comes from the employee's attending a college or training centre one day per week. The other methods are all 'on the job'.

Pitfalls: Note the variety of 'on the job' methods: don't forget to include job rotation (which you might otherwise connect with job design and Herzberg) and temporary promotion (which you might not think of as training).

20.8 Application of learned skills to the job

Rationale: On-the-job approaches support 'transfer of learning': skills are learned in the actual context in which they will be applied – so application is seamless. The first two options are advantages of off-the-job training: the learners don't have the distraction of other work duties, and errors while learning are less likely to have real consequences. You may have hesitated over the third option, but there is a risk that by learning on the job, people will pick up 'bad habits' and short-cuts – rather than best practice.

20.9 Level 3: job behaviour

Rationale: Level 1 measures how employees rated the training. Level 2 measures how much they learned: what they know or can do that they didn't do before. However, for a manager concerned with departmental productivity, the important thing is whether the trainees **applied** what they learned effectively to the job: Level 3. Level 5 is the impact of training on the wider 'good' of the organisation and its stakeholders: this kind of information is usually only available (and worth the cost of gathering and analysing it) at senior management level.

20.10 Personal

Rationale: Management relates specifically to management effectiveness and succession; career to planning opportunities for new challenges and learning through career moves (whether vertical or lateral).

20.11 On-the-job coaching by his supervisor

Rationale: A Pragmatist likes to learn in 'hands-on' ways that have a direct link to real, practical problems – so on-the-job practice is ideal. The second option would suit an Activist – a similar style, enjoying practical, active, participative learning, but without the need to see a work-related 'payoff'. The third option would suit a Reflector, since a journal offers opportunity for learning through reflection. And the fourth option would suit a Theorist, with a preference for structured intellectual study.

Pitfalls: The pairs of 'hands off' and 'hands on' styles are quite similar: don't confuse them. It may help to relate each style to a different stage of Kolb's learning cycle, to make them more distinct. The Pragmatist focuses on the job; the Reflector reflects on what happened; the Theorist seeks to understand it; and the Activist plans to try something new.

20.12 Increased employee satisfaction

Rationale: Employee satisfaction would not be regarded as a quantifiable benefit – unless it could be correlated directly with figures such as reduced absenteeism and labour turnover (although it would be difficult to relate this specifically to training, as opposed to other effects).

Pitfalls: Watch out for qualifier keywords in the question like 'quantitative' or 'qualitative' (benefits, characteristics). Always read questions carefully!

20.13 1 is the definition of development and 2 is the definition of training

Rationale: It is important to separate development, training and education in your mind for this syllabus. Development is the growth of a person's potential. Training is a planned learning event. Education is knowledge that is acquired gradually by learning or instruction.

20.14 A set of competence standards for your job or department

Rationale: A formal training needs analysis involves systematic study (at the level of the individual, job or department) of the required level of competence, the present/actual level of competence and any gap between them. The other options are all ways in which learning needs may 'emerge' in the course of work: the first option, through monitoring developments in your field; the second option as a 'critical incident' and the fourth option as on-going performance feedback.

20.15 E-learning

Rationale: It is the networked aspect that makes e-learning different from computer based training (CBT) (using stand-alone computers). Blended learning involves learning using a combination of different methods and technologies: this would be the correct option if the learning support was available from face-to-face tuition, say.

Pitfalls: Learning technologies is fertile territory for exam questions, because there are so many closely-related methods and terms (coaching, mentoring etc).

Ways in: Just about anything with an 'e-' in front of it, these days, is about the internet – not stand-alone computers.

20.16 (2), (4), (1), (3)

Rationale: This is Kolb's learning cycle which is a 'learning by doing' approach. It puts the learner in an active problem-solving role and encourages them to formulate and commit themselves to their own learning objectives.

Ways in: Simplified, this learning by doing approach involves:

Act → Analyse action → Suggest principles → Apply principles → Act ... and so on →

20.17 To identify present level of competence

Rationale: This can then be used to plan for the other options.

21 Performance appraisal

21.1 Job evaluation

Rationale: Job evaluation is a method of measuring the value of a job, not the performance of the person holding the job. The other options are key applications of performance appraisal. (Succession planning is a form of promotion or potential review, aimed at identifying future managers.)

Pitfalls: This is a common source of confusion (akin to the difference between job descriptions and person specifications in recruitment).

21.2 Guided assessment

Rationale: Overall assessment is narrative comment without the guidance on how the terms should be applied. Grading uses rating scales (definitions of performance on each characteristic from 1-5, say). Behavioural incident methods compare specific behaviours against typical behaviour in each job.

21.3 They should be easily achievable

Rationale: Achievable (which is part of the SMART objectives framework) is different from 'easily achievable': one of the key points of performance measures is that they should be motivational, which means that they should be at least a little bit challenging.

21.4 Tell and listen

Rationale: This manager tells in the first part and listens in the second part of the interview, taking on a dual role as critic and counsellor – and not assuming that all performance problems are the fault of the employee himself. Tell and sell would be more one-sided ('selling' simply being gaining acceptance of the evaluation and improvement plan). Problem-solving is even more of a collaborative, proactive process, with the manager in the role of coach. Sell and listen is not an appropriate method.

21.5 360-degree feedback

Rationale: 360-degree is, by definition, a 'rounded' view of an individual's performance from the appraisee, colleagues, superiors, subordinates and relevant business contacts. Self appraisal is likely to be biased by self-perception; peer appraisal by team relationships; and upward appraisal by subordinates' fear of reprisals.

21.6 Performance management.

Rationale: This is the definition of performance management. It differs from performance appraisal in its emphasis on collaboration, objective-setting and on-going management.

21.7 (1), (2), (3) and (4) only

Rationale: These are all valid criteria. The fifth criteria would be relevance not results.

21.8 Multi-source feedback

Rationale: Multi-source feedback is another term for 360-degree feedback or appraisal. Management by objectives and performance management are both approaches to collaborative objective-setting, on-going development and periodic review.

21.9 There is an implied link between assessment and reward

Rationale: This is a double edged sword: a link between assessment and reward may motivate employees to take appraisal seriously, but can also make it threatening if they fear that they haven't done well. Moreover, there are other factors in setting rewards – and if there isn't a real connection between a positive appraisal and a meaningful reward, the 'implication' that there is will only undermine the appraisal system. The other options are clearly positive.

21.10 Appraisal is seen as an opportunity to raise workplace problems and issues

Rationale: The other options were identified as barriers to effective appraisal by Lockett: 'appraisal as unfinished business' (distracting from future-focused improvement planning); 'appraisal as bureaucracy' (a mere form-filling exercise); and 'appraisal as an annual event' (where on-going performance management is required). Lockett also identified 'appraisal as confrontation' as a barrier, but this is not what is implied by the correct answer, which reflects a genuine, job-relevant, problem-solving approach.

21.11 Bonuses awarded

Rationale: Although appraisals can be used to measure the extent to which an employee is deserving of a bonus, it cannot be used to measure the effectiveness of the appraisal scheme itself. Funds may not be available for bonuses but this does not mean that the appraisal system is ineffective. Appraisals must be carried out with serious intent and managers must be committed to the system. The system should be fair and reasonably objective.

21.12 Individual objectives are related to the objectives of the whole organisation

Rationale: This is an advantage because it gives the individual a greater sense of meaning and contribution to the organisation. It is also an advantage to the organisation – as are all the other options. You may have hesitated over the first option. This would certainly be an advantage to appraisees identified for promotion – but not everyone.

21.13 Results-oriented

Rationale: This involves setting specific targets and standards of performance, and measuring performance against them. Behavioural incident focuses on job behaviours; rating scales are the same as grading; and guided assessment is narrative comment on defined characteristics.

22 Section D MTQs

- 22.1 (a) (i) Implementer
(ii) Shaper
(iii) Specialist
(iv) Monitor-Evaluator

These all relate to the descriptions of Belbin's team roles.

- (b) Victimisation. Victimisation occurs when an individual is penalised for giving information in a discrimination claim against an employer.
(c) True. Note that this is not the same thing as positive discrimination.
- 22.2 (a) A feeling of achievement. Intrinsic reward
Intrinsic rewards arise from the performance of the work

A promise of additional time off for meeting a target. Incentive
An incentive is a promise or offer of a reward

Working conditions

Extrinsic reward Extrinsic rewards are separate from the job itself and dependent on the decisions of others

Salary

Extrinsic reward Extrinsic rewards are separate from the job itself and dependent on the decisions of others

- (b) Giving an employee freedom to decide how the job should be done, encouraging employee participation in planning decisions of superiors

Transferring an employee from one job to another is job rotation. Increasing the number of tasks an employee participates in is job enlargement. Dividing a job up into a small number of sequential tasks is job simplification.

- 22.3 (a) (1) Theorists
(2) Reflectors
(3) Pragmatists
(4) Activists

These all relate to the classifications of Honey and Mumford.

- (b) Computer-based training, college courses

The other options are all on the job training methods.

- 22.4 (a) (1) George Personal development can help to foster employee job satisfaction, commitment and loyalty.
- (2) Helen Management development. This may include the development of management/leadership skills or management education such as an MBA.
- (3) Josh Professional development. This is an example of continuing professional development (CPD). CPD is based on the belief that a professional qualification is the basis for a career lifetime of development.
- (4) Leigh Career development. The trend for delayered organisations reduces opportunities for promotion, so opportunities are planned for sideways or lateral transfers.
- (b) There should be clear objectives, there should be timely feedback
For training to be effective there should be timely feedback and also clear objectives for the training. Training does not need to be on or off the job to be effective, it can be either. Training does not need to be expensive to be useful.
- 22.5 (a) (1) Company W - Results-oriented scheme This scheme is based on the results achieved by the sales staff.
- (2) Company X - Grading Each manager is graded on their performance.
- (3) Company Y - Guided assessment This is a guided assessment method.
- (4) Company Z - Behavioural-incident method This method concentrates on employee behaviour measured against typical behaviour in each job.
- (b) Problem-solving This is a problem solving approach.
- (c) True. This is one of the objectives of performance appraisal.
- 22.6 (a) Negative power Negative power is the use of disruptive behaviour to stop things from happening.
- (b) Individuals at all levels can exert a leadership influence
Heifetz: theory of dispersed leadership

There are 'psychologically close' and 'psychologically distant' managers
Fiedler: contingency theory; people become leaders partly because of their own attributes and partly because of their situation

The manager 'does things right' while the leader 'does the right thing'
Bennis: put forward specific differences between managers and leaders

23 Personal effectiveness and communication

23.1 Diagonal

Rationale: The communication here is both upwards and 'sideways'.

23.2 Personal development planning

Rationale: Personal development planning is something the individual does for his or her own improvement and learning, although a coach, mentor or counsellor may facilitate this process. The other options are all types of 'developmental relationships': a coach helps a trainee for a brief period to work on job-relevant skills; a mentor helps a less experienced

person over the long term to work on more general personal development issues; and a counsellor helps an individual to work through emotional or social issues or problems.

Pitfalls: These are distinct roles: make sure you can identify them correctly.

23.3 An assertive style of communication

Rationale: An assertive style of communication will help in time management, because it enables you to say 'no' (appropriately) to interruptions and unscheduled demands.

23.4 The wheel

Rationale: The wheel has a central figure who acts as a hub for all messages between members. The circle involves a message going from one person to another. The 'Y' involves a message going from person to person up a chain, until it reaches someone who is in contact with more than one person. And all-channel involves everyone sending messages to everyone else.

Ways in: If you can visualise the situation, it helps: you could then eliminate the circle and all-channel, at least.

23.5 Mobile communications

Rationale: A mobile phone enables both colleagues and customers to reach you when you are out of the office. It also enables you to call the office eg to check inventory availability of items, place immediate orders and so on. (If you had a laptop, this would be even better: you could have direct connection with office systems.) The first two options all involve linked computer systems, so are not relevant.

23.6 Security

Rationale: Security is a key vulnerability of email: there is no guarantee of privacy (and a risk of accidentally sending the message to the wrong person). The other options are significant strengths, however. If you hesitated over the fourth option, think about how email can be used for memos/reports/letters, and how many formats (visual, audio) can be 'attached' to email messages.

23.7 Non-directive

Rationale: Counselling is facilitating others through the process of defining and exploring their own issues and coming up with their own solutions: this is relatively non-directive. Advising is a relatively directive role: offering information and recommendations on the best course of action to take. Counselling is often not directly task-related: it is often about helping employees to formulate learning goals or to cope with work (or non-work) problems.

23.8 Accurate

Rationale: The grapevine is a 'rumour mill': information is often inaccurate and exaggerated. Communication is, however, fast, selective (in that information is not randomly passed on to everyone) and up-to-date (information is often more current than in the formal system).

23.9 Exception reporting

Rationale: Exception reporting may improve the quality of upward communication (making it more selective), but it does not encourage it: if anything, it may create a culture in which staff don't 'bother' their superiors with information. The other options are all ways of encouraging upward flow of information and ideas – which otherwise tends to be rare in organisations.

23.10 Sender, Coded message, Decoded message, Receiver, Feedback

Rationale: The sender encodes the message and transmits it through a medium to the receiver who decodes it into information. The answer cannot be A since you need to have a message to feedback on before you provide the feedback.

Ways in: It might help you to picture the radio signal diagram in your mind.

23.11 Team meetings

Rationale: Notice boards are unsuitable for upward communication, and organisation manuals and team briefings are for downward communication.

Pitfalls: You needed to be aware of the nature of a team briefing, which is for information and instructions to be given (downward) to a team.

23.12 Distortion

Rationale: Noise is the other main type of communication problem: interferences in the environment in which communication takes place, affecting the clarity, accuracy or arrival of the message. Redundancy is a positive principle in this context: you can use more than one form of communication, so that if one message does not get through (perhaps because of noise or distortion), another may. Feedback is an essential part of the communication cycle: it is the response which indicates to the sender whether the message has been correctly received.

23.13 Wheel

Rationale: The wheel was the fastest and the Y was the second fastest in Leavitt's experiment. The chain was the slowest. The reason was the fact that messages came through and were distributed from a central source.

23.14 Developing the individual by helping to build on skills and overcome weaknesses

Rationale: If you got this answer incorrect then remember the importance of having a clear understanding of the key definitions within the syllabus. For example, coaching is not one-way so the second option could immediately be eliminated. It is important to look for key words (clues) to the right answer.

23.15 People pay less attention to non-verbal cues than to what is being said

Rationale: Research shows that people pay more attention to non-verbal cues in interpreting what someone means than they do to the words themselves. The other statements are true.

Pitfalls: You may have wrongly selected the third option if you associated non-verbal communication too narrowly as 'body language': be aware of the full range of non-verbal signals that can be given or received.

23.16 Measurable

Rationale: SMART is 'Specific, Measurable, Attainable, Relevant and Time-bounded', although versions differ. The first and third options are both very plausible – and also qualities of effective goals – but you wouldn't want to replace 'measurable', which is essential (otherwise, how will you know when you've reached your goal?).

23.17 Failed to meet deadlines

Rationale: You may have considered failing to communicate, but you are not given enough information in the scenario to assume that this is the case.

23.18 Setting up a competence framework

Rationale: A competence framework sets out what an employee should be able to do and ought to know.

23.19 A dispute focuses attention on individual contributions

Rationale: Focusing attention on an individual's contribution may be constructive, if it brings the employees involved to realise what each contributes.

24 Section E MTQs

- 24.1 (a) The task will satisfy a key customer, The task will add value to the organisation.
These are two of the conditions of an important task. The other is that the potential consequences of failure are long-term, difficult to reverse, far reaching and costly.

(b) A meeting without a clear objective will always give value to everyone attending for the time taken
False Meetings without objectives can be a waste of time for all those attending.
Time management can be improved by setting aside times when an individual is not contactable by others.
True Constant interruptions from others can prevent work being completed.
Setting aside time for these tasks will improve time management.

24.2 (a) (1) Compromise Compromise involves bargaining, negotiating and conciliating.
(2) Integration/Collaboration Integration/collaboration involves emphasis being put on the task and individual esteem being subordinate to the needs of the group.
(3) Dominance Dominance is the application of power or influence to settle the conflict.
(4) Denial Ignoring the issue is known as denial.

(b) Compromises result in all parties being satisfied
False. Even positive compromises only result in half-satisfied needs.
A win-win situation is rare, but is the best solution to conflict resolution
True. Win-win situations can result in mutual respect and co-operation.
A lose-lose situation is not possible
False. Compromise comes into the category.
Win-lose situations can result in damaged relationships within the team
True. If one team member gets what they want at the expense of another, relationships within the team may break down.

24.3 (a) Completed questionnaires for market research
Data: This is raw material to be processed.
Company website page
Information: This has been processed and then presented.
Calculations showing whether an investment is profitable
Information: This has been processed and then presented.
An individual employee's test score
Data: This is raw material to be processed.
Variance reports for a department manager
Information: This has been processed and then presented.
The average employee assessment grade for a company
Information: This has been processed and then presented.

(b) Strategic information will help senior managers with long-term planning.

- 24.4 (a) Timing The email has been sent too close to the date of the meeting, when the financial controller could have sent it much earlier. The medium, clarity and recipients of the email are all suitable for the communication.
- (b) Information is not divulged randomly, it can bypass secretive management, it relates to internal politics
- The grapevine operates inside the place of work, the grapevine is most active when the formal communication network is active and informal communication is more current than formal information.
- 24.5 (a) Slang is used in task instructions, an email sent to all employees using IT jargon
- Slang or jargon could create misunderstanding if the recipient of the communication is unaware of the meaning.
- (b) Direct discrimination. This is the definition of a grievance.
- (c) Distortion. This is the definition of distortion.
- 24.6 (a) (1) Establishing priorities with Peggy
(2) Delegation of routine tasks
(3) Identification of information sources within the business
(4) Sequencing of interviews with relevant staff
(5) Collation of information
(6) Report writing
- One of the most important things is for Susan to establish priorities with Peggy. This will enable her to delegate some of her routine work to enable her to make some time for the project.
- (b) Helping John to prepare for his upcoming appraisal
- This option would appear to apply more closely to a mentoring role

25 Ethical considerations

25.1 Fiduciary

Rationale: 'Fiduciary' means 'of trust'. Although this is a terminology question, it addresses the important point that all managers (and organisations) are accountable to some external entity and purpose.

25.2 Utilitarianism

Rationale: Utilitarianism is based on 'usefulness': the greatest good of the greatest number. Deontology is an alternative approach based on absolute moral principles (or categorical imperatives): what is morally 'right' in a situation. Virtue ethics is a belief in pursuing positive moral qualities, which flow out into behaviour.

25.3 It constitutes grease money.

Rationale: Grease money refers to payments for benefits to which the company is legally entitled – just to 'oil the wheels'. Bribery is payment for benefits to which the company is **not** legally entitled – to 'bend the rules'! In either case, this is unethical (and in some situations, illegal) – regardless of the legitimacy of the claim or the purposes to which the payment is (supposedly) put.

Pitfalls: Know the difference between extortion, bribery, grease money, gifts and hospitality.

25.4 Integrity based

Rationale: The emphasis on managerial responsibility is a feature of the integrity or values-based approach to ethics management. A concern for the law alone is a compliance based approach. The third and fourth options are examples of responsibilities.

25.5 Whistle blowing

Rationale: Corporate conscience is irrelevant, and confidentiality breach is incorrect, since whistle-blowing gives some protection to employees from being in breach of confidentiality.

25.6 (1), (2), (3), (4) and (5)

Rationale: These are all potential ethical issues. Materials used impacts on product safety and eco-friendliness (eg for recycling). Quality is a safety and customer satisfaction issues. Advertising poses issues of truth and non-manipulation. You may have hesitated over supplier labour practices, but this is a key area of ethical sourcing. It can cause significant damage to corporate reputations. Packaging raises issues of safety/perishability, eco-friendliness and truthful product labelling.

25.7 Timeliness

Rationale: Accountability and social responsibility are classed as professional qualities, not personal qualities. Ambition is a personal quality – but is not considered essential in a professional ethics context: it can even pose ethical dilemmas ...

Pitfalls: You need to read the question stems carefully to pick up fine distinctions such as 'personal' and 'professional'.

25.8 Independence in appearance

Rationale: Independence in appearance means avoiding situations that could cause a reasonable observer to question your objectivity. In the scenario, this is a risk – while independence of mind (free from actual partiality) isn't. The pure distractors were plausible because of the possibility of raising questions (scepticism) with your superiors (accountability) – but irrelevant.

25.9 Employability training

Rationale: Employability training helps employees to get other employment but it is not an ethical objective.

25.10 The law

Rationale: The saying is: 'the law is a floor'. By meeting non-legal regulations (including the rules of your workplace) you should meet a higher standard of behaviour than the legal requirements. Ethical behaviour is a higher moral standard, based on society's expectations and principles.

25.11 Fairness

Rationale: This is a definition of fairness.

25.12 Telling the truth and not misleading stakeholders

Rationale: The first option is a definition of openness, the third is responsibility and the fourth is accountability.

25.13 Integrity

Rationale: The statement is the definition of integrity made by the UK Nolan Committee on Standards in Public Life.

25.14 Organisational self-interest

Rationale: Organisational self-interest is a threat to independence and a source of conflict of interest. The other options are different varieties of ethical systems.

25.15 Self-interest

Rationale: A firm or a member of an assurance team should not accept gifts or hospitality unless the value is clearly insignificant. In this case, it is likely that the cost of corporate hospitality at major sporting events will be significant.

- 25.16 Intimidation
Rationale: This is a case of intimidation. You may have been tempted to pick self-interest but the threat of legal proceedings makes this intimidation.
- 25.17 An ACCA member is an officer of the client company but does not deal with the client's affairs
Rationale: The fact that the ACCA member does not deal with the client's affairs is a safeguard against a conflict of interest.
- 25.18 Confidentiality
Rationale: The issue for you is confidentiality, as the accounts are likely to contain sensitive information and should definitely not be left lying around. You may have wondered about unprofessional behaviour but this would apply to your supervisor rather than you.
- 25.19 The ethics appropriate for a given situation will depend on the conditions at the time
Rationale: The first option refers to absolutism and the second refers to egoism.
- 25.20 It takes no account of changing norms in society
Rationale: The first and third options are criticisms of relativism and the fourth option refers to egoism.
- 25.21 The duties of the decision taker
Rationale: The virtues of a person are those characteristics regarded by society as desirable, and may result in an observer arriving at the conclusion that the individual will take good or bad decisions. A duty-based perspective considers whether a decision or action will be compliant with the perceived responsibilities of a person or organisation, which in turn may rely on consistency with the law, codes of practice or generally accepted standards. This is the deontological approach. The consequentialist approach considers right and wrong from the viewpoint of an action or decision bringing about an end result that is right or wrong. This is called the teleological approach.

26 Section F MTQs

- 26.1 (a) It leads to a philosophy of anything goes, it is based on a fundamental contradiction.
It is argued that relativism leads to a philosophy of anything goes and the statement that all statements are relative is an absolute (therefore non-relative) statement.
- (b) Social responsibility action is likely to have an adverse effect on shareholders' interests in the short term
True. Social responsibility costs money and goes against the idea of maximising shareholder wealth.
An environmental audit involves assessing the opportunities and threats to an organisation
False. An environmental audit monitors things such as legal compliance with environment regulations or emissions levels.
Only governments are concerned with social responsibility
False. As can be seen in many examples, a number of companies take socially responsible actions.
Guaranteeing employees a minimum 'living wage' is an example of social responsibility
True. This is an example of a company being socially responsible.

- 26.2 (a) The teleological view of ethics is based on duty
 False. This is the deontological view. Teleology is based on consequences.
 Bribery can sometimes be legal
 False. Bribery involves payment for services that the organisation is not legally entitled to.
 Virtue ethics suggests that managers should incorporate values such as fairness and loyalty into their decision-making
 True. Virtue ethics suggest managers should incorporate such virtues into their daily behaviour.
 An accountant's ethical behaviour serves to protect the public interest
 True. This is a key reason why accountants should behave ethically.
- (b) It takes no account of evolving norms, whatever source is used, human interpretation will lead to different views.
 Absolutism takes no account of 'advances' in morality and if human interpretation leads to different views there cannot be universal agreement.
- 26.3 (a) Reliability, courtesy, respect, timeliness
 The personal qualities that an accountant should demonstrate are reliability, responsibility, courtesy, respect and timeliness.
- (b) Integrity, objectivity
 The fundamental principles are integrity, confidentiality, objectivity, professional behaviour and professional competence and due care
- 26.4 (a) (1) Advocacy threat YRT Co is threatening its independence by taking the client's position in the legal case.
 (2) Familiarity threat Since the audit partner has a long-term relationship with the audit client, there is a familiarity threat.
 (3) Self-interest threat A self-interest threat exists if there are close personal relationships between the client and the audit team.
 (4) Self-review threat Where the external auditor helps to prepare the financial statements there is a clear self-review threat.
- (b) Litigation against the external auditor by an audit client
 Litigation gives rise to a threat of intimidation. The others give rise to self-interest threats.
- (c) Moral principles
 Ethics are a moral rather than legal or regulatory issue, although professional ethics are particularly important.
- 26.5 (a) Self-interest threat, Intimidation threat
 Because it is important for JKL Co to retain this client, due to significance of the revenue, there is a self-interest threat here. The client is also looking to intimidate the auditors over the fee negotiations.
- (b) When dealing with ethical dilemmas ACCA students must follow ACCA's code of conduct.
 True. ACCA students and members must always follow ACCA's code of conduct.
 Professional ethics should not be followed at the expense of contractual obligations.
 False. Professional ethics should be followed even if this is at the expense of a contractual obligation.
 There is a public expectation that accountants will act ethically.
 True. The public expects all professionals to act in an ethical manner.

A prospective audit firm quoting a significantly lower fee for assurance work than the current auditors charge does not raise a threat of a conflict of interest.
False. This process is known as lowballing and raises a significant self-interest threat, particularly if the firm want to offer more profitable non-audit services as well.

- 26.6 (a) Decisions of this stakeholder may be influenced by ethical considerations

Customers: For example, customer purchases may be influenced by ethical considerations

Standards of behaviour expected of this stakeholder should be communicated to them

Employees: Employees need to know what is expected of them

This stakeholder may need reassurance that the organisation will act as a 'good citizen'

Local communities: Local communities may need reassurance that the organisation will act as a 'good citizen'

- (b) Effective education and training for all staff

The most effective way to ensure standards are maintained is to instil the standards into the company culture. Staff training is the only way to ensure that standards are communicated, and that staff understand the implications of any violation.

27 Mixed Bank 1

- 27.1 Isolated from its external environment.

Rationale: The difference between an open and a closed system is very basic, and depends on the relationship the system has with its environment. A system being closed to protect from unauthorised access merely refers to the system's security arrangements. Incapability of further technical enhancement refers to a stage in the system's life cycle.

- 27.2 Indirect discrimination

Rationale: This is indirect discrimination because most part time employees are women. If it were direct discrimination then the advert would actually state that women had less favourable terms.

- 27.3 To record financial information.

Rationale: This is its basic, original role and is still the best way to describe its part in the modern business organisation.

- 27.4 Improves the motivation of junior managers.

Rationale: While the other options may arise in a decentralised organisation, they are not necessarily features that are specifically associated with decentralisation.

- 27.5 There is little similarity between team members' work.

Rationale: Where there is little similarity in work, subordinates will not be able to help each other, and will rely more heavily on their managers.

Where the work is routine, or the team very experienced, team members will require less support so a wider span may be appropriate. the wider the geographical dispersion, the narrower the span.

- 27.6 Independence of the non-executive directors.

Rationale: This will be examined in the internal position audit of the company rather than the environmental analysis which looks at matters external to the company.

- 27.7 Managing the prompt payment of suppliers.

Rationale: The purchasing manager will be concerned with all aspects of supplier management (eg discussing prices, discounts, delivery lead times, specifications, chasing late deliveries, sanctioning payments).

- 27.8 (2), (3) and (4) only

Rationale: The other statement describes the adhocracy, which is complex and disorderly and does not rely on standardisation to co-ordinate its activities. It also relies on the expertise of its members, but not through standardised skills.

- 27.9 (1) and (4) only

Rationale: Customisation should not stop the company from being able to buy 'add-ons' to the basic package. In fact they are sometimes used to give the package more flexibility to suit particular needs. Dependence on the supplier for maintenance is also a disadvantage of ready-made packages.

- 27.10 Variable costs

Rationale: In the short run, firms will continue to supply customers provided that they cover variable costs. They will incur fixed costs whether they produce any output or not. Therefore provided revenues cover variable costs and therefore make a contribution towards fixed costs, it is beneficial for the firm to continue producing.

27.11 Dual authority.

Rationale: Dual authority may lead to conflict between the managers involved.

The advantages of such a structure are:

- Greater flexibility
- Improved communication
- Motivating employees

27.12 The board of directors.

Rationale: As with all company-specific matters it is the directors who are primarily responsible for the implementation of procedures, which follow best practice with regard to the current corporate governance advice.

27.13 Shareholders are accountable to auditors.

Rationale: All the other statements are true. Both directors and auditors are agents of the shareholders and their primary duties relate to them.

27.14 To examine and express an opinion on the company's periodic financial statements.

Rationale: This is a Companies Act requirement. The other responses are specific director responsibilities.

27.15 An audit trail

Rationale: An audit trail shows who has accessed a system and the operations performed.

27.16 (2), (3) and (4) only

Rationale: It should be **accurate** – in the sense of correct for the purpose. Inaccurate information is of little use for strategic, tactical or operational purposes. **Authoritative** means that the source of the information should be reliable. It must also be **relevant** to the user's needs. Information that is not needed for a decision should be omitted, no matter how 'interesting' it might be. If the information is **comprehensive**, it may be more wide ranging than it needs to be. It needs to be complete ie include everything that is needed.

27.17 External auditors need to assess the work of internal audit first.

Rationale: Although some of the procedures that internal audit undertake are very similar to those undertaken by the external auditors, the whole basis and reasoning of their work is fundamentally different.

27.18 (1), (3) and (4) only

Rationale: Capital costs, which are capitalised and then depreciated, include installation, hardware purchase and software purchase costs. Routine system maintenance costs are revenue items which are expensed as incurred.

27.19 Shareholders.

Rationale: It is very important that external auditors are independent of the company's management.

27.20 Banked, complete, prevented.

Rationale: In any business controls over cash receipts are fundamental if the company is to keep a healthy cash position.

27.21 Dishonesty, motivation and opportunity.

Rationale: If one or more of them can be eliminated, the risk of fraud is reduced.

27.22 A higher than normal risk audit.

Rationale: The instances given are all examples of inherent risk or control risks and therefore they would be indicative of higher risk audit.

Certain of the factors combined, such as a poor internal control environment coupled with a dominant chief executive, might raise the auditors' suspicions of fraud, but not necessarily. However, they would all increase the overall risk of the audit.

27.23 (1), (3) and (4) only

Rationale: Data and information captured from internal sources come from transaction systems, such as the payroll system and the sales ledger, or is communicated formally or informally, as in a decision taken at a meeting.

Although the type of information is circulated within the organisation, it is captured from outside. For example, the source of the market information is the market itself, which is clearly external to the organisation.

28 Mixed Bank 2

28.1 (2), (3) and (4) only

Rationale: Fayol wrote that to manage is to forecast and plan, to organise, to command, to co-ordinate and to control. Commanding is the exercise of centralised authority and leadership. Co-ordinating involves harmonising the activities of all groups towards the common objective. Controlling is measuring performance and accounting for deviations from plans. Writers after Fayol substituted functions such as motivating and consulting for commanding.

28.2 Organisational design will be determined by a number of factors all of which dependent on the others.

Rationale: These factors include elements such as the company's objectives, the environment, the staff, the culture, the management style, the tasks carried out, the structure and the technology used.

28.3 Planning and control.

Rationale: The five categories are setting objectives, organising the work, motivation, the job of measurement and developing people. Planning and control are included within setting objectives and measurement. Drucker gave more emphasis to the 'human resource' aspects of management than writers on classical management theory such as Fayol.

28.4 Position power.

Rationale: Position power or legitimate power is conferred by the authority linked to a formal position within the organisation structure.

28.5 Benevolent authoritative, participative, exploitative authoritative, democratic.

Rationale: These are Likert's four management styles.

28.6 Storming.

Rationale: This is the storming stage, as identified by Tuckman. During this stage, conflict can be quite open. Objectives and procedures are challenged and risks are taken. However, there is a considerable amount of enthusiasm within the group and new ideas emerge. So too do political conflicts, as leadership of the group becomes an issue. This appears to be the situation described in the question.

28.7 (2) and (3)

Rationale: Job analysis involves finding out what are the task, skill and knowledge requirements of a job. This information is then output in the form of a job description (tasks, duties, objectives and standards of a job) and a person specification (reworking of the job description in terms of the kind of person needed to perform the job). A human resource plan is a much broader statement of the future skill requirements of the organisation as a whole, and how they will be met (by recruitment, training, retention and so on). A performance appraisal analyses how a job holder **does** the job – not the nature of the job itself.

28.8 Shaper.

Rationale: All of Belbin's roles are important to the effective functioning of a team.

You should familiarise yourself with all nine roles.

- Plant
- Shaper
- Resource investigator
- Monitor evaluator
- Company worker
- Completer finisher
- Team worker
- Chairman
- Specialist

28.9 Attacker

Rationale: The shaper is a leader role, where the role holder spurs the team to action. The plant provides the creative thinking in the team, while the finisher's actions are directed to the completion of the task.

Attacking is a type of group behaviour identified by Rackham & Morgan.

28.10 All four.

Rationale: A team is a number of people with complementary skills who are committed to a common purpose for which they hold themselves basically accountable. This is a control mechanism which improves work organisation by using knowledge from a broad range of perspectives to evaluate decision options.

28.11 Forming, storming, norming, performing.

Rationale: Forming is the stage where the team comes together. Storming happens next; the group re-assesses its targets and (hopefully) trust between group members develops. Norming is a period of settling down, when the group established norms and procedures for doing their work. Performing then occurs; the team sets to work to execute its task and the difficulties of development no longer hinder it.

28.12 Herzberg.

Rationale: Herzberg found that people's behaviour in the workplace was affected by more than their physical and social needs; the content of the work itself had an effect on motivation and performance.

28.13 (1), (2) and (4)

Rationale: Bruce's course would have covered many approaches to resolving problems. The negotiation techniques you should have identified include trying to develop options that would result in mutual gain; defining the problems carefully and looking for a wide variety of possible solutions. Evaluating progress towards objectives and creating a trusting supportive atmosphere in the group will enhance the project team's performance but would not be considered negotiation techniques.

28.14 (1), (2) and (4).

Rationale: The feature is an advantage associated with other types of communication. Complex ideas that require deeper consideration are probably best communicated in written form, or perhaps in a presentation. Holding a meeting is the main communication technique for allowing multiple options to be expressed. However, an effective chairperson is needed if all sides are to be heard.

28.15 (1) and (2) only

Rationale: Hygiene factors are extrinsic or environmental factors (salary and job security), while motivator factors are to do with the satisfactions of the work: challenging work is clear in this category – and recognition could be in either.

28.16 (2), (3) and (4) only

Rationale: Colloquialisms should only be used in informal conversation and jargon should be avoided, although it may be used where it is an excellent form of shorthand and unique to the particular organisation, provided it remains comprehensible and is understood by all parties. Acronyms can be used freely as long as they are explained.

28.17 (1), (3) and (4) only

Rationale: Complex images can be included as an attachment to an email and there is no limitation on their transmission.

28.18 The sequence is 5, 2, 6, 1, 4, 3.

Rationale: The sequence of items on an agenda is apologies for absence, approving the minutes of the previous meeting, matters arising out of the minutes, the main items of business on the agenda (subjects for discussion), any other business (items not on the agenda) and finally deciding the date of the next meeting.

28.19 (1), (2) and (3) only

Rationale: Peers or co-workers could be members of a team or people receiving or providing services.

Customers can be a useful source, especially for sales staff. Knowing what customers think of you helps to improve your technique.

When individuals carry out their own self-evaluation, it is a major input to the appraisal process because they can identify the areas of competence that are relevant to the job and their own relative strengths.

28.20 Upward.

Rationale: There is a current trend towards this more progressive appraisal system where subordinates appraise their superiors.

Potential problems with this method may include:

- Fear of reprisal
- Vindictiveness
- Unwillingness of superior to respond to feedback

28.21 Deal with grievances.

Rationale: Grievances should be dealt with by a formal mechanism separate from the appraisal process. If a grievance arises during appraisal it should be dealt with using the normal grievance procedure.

28.22 Accounts payable clerk.

Rationale: It is unlikely that the accounts payable clerk will be asked. The others will all come in contact with the sales manager and therefore potentially could be asked to assist with completing the appraisal forms required by 360 degree feedback process.

28.23 Enabling accounting.

Rationale: Enabling accounting is a made up term here, and sounds like a rather dubious practice for a business. Accounting should be a well-controlled and regulated process.

The other options are all characteristics of a learning organisation.

28.24 (1), (2) and (4) only

Rationale: The advantages of upward appraisal are that the subordinates feel more involved, managers receive objective feedback and can therefore improve their performance.

29 Mixed Bank 3

29.1 PEST

Rationale: PEST (Political, Economic, Social and Technological) are the environmental factors that affect an organisation. Sometimes two more factors, ecological and legal are added. PERT is a tool used in project management. SWOT is used to analyse the internal and external environment; so not just the external environment.

29.2 Designing systems and standardising work.

29.3 The number of employees reporting to one manager.

Rationale: This is the definition of span of control.

29.4 The directors of the company. The role of the internal auditor requires independence from other employees, therefore they should report to the directors. Some companies have an audit committee which is a sub committee of the board of directors, and the internal auditors report to the audit committee. If there is no audit committee then the auditors should report directly to the board of directors.

29.5 Arithmetic, physical.

Rationale: SPAMSOAP stands for: Segregation of duties, Physical, Authorisation and approval, Management, Supervision, Organisation, Arithmetical and accounting and Personnel.

29.6 Sales invoicing and payroll.

Rationale: Inventory valuation would be performed by the management accountant. Project appraisal would be performed by the financial manager.

29.7 Hersey and Blanchard.

29.8 All team members have different skills and specialisms which they pool.

29.9 Maslow's hierarchy of needs and Herzberg's two factor theory.

29.10 Mentoring by a colleague and secondments to other departments.

Rationale: These types of training take place in a work environment.

29.11 Diagonal

Rationale: The manager is in a different function and also below the director.

29.12 Prefers to think things through first.

29.13 Goals

Rationale: Collective goals or aims are a feature of organisations.

29.14 Strategic apex, support staff

Rationale: The others are distractors! Make sure you do know these technical terms as your exam could include a similar question.

- 29.15 All of the above
Rationale: All of these are examples of weaknesses in financial controls.
- 29.16 The Management Accountant
Rationale: The Management Accountant provides information for management: cost accounting, budgets and budgetary control and financial management of projects.
- 29.17 Purchasing/procurement
Rationale: The purchasing or procurement function is responsible for authorising purchases (and suppliers) and approving.
- 29.18 Teeming and lading
- 29.19 (1), (2) and (4) only
- 29.20 Module
Rationale: A suite is a set of several modules. A spreadsheet is a type of program, and a format for displaying and processing data: it is often used to integrate data from accounting modules for decision-support and management information systems.
- 29.21 Legitimate power
Rationale: This is also known as 'position' power.
- 29.22 Identity
Rationale: The definition of a group is, basically, 'any collection of people who perceive themselves to be a group' (Handy). Identity means that there are acknowledged boundaries to a group, which define who is 'in' and who is 'out', 'us' and 'them'.
- 29.23 Specialist
- 29.24 Safety needs
Rationale: Safety needs is one of the needs in Maslow's hierarchy.

30 Mixed Bank 4

- 30.1 Output control
Rationale: Output control. Ouchi assumed that output control was part of market control, where it is possible to price output of a system effectively and where there is external competition as a reference.
- 30.2 Five pop fans
Rationale: Five pop fans. They are a random collection of people. They have no common purpose, or common leader and they do not see themselves as having a common identity.
- 30.3 Passive acceptance of work decisions
Rationale: Passive acceptance of work decisions. Members of an effectively functioning group will take an active interest in decisions affecting their work, rather than passively accepting them.
- 30.4 Position power
Rationale: Position power. A leader is someone who does not have to rely on position power alone.
- 30.5 Doesn't trust staff to carry out delegated tasks, wants to control all activities under his or her responsibility
Rationale: These suggest a lack of trust by the manager toward staff. The other reasons are likely to lead to reduced delegation in themselves.

- 30.6 Look for a wide variety of possible solutions, define the problem carefully, try to develop objectives resulting in mutual gains.
- Rationale:** Evaluating progress towards objectives will enhance team performance but would not be considered a negotiation technique. Monitoring others is not negotiation.
- 30.7 Allocating scarce resources
- Rationale:** Allocating scarce resources. This could be concerned with people as a resource but is not people-centred.
- 30.8 To take reasonable care of themselves
- Rationale:** To take reasonable care of themselves. Although there is an employer duty of care towards employees, this does not cover employee negligence or stupidity.
- 30.9 Shareholders, customers
- Rationale:** These are groups outside the organisation's boundary, in its environment. The others are within the boundary and belong to the organisation system.
- 30.10 Suspension without pay, dismissal
- Rationale:** Suspension without pay or demotion. Dismissal is a course of action an employer can take although not provided for specifically in the employee's contract of employment.
- 30.11 Task
- Rationale:** The matrix structure requires a culture that reacts quickly to change and focuses on particular projects or tasks as dictated by the needs of the business. A task culture will suit this best as it focuses on achievement of the task above all else, and is very flexible and reactive to changes in the environment.
- 30.12 Handy, Schein
- Rationale:** This quote is variously attributed to Schein and Handy. An organisation's culture is exclusive, shared and gives its participants a sense of community.
- 30.13 Suppliers, customers
- Rationale:** The other options are internal stakeholders.
- 30.14 Ensuring the organisation pursues its objectives and serves the needs of its owners and stakeholders
- Rationale:** The second option describes the 'operating core'. The third option is the 'middle line'.
- 30.15 Planning and preparing budgets, appraisal of capital investment projects
- 30.16 Sales ledger and receipts
- Rationale:** Teeming and lading is the theft of cheque receipts. Setting subsequent receipts against the outstanding debt conceals the theft.
- 30.17 Dishonesty, opportunity, motivation
- Rationale:** All three are essential: dishonesty, opportunity and motivation.
- 30.18 Systems
- 30.19 Person culture
- 30.20 Low concern for people and low concern for the task
- Rationale:** This option is the worst of both worlds.
- 30.21 Highly-strung, outgoing and dynamic and committed to the task
- Rationale:** The shaper thrives on pressure.

- 30.22 Encoded message, medium, decoded message
- 30.23 Consistency

Rationale: Consistency was found to be more important to subordinates than any particular style.
- 30.24 Reporting lines, job content. Salary and hours of work will be in the employment contract.

31 Mixed Bank 5

- 31.1 They can be used by non-specialists, they provide more consistent processing than manual systems.

Rationale: They can be used by non-specialists, they provide more consistent processing than manual systems. In fact it may be more difficult to see where a mistake has been made.
- 31.2 Employment protection

Rationale: The other areas are dealt with by a combination of best practice, codes and some legislation.
- 31.3 Falls

Rationale: Because chips are a complementary product to fish, a rise in the price of fish will lead to a fall in the demand for chips.
- 31.4 Reporting to shareholders, giving an opinion on financial statements.

Rationale: The other options are the responsibility of the internal auditor, and ultimately of management.
- 31.5 Wastage rates, labour utilisation figures.
- 31.6 There is a formal process for decision-making
- 31.7 Herzberg
- 31.8 Power associated with physical force or punishment

Rationale: Coercion means compelling someone to do something.
- 31.9 Managing team performance, organising the work of others

Rationale: The other options will generally be carried out by higher levels of management.
- 31.10 Work sampling

Rationale: Work sampling (via portfolios of work or trial periods, say) have the highest reliability (followed closely by cognitive selection tests). Personality testing and assessment centres (group selection exercises) are slightly less reliable. Interviews, ironically, have a very low predictive power – at about the same level as reference checking.
- 31.11 Managing diversity

Rationale: Equal opportunity is a narrower concept, based on securing non-discrimination on the basis of those 'crude' dimensions of individual difference (sex, age, disability and so on). Diversification is from an organisational strategy involving widening its range of products/markets.
- 31.12 Concrete experience, observation and reflection, abstract conceptualisation, active experimentation

Rationale: This may also be worded as: have an experience, review the experience, conclude from the experience and plan the next steps.

31.13 Scalar chain

Rationale: The scalar chain is the downward flow of delegated authority in an organisation and the need for reports to flow back 'up': it is often a source of slow communication and rigidity (eg in bureaucracies). Horizontal structure allows the flow of information and decisions across functional (vertical) boundaries: it is a key approach to flexibility. The 'Shamrock' is a form of numerical flexibility, where a firm has a core staff and a various peripheral 'leaves' which it can draw on as the demand for labour fluctuates.

31.14 Taking and circulating minutes of the meeting

Rationale: Minute-taking is one of the roles of the secretary, who essentially provides administrative support to the committee. The first option is the role of the chair, while the second and fourth options may be imposed on the committee by the authorities to which it reports.

31.15 Zeus

Rationale: Apollo is associated with role culture; Athena with task culture; Dionysus with person culture.

31.16 (1), (2), (3), (4) and (5)

Rationale: The founder influences culture through founding values; history/experience through creating expectations and stories; recruitment and selection by choosing people who will 'fit' (or change) the culture; industry by having its own culture; and labour turnover by allowing people who don't 'fit in' to 'get out'.

31.17 Boundary

Rationale: Boundaries are the rules that restrict management's freedom of action: they include legislation, regulation and contractual agreements. Responsibilities are obligations which a company voluntarily undertakes. The primary economic objective relates to optimal resource-conversion (eg profitability). Non-economic, social objectives modify management behaviour in line with stakeholder expectations.

31.18 Encourages consistent application of rules

Rationale: A framework approach sets out principles and guidelines, rather than detailed rules to cover every specific situation. This leads to listed advantages – but not to consistent application, since there is a high degree of discretion in applying guidelines to different cases.

31.19 Members do not challenge or criticise

Rationale: Failure to challenge or criticise is not a positive thing, in this context, but a symptom of poor communications: the 'building block' would be developing a climate in which people can speak their minds, constructively. The other options describe positive building blocks in the areas of membership, review and control and objectives. (The terminology of 'building blocks' and 'blockages' is drawn from a model by Woodcock, but it is not essential to know this.)

31.20 Time available to devote to the role

Rationale: This is a major problem for non-executive directors, because they are likely to have other commitments. You should have had to think through the other options, however. Some of the advantages of non-executive directors are that they offer a comfort factor for third parties such as investors and suppliers; they have a wider perspective and (hopefully) no vested interest; and they have a combination of knowledge/expertise and detachment.

31.21 Using local suppliers, minimising energy consumption

Rationale: Using local suppliers is part of the government's sustainability strategy, as it develops and preserves local business, employment and communities. Minimising energy consumption conserves resources. The other two options are not directly related to sustainability goals.

31.22 Macro-economics.

Rationale: Macro-economics looks at a complete national economy or economic system: factors such as economic activity and growth, inflation, unemployment and the balance of payments. The other options are pure distractors, drawn from other disciplines.

31.23 (1), (2) and (3)

Rationale: These are three of the ways that government can directly affect the economic structure, according to Porter. Demand is affected as the government is a major customer. Governments can affect capacity expansion, for example, by using taxation policies to encourage investment in equipment. Government can introduce regulations and controls within an industry which may affect growth and profits and may therefore affect competition.

31.24 A reasonable prospect of detecting irregular statements or records

Rationale: It is important for students to be realistic about what the external auditing function can achieve. (In other words, common sense should help to answer this type of question.)

32 Mixed Bank 6

32.1 Shareholders

Rationale: The shareholders are the owners, as they provide the capital for the business.

32.2 Analysts such as accountants and workplanners, whose objective is to effect standardisation in the organisation

Rationale: This is the definition of the 'technostructure' in Mintzberg's components of structure. D defines the 'strategic apex' component of the model.

32.3 Outsourcing production of the product to low-cost countries; consolidating purchases of the components and sourcing from a single supplier to reduce sourcing costs

Rationale: Secure continuity of supply and quality are Z's priorities. Long-term partnership helps secure both, while having a small number of suppliers avoids the risk of supplier failure.

32.4 Tactical management

Rationale: This is the definition of tactical management, carried out by middle management. Strategic management is at a higher level of establishing corporate direction and policy: carried out by senior management. Operational management is at a lower level of implementing the tactical plans: carried out by supervisors and operatives.

32.5 Corporate governance.

Rationale: Strategic management is a process which may or may not be carried out in a given organisation. Executive directorship and internal controls are elements of corporate governance.

32.6 It takes a higher proportion of income in tax as income rises.

Rationale: This is the definition of a progressive tax (such as income tax in general). The first option is a 'regressive' tax (such as road tax) which is the same for all people. The second option is a 'proportional tax' (such as Schedule E income tax within a limited range of income).

32.7 Dismissal because the employee is pregnant

Rationale: The first three are circumstances defined as redundancy. Dismissal on the grounds of pregnancy is automatically considered to be unfair dismissal.

- 32.8 (i)3, (ii)1, (iii)4, (iv)2
- Rationale:** This should be straightforward if you work through the options.
- 32.9 Extranet
- Rationale:** Researchers may connect to this network via the internet (world wide web), and the university may have an intranet for its own lecturers and students. An extranet, however, is an intranet that is accessible to authorised 'outsiders', using a valid username and password.
- 32.10 It maximises the attractiveness of the job and organisation to potential applicants
- Rationale:** Job advertisements must be positive, but they should also be honest, in order to manage applicants' (and future employees') expectations. The second and fourth options should be obvious. You may have hesitated over the first option, but advertisements should encourage unsuitable applicants to rule themselves out before applying (and wasting the organisation's time).
- 32.11 1(iii), 2(i), 3(ii).
- Rationale:** Motivation is the incentive to behave dishonestly: one part of this equation is the risks, and whether they are worth the rewards – so strong disciplinary penalties for fraud are a disincentive. Opportunity is having an opening for fraud: internal checks and controls (such as segregation of duties and authorisations) limit those openings. Dishonesty is a pre-disposition or tendency to behave unethically: it needs to be spotted early – ideally before a person joins the organisation!
- 32.12 Data management
- Rationale:** The database concept encourages management to regard data as an organisational resource, which needs to be properly managed. However, there are problems of data security and privacy, due to the potential for unauthorised access and sharing. If the organisation develops its own system from scratch, initial development costs will be high.
- 32.13 Hawthorne
- Rationale:** Hawthorne studies. These were carried out at the Hawthorne Plant of Western Electric. The Ashridge studies are a study in leadership styles (tells, sells, consults, joins). Hofstede's model describes dimensions of difference in national cultures.
- 32.14 To monitor PEST factors
- Rationale:** Political, Economic, Socio-cultural and Technological (PEST) factors are the external factors which may impact on the organisation. SWOT (strengths, weaknesses, opportunities and threats) incorporate data from the environmental scan, by analysing PEST factors that present opportunities and threats: however, the name given to this process is corporate appraisal. The third option would be called competitive intelligence.
- 32.15 Financial reporting
- Rationale:** IASs are standards for financial reporting: the preparation of financial statements and accounts. They are used as bases and benchmarks for companies and national standard-setting systems.
- 32.16 Keep informed
- Rationale:** Local nature appreciation groups would have high interest (due to potential environmental impacts) but relatively low power: because of their high interest, though, they might be able to band together or lobby to increase their power. So a 'keep informed' strategy is appropriate to segment B.

- 32.17 A strategy for investigating and dealing with the consequences of suspected or identified fraud

Rationale: Fraud response relates specifically to investigation and damage minimisation (not prevention), including: actions that will be taken to protect the security of records that will be required for identification; protection of vulnerable assets; investigation procedures; and crisis management. Implementing this plan would be the responsibility of a fraud officer.

- 32.18 Public services

Rationale: A growing economy is more easily able to provide welfare services without creating a heavy tax burden on the community. Growth has potential adverse effects for employment, where some sections of the population are unable to adapt to demands for new skills. It also has potential adverse effects for the environment, in terms of resource usage, pollution, emissions etc.

- 32.19 Focuses on people, innovates

Rationale: The other options are managerial attributes.

- 32.20 Deterrence

Rationale: Deterrence is an approach which seeks to minimise threats due to deliberate action, by creating penalties to 'put people off' attempting the action. Correction is an approach to ensure that vulnerabilities are dealt with when found. Detection is an approach to identifying vulnerabilities and attacks (eg keeping a log of patient records accessed or removed). Threat avoidance means eliminating a threat (eg by changing the system so no unauthorised access is possible).

- 32.21 A3, B1, C2.

Rationale: This should be straightforward if you think systematically through the process.

- 32.22 Social

Rationale: In the PEST model, social factors include demographics: the study of population structures and characteristics. Birth and mortality rates affect population numbers, distribution (if they are unequal in different areas) and age structure (lower birth and mortality rates creates an ageing population).

- 32.23 Interdependent

Rationale: Interdependence of team members is important, because no-one feels they could earn higher rewards on their own: everyone's contribution is necessary, and everyone 'pulls their weight'.

33 Mixed Bank 7

33.1 Statutory deductions from pay

Rationale: Non-statutory deductions (such as pension contributions) should be authorised, to prevent money being 'siphoned' off via non-existent deductions. However, statutory deductions are non-discretionary: they cannot not be authorised!

33.2 Expert power, negative power.

Rationale: The production mixer has expert power, because he has knowledge that is recognised and valued by the rest of the staff. The shop-floor staff exercise negative power: the power to disrupt operations. Neither have position power (organisational authority), nor (as far as we know) personal power, or charisma.

33.3 Jemima 3, Frank 1

Rationale: In Belbin's model, the Plant is the ideas person; the Monitor-Evaluator the discerning critic; and the Team worker the diplomatic relationship-builder.

33.4 Outsourcing carries commercial and reputational risks.

Rationale: There are several risks associated with outsourcing: being locked in to an unsatisfactory relationship; losing in-house assets and knowledge; sharing confidential information; and 'reputational' risk (if the supplier gives poor service, or is found to be unethical in its practices, say). The other statements are untrue: an organisation should not outsource its 'core competences' (areas of unique and non-replicable competitive advantage); outsourcing often creates economies of scale (taking advantage of the larger dedicated resources of the contractor); and outsourcing still incurs significant costs, including internal costs of managing the relationship.

33.5 Process theory

Rationale: Process theories explore the process by which individuals come to value, select and explore goals: in other words, **how** people become motivated. Content theories (including Maslow's hierarchy of needs and Herzberg's two-factor theory) explore the needs that motivate people to act in certain ways: in other words, **what** motivates people.

33.6 Introducing reporting by exception

Rationale: Reporting by exception means only reporting to managers when there is a deviation from plan. The first and third options would increase information flow. The fourth option would not address the problem: information overload is about excessive complexity as well as volume!

33.7 The balance in a manager's leadership style between concern for the task and concern for people and relationships

Rationale: This is straightforward, if you recall the managerial grid. It does not represent a continuum because it assumes that the two things are compatible: they can both be high or low at the same time. The grid can be used in appraisal, to focus attention on the manager's approach, but does not indicate 'success' or effectiveness.

33.8 Closed, probing

Rationale: Closed questions pin the candidate down to either/or options. Probing questions push for an answer where a candidate is being vague. Open questions wouldn't work here, because they give the candidate space to answer in any way (s)he wishes. You may have hesitated over leading questions, but these would encourage the candidate to give a **particular** reply, suggested by the interviewer – not to pin down what the candidate meant.

- 33.9 Instrumental orientation
- Rationale:** An instrumental orientation accounts for why some people take jobs offering high monetary rewards rather than intrinsic interest or job satisfaction (up to a certain point). Job enrichment is a form of job design which more or less assumes the opposite: that people seek intrinsic satisfactions in work itself. Theory Y is irrelevant, relating to McGregor's Theory X and Theory Y.
- 33.10 An approach to appraisal interviewing
- Rationale:** 'Tell and listen' is one of Maier's three approaches to appraisal interviewing: 'tell and sell' and 'problem-solving' are the other two approaches.
- 33.11 A gap between current performance and required performance is a learning gap which requires training.
- Rationale:** A gap between current 'competence' and required 'competence' may be amenable to learning or training. A gap between current 'performance' and required 'performance', however, may be caused by other problems to do with supervision, systems, resources, motivation and other factors. The other options are true.
- 33.12 Award of a departmental prize for your performance, receiving praise on an achievement from your work team
- Rationale:** Esteem needs are for recognition and respect from others. The other options relate to self-actualisation and social need.
- 33.13 Dorming
- Rationale:** This is the definition of dorming. Forming is a 'getting to know each other' stage; norming the development of agreed ways of behaving; and storming a stage of conflict and testing.
- 33.14 1(1), 2(5), 3(2), 4(4), 5(3)
- Rationale:** This should be straightforward, if you work through the options carefully. A person specification is prepared from a job description. Testing follows interviewing, as a more rigorous form of selection. Reference checking comes last, as it only applies to candidates who are potentially going to be offered a job.
- 33.15 Mentor
- Rationale:** A coach is often the trainee's immediate superior: indeed, coaching is accepted as a style of management/leadership. A mentor is not usually the immediate superior of the protégé, so that there can be open, confidential discussion of work and non-work issues.
- 33.16 Cognitive psychology
- Rationale:** Cognitive psychology argues that the human mind uses feedback information on the results of past behaviour to make rational decisions about whether to maintain successful behaviours or modify unsuccessful behaviours, according to the outcomes we want. Behaviourist psychology focuses on the relationship between stimuli and responses: we are 'conditioned' to respond in ways that are repeatedly positively reinforced (rewarded) and to avoid behaviours that are repeatedly negatively reinforced (punished). The third option is not a learning theory, and the fourth is a particular learning model (by Honey & Mumford) not relevant here.

- 33.17 The auditor's mandatory authority, the auditor's own professionalism

Rationale: The third element in the auditor's independence is the responsibility structure – which does **not** mean freedom from accountability. The internal auditor is accountable to the highest executive level in the organisation (preferably the audit committee of the board of directors). The auditor's involvement in the activities being appraised is the opposite of independence: internal auditors should not install new procedures or systems, or engage in activities, which they will later have to appraise – as this might (or might be seen to) compromise their independence.

- 33.18 The organisation is looking to introduce a culture of innovation for the first time

Rationale: Cultural change is a good reason to seek 'new blood' in management, rather than promote people who are used to thinking in familiar ways. The first and third options argue for internal promotion as a matter of policy and staff retention and as a way of preserving culture.

- 33.19 Level of risk for acquiring new skills

Rationale: Off-the-job training allows people to make mistakes in learning, without the costs and consequences of making the same mistakes on the job. However, formal courses may **not** always be directly relevant to the circumstances of the job and workplace, and it may not be easy to 'transfer learning' from the classroom to the job, for various reasons. Meanwhile, formal courses take people away from work. You could think of the other options as advantages of on-the-job training.

- 33.20 Victimisation

Rationale: Remember that direct discrimination is less favourable treatment of a protected group. Indirect discrimination is when requirements cannot be justified on non-discriminatory grounds.

- 33.21 Monitoring numbers and performance of ethnic minority staff

Rationale: This is likely to be a sensitive issue. How do you identify job applicants' ethnic origins without potentially causing offence or suspicion? How do you apply particular performance monitoring to ethnic minority staff without seeming to discriminate? All the other options are much more straightforward!

- 33.22 Considering whether directors act on internal audit information

Rationale: The first three options are internal checks to an internal control system. External auditors will need to check that directors and management act on any internal audit recommendations.

- 33.23 1(iii), 2(iv), 3(ii), 4(v), 5(i)

Rationale: The lowest level is how trainees feel about the training: this is an inexact measure of results. Level 2 is trainee learning, measuring what the trainees have learned (what they know or can do at the end of the course, compared to pre-training tests): the likely focus of trainers. Level 3 is changes in job behaviour, which measures whether learning has been **applied** successfully to the job: the likely focus of departmental managers. Level 4 is whether these changes result in measurable performance gains for the organisation: the likely focus of senior management's cost-benefit analysis of training. Level 5 (which many organisations never reach) is evaluating impacts on 'wider' goals such as greater social responsibility.

33.24 Card entry systems, personal identification numbers

Rationale: Physical access controls are basically 'lock and key' systems – basic though that may sound! Card entry and PIN systems are ways of identifying yourself (by swipe card and keypad entry respectively) in order to gain authorised entry to an area or storage device. Logical access systems are non-physical access controls, involving password-protected access to data in the system. Back-ups are not access controls at all: they are integrity and/or contingency controls.

33.25 False

Rationale: Connected stakeholders include shareholders, customers, suppliers and financiers. Don't confuse this with internal stakeholders which include employees and management.

Mock exams

Foundations in Accountancy/ACCA Business and Technology (FBT/BT)

Mock Examination 1 Specimen Exam

Questions	
Time allowed	2 hours
This exam is divided into two sections:	
Section A – ALL 46 questions are compulsory and MUST be attempted Section B – ALL SIX questions are compulsory and MUST be attempted	

**DO NOT OPEN UNTIL YOU ARE READY TO START UNDER
EXAMINATION CONDITIONS**

SECTION A

ALL 46 questions are compulsory and MUST be attempted

- 1 The major purpose of the International Accounting Standards Board (IASB) is to ensure consistency in _____.
- Which two words complete the sentence above?
- Financial control
 - Corporate reporting
 - External auditing
- (1 mark)
-
- 2 The leadership style that least acknowledges the contribution that subordinates have to make is.
- Which word correctly completes the sentence above?
- Authoritarian
 - Autocratic
 - Assertive
- (1 mark)
-
- 3 In relation to the management of conflict, which of the following approaches will maximise the prospect of consensus?
- Acceptance
 - Negotiation
 - Avoidance
 - Assertiveness
- (2 marks)
-
- 4 Darragh has been appointed to the management team of a professional football club. His role includes coaching, mentoring and counselling young players who have just signed contracts with the club for the first time.
- Will the following activities be related to his role as coach, mentor or counsellor?
- | | Coaching | Mentoring | Counselling |
|---|-----------------------|-----------------------|-----------------------|
| Identifying each player's key skills and encouraging them to develop new skills | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Helping the players to anticipate opponents' reactions | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Advising the players on addressing personal issues, such as managing their finances | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Helping the young players to settle in during their first week | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
- (2 marks)
-

- 5 In order to ensure that the policies of an organisation are consistent with the public interest, on which of the following should the directors of a company focus?
- The long-term welfare of the shareholders
 Compliance with legal requirements and codes of governance
 The collective well-being of stakeholders
- (1 mark)
-
- 6 Martin is an experienced and fully trained shipbuilder, based in a western European city. Due to significant economic change in supply and demand conditions for shipbuilding in Martin's own country, the shipyard he worked for has closed and he was made redundant. There was no other local demand for his skills within his own region and he would have to move to another country to obtain a similar employment, and could only find similar work locally through undertaking at least a year's retraining in a related engineering field.
- Which of the following describes the type of unemployment that Martin has been affected by?
- Structural unemployment
 Cyclical unemployment
 Frictional unemployment
 Marginal unemployment
- (2 marks)
-
- 7 Which of the following is the main function of marketing?
- To maximise sales volume
 To identify and anticipate customer needs
 To persuade potential consumers to convert latent demand into expenditure
 To identify suitable outlets for goods and services supplied
- (2 marks)
-
- 8 Which TWO of the following are the consequences of a listed company failing to file its accounts?
- Investigation of its financial affairs by a government department or agency
 Imposition of a fine by the government's company registration body
 Refusal of the external auditor to sign the financial accounts
 Suspension of dealings in securities by the stock exchange
- (2 marks)
-
- 9 The overall average age of a population in a country is directly dependent on two demographic factors: Birth rate and death rate.
- Assuming equal rates of change, will each of the following lead to an overall ageing of the population?
- | | Yes | No |
|-----------------------|-----------------------|-----------------------|
| Increasing death rate | <input type="radio"/> | <input type="radio"/> |
| Decreasing birth rate | <input type="radio"/> | <input type="radio"/> |
- (2 marks)
-

- 10 Gils is conducting an appraisal interview with his assistant Jill. He initially feeds back to Jill areas of strengths and weaknesses of performance but then invites Jill to talk about the job, her aspirations, expectations and problems. He adopts a non-judgemental approach and offers suggestions and guidance.

This is an example of which approach to performance appraisal?

- Tell and sell approach
- Tell and listen approach
- Problem solving approach
- 360 degree approach

(2 marks)

- 11 What is the primary responsibility of the external auditor?

- To verify all the financial transactions and supporting documentation of the client
- To ensure that the client's financial statements are reasonably accurate and free from bias
- To report all financial irregularities to the shareholders of the client
- To ensure that all the client's financial statements are prepared and submitted to the relevant authorities on time

(2 marks)

- 12 Which TWO of the following are examples of tactical information?

- Annual forecasts of revenues and costs for a department
 - Product development plans for the next 2 – 3 years
 - Targets agreed by key managers at their performance appraisal interviews (1 mark)
-

- 13 Wasim is the Customer Services Manager in a large leisure park. The forthcoming weekend is going to be the busiest of the year, as it is a public holiday. Wasim has to cope with several absentees, leaving him short-staffed in public areas of the park. His manager has told him that he expects him to catch up with some administrative reports that were due last week. Wasim also has to arrange for six new staff to be trained, who will be arriving imminently.

In order to manage his workload most effectively, what should Wasim do?

- Prioritise the tasks in relation to the most important business outcomes
 - Deal with the reports that the manager insists be prepared
 - Train the new recruits
 - Carry out some of the work that the absentees would normally do (2 marks)
-

- 14 In order to discharge their duties ethically, finance directors must ensure that the information published by their organisations provides a complete and precise view of the position of the business, without concealing negative aspects that may distort the reader's perception of its position.

This duty describes which of the following ethical principles?

- Probity
- Honesty
- Independence
- Objectivity

(2 marks)

- 15 Which of the following is a purpose of the International Federation of Accountants?

- Agreement of legally binding financial reporting standards across all member accountancy organisations
- Prevention of international financial crimes, such as money laundering and insider dealing
- Promotion of ethical standards in all member organisations
- Development of universally applicable detailed rules to deter inappropriate behaviours

(2 marks)

- 16 The following government policies can be used to expand or slow down the level of economic activity.

Are each of the following consistent with a government's policy objective to expand the level of economic activity?

	Yes	No
An increase in taxation	<input type="radio"/>	<input type="radio"/>
An increase in public expenditure	<input type="radio"/>	<input type="radio"/>

(2 marks)

- 17 Neill works as the procurement manager of JL Company, a large services company.

Information provided by Neill is most relevant to which of the following elements of the marketing mix?

- Physical evidence
- Distribution (or place)
- Price
- Processes

(2 marks)

- 18 In relation to employee selection, which type of testing assesses the depth of knowledge of a candidate and the candidate's ability to apply that knowledge?
- Intelligence testing
 - Competence testing
 - Psychometric testing
- (1 mark)
-

- 19 Malachi has been asked by his manager to analyse the financial accounts of ABC Company, which is bidding for a contract offered by Malachi's company in the near future. The two financial statements which he will be using as his sources are the statement of financial position and the statement of profit or loss.

From which financial statements will Malachi obtain the following information?

	Statement of financial position	Statement of profit or loss
The equity of the company	<input type="radio"/>	<input type="radio"/>
Operating costs as a percentage of turnover	<input type="radio"/>	<input type="radio"/>
Long-term borrowings	<input type="radio"/>	<input type="radio"/>
Liquidity	<input type="radio"/>	<input type="radio"/>

(2 marks)

- 20 Linh owns a busy restaurant. She has had complaints from regular customers about diners failing to control their noisy and unruly children, which is spoiling their dining experiences.

Which of the following courses of action would be regarded as a pluralist solution to this problem?

- Setting aside a separate section of the restaurant for families with children
 - Not accepting bookings from families with children
 - Advising customers that the restaurant is a family restaurant before they book
 - Taking no action, assuming that those who complain will always be a minority
- (2 marks)
-

- 21 Which of the following is data protection legislation primarily designed to protect?

- All private individuals and corporate entities on whom only regulated data is held
 - All private individuals on whom only regulated data is held
 - All private individuals on whom any data is held
- (1 mark)
-

- 22 Which of the following is an example of the system used by a company to record sales and purchases?

- A transaction processing system
 - A management information system
 - An office automation system
 - A decision support system
- (2 marks)
-

- 23 Which TWO of the following are examples of connected stakeholders?
- Manager
 Customer
 Executive Director
 Supplier
- (2 marks)
-
- 24 In an economic environment of high price inflation, those who owe money will gain and those who are owed money will lose.
- Is this statement true or false?
- True
 False
- (1 mark)
-
- 25 Role playing exercises using video recording and playback would be most effective for which type of training?
- Development of selling skills
 Regulation and compliance
 Dissemination of technical knowledge
 Introduction of new processes or procedures
- (2 marks)
-
- 26 Renata has attended a leadership development course in which she experienced a self-analysis exercise using the Blake and Mouton managerial grid. The course leader informed her that the results suggested that Renata demonstrated a 9·1 leadership style.
- Which TWO conclusions may be drawn in relation to Renata's leadership style?
- She maximises the involvement of her team
 She demonstrates little concern for people in the team
 She balances the needs of the team with the need to complete the task
 She is highly focused on achieving the objectives of the team
- (2 marks)
-
- 27 The implementation of a budgetary control system in a large organisation would be the responsibility of the internal auditor.
- Is this statement true or false?
- True
 False
- (1 mark)
-
- 28 Which TWO of the following are roles of an external auditor?
- Confirming that the financial accounts present a true and fair view
 Confirming that there are appropriate policies for preventing and detecting fraud
 Confirming that the financial accounts have been prepared in accordance with legal requirements
- (1 mark)
-

- 29 Professional accountants must demonstrate integrity at all times.
 Which of the following describes the meaning of integrity?
 Applying consistently high moral values
 Maintaining a neutral and unbiased view on all business decisions
 Provide timely and accurate information free from errors (1 mark)
-
- 30 Which TWO of the following are characteristics of a public limited company but not a co-operative?
 Maximising the excess of income over expenditure not a primary objective
 Members can vote according to the number of shares owned
 Shares can be bought and sold through personal transactions of the members
 All members are invited to attend the annual general meeting and participate in decisions at the meeting (2 marks)
-
- 31 A company has advertised for staff who must be at least 1.88 metres tall and have been in continuous full-time employment for at least five years.
 Which of the following is the legal term for this practice?
 Direct discrimination
 Indirect discrimination
 Victimisation
 Implied discrimination (2 marks)
-
- 32 Which of the following statements is correct in relation to monetary rewards in accordance with Herzberg's two-factor theory?
 Pay increases are a powerful long-term motivator
 Inadequate monetary rewards are a powerful dissatisfier
 Monetary rewards are more important than non-monetary rewards
 Pay can never be used as a motivator (2 marks)
-
- 33 In a higher education teaching organisation an academic faculty is organised into courses and departments, where teaching staff report both to course programme managers and to subject specialists, depending on which course they teach and upon their particular subject specialism.
 According to Charles Handy's four cultural stereotypes, which of the following describes the above type of organisational structure?
 Role
 Task
 Power
 Person (2 marks)
-

- 34 Which pattern of communication is the quickest way to send a message?
- The circle
 The chain
 The Y
 The wheel
- (2 marks)
-
- 35 Kelly is discussing a business problem with Pawel on the telephone.
Who will be involved in 'encoding' the communication that takes place?
- Kelly
 Pawel
 Kelly and Pawel
- (1 mark)
-
- 36 Which of the following types of new legislation would provide greater employment opportunities in large companies?
- New laws on health and safety
 New laws to prevent discrimination in the workplace
 New laws making it more difficult to dismiss employees unfairly
 New laws on higher compensation for employer breaches of employment contracts
- (2 marks)
-
- 37 What is the responsibility of a Public Oversight Board?
- The establishment of detailed rules on internal audit procedures
 The commissioning of financial reporting standards
 The creation of legislation relating to accounting standards
 The monitoring and enforcement of legal and compliance standards
- (2 marks)
-
- 38 Adrian is the manager of a call centre. Consultants have advised him that by reorganising his teams to complete highly specific tasks the call centre will be able to increase the throughput of work significantly, as well as increasing the number of sales calls made to the public. The reorganisation proposals are unpopular with many workers, who feel that their jobs will become tedious and repetitive.
- The proposal to reorganise the work of the call centre utilises principles put forward by which school of management thought?
- The administrative school
 The empirical school
 The scientific school
- (1 mark)
-

- 39 The aggregate level of demand in the economy is made up of government expenditure, _____, _____ and net gains from international trade.

Which TWO of the following correctly complete the sentence above?

- Savings
- Taxation
- Investment
- Consumption

(2 marks)

- 40 In the context of marketing, the 'four Ps' are price, promotion, _____ and _____.

Which TWO words correctly complete the above sentence?

- Product
- Positioning
- Place

(1 mark)

- 41 Which of the following is an advantage of decentralisation?

- Risk reduction in relation to operational decision-making
- More accountability at lower levels
- Consistency of decision-making across the organisation

(1 mark)

- 42 FKT Company is considering the introduction of a code of ethics following media criticism of its selling practices.

Which of the following is the most important when deciding on the content of the proposed code of ethics?

- The minimum acceptable standards of behaviour and conduct of employees
- The legal requirements affecting the sales of core products and services
- The main issues of concern to customers who have made complaints
- The generally accepted standards by other companies operating in the same sector

(2 marks)

- 43 Ahmed is preparing his personal development plan. He is particularly concerned about how others see him.

In order to analyse this aspect of his personal development plan further, Ahmed should consider which TWO of the following?

- Strengths
- Opportunities
- Weaknesses

(1 mark)

- 44 Jackie leads an established team of six workers. In the last month, two have left to pursue alternative jobs and one has commenced maternity leave. Three new staff members have joined Jackie's team.

Which of Tuckman's group stages will now occur?

- Norming
- Forming
- Performing
- Storming

(2 marks)

- 45 In the context of fraud, 'teeming and lading' is likely to occur in which area of operation?

- Sales
- Quality control
- Advertising and promotion
- Despatch

(2 marks)

- 46 Which of the following statements is true in relation to the average revenue function of a business in a perfect market?

- It is diagonal
- It is horizontal
- It is vertical

(1 mark)

SECTION B

ALL SIX questions are compulsory and MUST be attempted

- 1 Here are four short references to the function of management:
- A There are essentially five functions of management that apply to any organisation
 - B Individual and group behaviour at work is a major factor in productivity.
 - C Management is the development of a true science of work.
 - D The manager of a business has one basic function – economic performance.

Required:

- (a) Select the correct reference for each writer.

Peter Drucker

Elton Mayo

Henry Mintzberg

F W Taylor

Picklist:

- Reference A
- Reference B
- Reference C
- Reference D
- None of the references

(2 marks)

- (b) From the list below identify TWO of Henri Fayol's functions of management.

- Planning
- Organising
- Managing
- Monitoring
- Motivating

(2 marks)

(Total = 4 marks)

- 2 (a) XYZ company installed a computer system to handle its main accounting functions including accounts receivable, accounts payable and payroll. Management have a number of concerns about access to the system and are considering a number of controls to overcome these concerns.

Is each of the following a general control or an application control?

	General Control	Application Control
Locking the computer room to prevent access to non-employees.	<input type="radio"/>	<input type="radio"/>
Limiting access to the payroll system by making it password protected.	<input type="radio"/>	<input type="radio"/>
Taking backup of data files each evening and holding backup copies off-premises.	<input type="radio"/>	<input type="radio"/>
Providing basic IT training to the entire staff to prevent errors in using the system.	<input type="radio"/>	<input type="radio"/>

(2 marks)

- (b) The company has considerable cash collections on a regular basis. The cashier receives the cash, records it and then banks it at the end of each day. Since a single person is responsible for access to cash, the financial director is concerned that fraud and error may occur in cash handling and recording. He proposes use of appropriate internal controls to prevent any such errors or misappropriations.

The following sentences describe internal controls which could be used to prevent fraud and errors. Select the correct internal control to complete each sentence.

Fraud and errors in handling cash can be prevented through since no one individual could record and process a complete transaction.

Even if such a measure were introduced, the possibility exists that staff could act together to perpetrate fraud and bypass this control.

This can be prevented through as it would ensure awareness of the heavy sanctions to be imposed in cases of dishonesty.

Picklist:

- Segregation of duties
- Internal audit
- Authorisation limits
- Induction and training

(2 marks)

(Total = 4 marks)

- 3 There are a number of ways of developing staff on a one-to-one basis within organisations. Each has its own strengths and weaknesses and is appropriate in different work situations. Examples of types of development include coaching, mentoring, counselling and appraising. For each type of development below, which work situation is most appropriate?

(a)		Coaching	Mentoring	Counselling	Appraising
	An interview to help another person to identify and work through a problem.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	A long term relationship in which a more experienced person encourages an individual's personal and career development.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	An approach whereby a trainee is put under the guidance of an experienced employee who shows the trainee how to perform tasks.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	An interview, the aim of which is to review performance and identify training and development needs.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

(2 marks)

- (b) An organisation uses mentoring as a form of one-to-one personal development. Which TWO of the following are benefits of this approach?

- Determine remuneration
- Decide promotions
- Career and personal development
- Resolve a grievance
- Demonstrating how to perform
- Using experienced staff for training
- Providing a role model for an employee

(2 marks)

(Total = 4 marks)

- 4 Sport-4-Kidz is a charitable organisation that operates a sports centre in a large city. The land on which the playing fields and facilities are located is held on behalf of the charity by Donna and Dietmar, the two trustees. Donna and Dietmar simply hold the land on behalf of Sport-4-Kidz and play no role in running the charity. They are rarely contacted by the management of the charity. However, they are the only people who are able to enter into contracts in relation to the land and its use.
- Sport-4-Kidz is managed and operated by a management committee. The committee has decided on a major expansion of facilities by building a new sports hall. The committee has the power to legally bind the charity in all matters other than the land. Their decisions are overseen by the government charity regulator, which generally sanctions the charity's decisions except in relation to financial reporting.

The management committee is negotiating with four building companies.

The proposed expansion of the facilities has angered the local residents, many of whom are concerned about heavy building site traffic and the danger posed to their children. Many believe that the design of the new sports hall is ugly and insensitive. Three well-respected local politicians serve on the residents' committee.

- (a) For each of the following, indicate whether they are internal, connected or external stakeholders.

	Internal	External	Connected
Donna and Dietmar	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Local residents	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Members of the management committee	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
The four building companies	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

(2 marks)

- (b) Complete the following table about Sport-4-Kidz stakeholders, with reference to Mendelow's grid.

Stakeholder	Stakeholder category	Communication strategy
Building companies	<input type="text"/>	<input type="text"/>
Local residents	<input type="text"/>	<input type="text"/>
Picklist:		Picklist:
		Kept informed Kept satisfied Treated as key player

(2 marks)

(Total = 4 marks)

- 5 (a) Select FOUR words which are fundamental principles of ethical behaviour from the IFAC (IESBA) and ACCA codes of ethics.

Integrity

Honesty

Trustworthiness

Expertise

Professional behaviour

Confidentiality

Respectfulness

Objectivity

(2 marks)

- (b) Select FOUR factors in the list below, which distinguish a profession from an occupation.

- Acting in the public interest
- Highly skilled
- Ethical codes of conduct
- Governance by association
- Highly valued services
- Training requirement
- Process of certification
- Qualification by examination

(2 marks)

(Total = 4 marks)

- 6 Company A is an accountancy professional body which has a tall structure and a high level of centralisation. The span of control is very narrow. Subordinates have minimal latitude for self-determination or to influence decision-making and mainly concentrate on carrying out highly prescribed and defined roles.

Company B is a financial services company which gives a wide ranging role to its traders and promotes cultural values such as assertiveness, risk appetite, and encourages a high degree of competition between employees. The employees are usually young and unmarried and work and socialise together for long hours at a frantic pace.

Company C is a research and development company where the business is divisionalised by product. Staff work very flexibly and often need to communicate laterally to achieve objectives through ad hoc projects and collaboration. There are no formal rules about reporting structures, or about set starting or finishing times. Staff are rewarded on the basis of creativity and innovation.

Company D is a family company which is highly controlled by the owners and the CEO is the main shareholder. There is a very low staff turnover, but employees are expected to be very loyal to the company and are often required to work long hours and carry out tasks outside their normal range of duties. Relationships between employees and managers are

very informal and close, and the rights of employees and their overall interests are strongly defended by the owners when challenged.

For each of the four companies above, select the cultural dimension concerned and the level at which the company is demonstrating this cultural dimension.

	Dimension	Level
Company A	<input type="text"/>	<input type="text"/>
Company B	<input type="text"/>	<input type="text"/>
Company C	<input type="text"/>	<input type="text"/>
Company D	<input type="text"/>	<input type="text"/>

Picklist:

Power distance
Uncertainty avoidance
Individualism
Masculinity

Low

(4 marks)

Answers to Mock Exam 1

**DO NOT TURN THIS PAGE UNTIL YOU HAVE
COMPLETED THE MOCK EXAM**

SECTION A

1 Corporate reporting

The IASB seeks to promote consistency in corporate reporting by creating internationally accepted financial reporting standards.

2 Autocratic

This is the least participative of the styles in the Ashridge model.

3 Negotiation

Negotiation gives the best opportunity for the two sides in a conflict to converge their positions. The other options either involve backing down, forcing a position, potentially increasing conflict, or leaving the issue unresolved.

4 Helping the young players to settle in during their first week – Mentoring

Identifying each player's key skills and encouraging them to develop new skills – **Coaching**

Advising the players on addressing personal issues, such as managing their finances – **Counselling**

Helping the players to anticipate opponents' reactions – **Coaching**

Mentors usually help staff on broader work related development, including orientation and induction. Coaches work on developing specific skills of the job itself, while counsellors work with people on a personal level, perhaps if they are having non-work related or emotional problems.

5 The collective well-being of stakeholders

By considering the collective well-being of all stakeholders an organisation will make decisions that are in the public interest.

6 Structural unemployment

Because of the particular circumstances of the scenario where someone is made redundant from an industry in decline where skills cannot be easily transferred, where re-training might take a long time or where work is not available in the short term within a reasonable geographic proximity, this is classed as structural unemployment.

7 To identify and anticipate customer needs

The basic principle that underlies marketing is that it is a management process that identifies and anticipates customer needs. The other distractors in the question refer to specific activities undertaken by a sales or promotion function.

8 Imposition of a fine by the government's company registration body

Suspension of dealings in securities by the stock exchange

The normal sanctions in such a case is that fines are imposed on companies by the registration body of the company and, where listed, the company may be delisted by the stock exchange authorities. Although the option wasn't included, sanctions against responsible directors may also be imposed.

9 Decreasing birth rate – Yes

Increasing death rate – No

The ageing population trend is caused by a decreasing birth rate and a decreasing mortality rate.

10 Tell and listen approach

The 'tell and listen' approach encourages input from the individual, promoting participation in the process by the appraisee.

- 11 To ensure that the client's financial statements are reasonably accurate and free from bias
- The external auditor has to ensure that the financial statements of the organisation truly reflect the activities of the business in the relevant accounting period. This assessment should be independent and therefore free from subjectivity on the part of the management of the client organisation.
- 12 Annual forecasts of revenues and costs for a department and targets agreed by key managers at their performance appraisal interviews
- Tactical information is medium term in nature and so does not include the long term product development plans, but does include annual forecasts and targets from performance appraisals.
- 13 Prioritise the tasks in relation to the most important business outcomes
- An employee with a range of tasks or objectives to achieve and pressures to achieve them to set deadlines, should always prioritise tasks in accordance to business importance. Deciding on other criteria such as pressure applied by colleagues, whether someone is absent or not or simply because a task is urgent may damage wider business objectives.
- 14 Objectivity
- A professional accountant acting in accordance with the fundamental ethical principles is demonstrating objectivity when they give a complete and precise view, which by implication means that negative aspects should not be concealed or positive aspects accentuated.
- 15 Promotion of ethical standards in all member organisations
- IFAC has no legal powers against businesses, nor does it set financial reporting standards. It is an accounting association member body which promotes educational and ethical standards of behaviour amongst its member bodies, through a code of ethics and behaviour, but does not prescribe detailed rules on this.
- 16 An increase in taxation – No
An increase in public expenditure – Yes
- Increasing taxation leaves individuals with less disposable income for expenditure within the economy thereby slowing economic activity. The same effect is caused by a reduction in government expenditure. Therefore economic activity can be stimulated by reducing taxation and increasing government expenditure.
- 17 Price
- Information on purchase costs of finished goods or raw materials is important in establishing the price of a product. In terms of the marketing mix, this information is most relevant to the price element as prices should be set at least to cover cost and give an acceptable level of profit.
- 18 Competence testing
- Competence testing is most appropriate when testing a specific skill.
- 19 The equity of the company – Statement of financial position
Operating costs as a percentage of turnover – Statement of profit or loss
Long-term borrowings – Statement of financial position
Liquidity – Statement of financial position
- These answers correctly match the information required to the particular financial statement in which they are to be found.

20 Setting aside a separate section of the restaurant for families with children

The pluralist solution is to cater for the needs of more than one stakeholder group without seriously compromising the interests of any individual group. Therefore setting aside a special area for families with children while having an adults only section would achieve this. The other options involve adversely affecting the rights of one or other group of stakeholders in some way.

21 All private individuals on whom only regulated data is held

Data protection legislation applies only to regulated data and is designed to protect the interests of private individuals only.

22 A transaction processing system

A transaction processing system records a company's transactions, such as its sales and purchases.

An office automation system automates certain business processes.

A management information system processes information held by a business to help support management decisions. A decision-support system would analyse information.

23 Customer**Supplier**

Customers and suppliers deal closely on a transactional basis with the organisation, but they are not internal stakeholders like managers and executive directors.

24 True

In a period of high price inflation the value of money is reduced over time, so those who owe money are better off and those who are owed money lose out.

25 Development of selling skills

Role playing exercises are most effectively used for skills development, including sales training. Other common business applications include effective selection interviewing and performance appraisal interviewing.

26 She demonstrates little concern for other people in the team**She is highly focused on achieving the objectives of the team**

The Blake and Mouton managerial grid enables leadership styles to be categorised on a nine point scale with reference to concern for production and concern for people. Renata is therefore highly concerned with the task and much less interested in her team as individuals.

27 False

Internal auditors are responsible for monitoring the effectiveness of systems, not implementing them.

28 Confirming that the financial accounts present a true and fair view**Confirming that accounts have been prepared in accordance with legal requirements**

External auditors are responsible for ensuring that the financial statements show a true and fair view and that they comply with legal requirements. Directors are responsible for ensuring that systems are in place to prevent and detect fraud.

29 Applying consistently high moral values

Integrity is often described as being honest and applying morality to decisions. Accuracy relates to professional competence and being neutral does not indicate morality.

- 30 **Members can vote according to the number of shares owned**
Shares can be bought and sold through personal transactions of the members
Only shareholders have voting power related to the number of shares that they own. Members of a co-operative organisation can vote but will only have one vote. Co-operatives may be owned by members, but ownership stakes cannot be exchanged between members unless the members belong to limited companies.
- 31 **Indirect discrimination**
To discriminate against someone on the grounds of characteristics which are predominately associated with their sex, gender, nationality or religion is illegal. As women are generally shorter than men, to restrict admission on the basis of height, indirectly discriminates against women. The other options are either direct discrimination, or other illegal and undesirable employment practices.
- 32 **Inadequate monetary rewards are a powerful dissatisfier**
According to Herzberg, money is a hygiene factor (or dissatisfier). Although it is a powerful short-term motivator, it is questionable whether each individual increase in monetary reward will have a major long-term effect. According to Herzberg, 'A reward once given becomes a right'.
- 33 **Task**
The task culture is appropriate where organisations can accommodate the flexibility required to adjust management and team structures to address the tasks that must be fulfilled. This is very common in large consultancy firms.
- 34 **The wheel**
The wheel facilitates transmission of the message directly to all receivers and therefore transmits most quickly.
- 35 **Kelly and Pawel**
In a two-way communication link, both parties need to encode messages and both have to decode them in order for the communication to be understood.
- 36 **New laws to prevent discrimination in the workplace**
Equal opportunity policies widen opportunity and enlarge the potential pool of employees to recruit from. The other options either indirectly or directly reduce the potential for staff turnover and therefore limit the number of job vacancies available at any point in time.
- 37 **The monitoring and enforcement of legal and compliance standards**
The primary aim of a public oversight board is to eliminate or minimise any actual or potential breaches of legislative requirements and to ensure compliance with regulations applicable to organisations within their terms of reference.
- 38 **The scientific school**
Maximising efficiency in production (as in the scenario) is a feature of scientific management..
- 39 **Investment and consumption**
The components of effective demand in the economy are consumer spending, investment by enterprises, central and local government expenditure and the net gains from international trade.
- 40 **Product**
Place
The four Ps are Price, Promotion, Product and Place.

41 More accountability at lower levels

Decentralisation involves having greater authority and power at lower levels of the organisation and accountability goes with this power.

42 The minimum acceptable standards of behaviour and conduct of employees

Compliance with legal requirements may not eliminate unethical behaviour. The issues of concern to those who complain may not be fully representative of issues of concern to customers in general. Other companies in the sector may not be concerned about ethical behaviour.

43 Strengths, Weaknesses

Using SWOT analysis, the strengths and weaknesses are the relevant points as these are internal to the individual and these are the factors that would influence the opinions of others.

44 Forming

As new members have just joined the group, essentially the group is reforming which is the start of a new group development process. The other options are all later stages in group development as identified by Tuckman.

45 Sales

Teeming and lading involves the theft of cash and is a type of fraud that is carried out by manipulating transactions. There would be most potential for this fraud within the sales department where cash may be received and remitted.

46 It is horizontal

The demand curve in a perfect market is horizontal, because they can sell as much as they want at the prevailing market price and nothing at all at a higher price.

SECTION B

- 1 (a) Peter Drucker Reference D

Elton Mayo Reference B

Henry Mintzberg None of the references

F W Taylor Reference C

Drucker emphasised the economic objective of managers in business

Mayo investigated individual and group behaviour at work, as a factor in productivity.

Mintzberg described managerial roles, arguing that management is a disjointed, non-systematic activity.

Taylor pioneered the scientific management movement and sought the most efficient methods.

- (b) Planning

Organising

Fayol classified five functions of management: Planning, Organising, Commanding, Co-ordinating and Controlling.

- 2 (a) Locking the computer room to prevent access to non-employees - General control

Limiting access to the payroll system by making it password protected - General control

Taking backup of data files each evening and holding backup copies off-premises - General control

Providing basic IT training to entire staff to prevent errors in using the system - Application control

General controls relate to the environment in which the application is operated.

Application controls are controls that prevent, detect and correct errors.

- (b) Fraud and errors in handling cash can be prevented through segregation of duties since no one individual can record and process a complete transaction.

Segregation of duties

Even if such a measure were introduced, the possibility exists that staff could act together to perpetrate fraud and bypass this control. This can be prevented through induction and training as it would ensure awareness of the heavy sanctions to be imposed in cases of dishonesty.

Induction and training

Segregation of duties would prevent one individual recording and processing a complete transaction.

Awareness and training would make staff aware of sanctions in cases of dishonesty.

- 3 (a) An interview to help another person to identify and work through a problem - Counselling

A long term relationship in which a more experienced person encourages an individual's personal and career development - Mentoring

An approach whereby a trainee is put under the guidance of an experienced employee who shows the trainee how to perform tasks - Coaching

An interview, the aim of which is to review performance and identify training and development needs - Appraising

Coaching involves a trainee being put under the guidance of an experienced employee.

Mentoring is a long-term relationship where a more experienced person encourages career and personal development.

Counselling is an interpersonal interview to help an individual identify and work through a problem.

Appraisals are part of performance management and can be used to establish areas for improvement and training and development needs.

(b) **Career and personal development**

Providing a role model for an employee

Mentoring is a long-term relationship where a more experienced person encourages career and personal development and can also be a role model.

4 (a) **Donna and Dietmar – Connected**

Members of the management committee – **Internal**

The four building companies – **Connected**

Local residents – **External**

Donna and Dietmar are connected stakeholders as they are trustees of the charity.

The management committee are internal to the charity as they can legally bind the charity.

The building companies are in negotiation with the management committee and therefore are connected stakeholders.

Local residents will always be external stakeholders.

(b) Stakeholder	Stakeholder category	Communication strategy
Building companies	Low power, High interest	Kept informed
Local residents	High power, High interest	Treated as key player

Residents have high interest due to the anticipated effects of the development, but due to the involvement of the local politicians they also have high power.

Stakeholders with high power and high interest should be treated as key players.

The building companies have high interest in the decision to award the building contract.

Stakeholders with low power and high interest should be kept informed.

5 (a) **Integrity**

Professional behaviour

Confidentiality

Objectivity

The fundamental principles are Integrity, Confidentiality, Objectivity, Professional behaviour and Professional competence and due care.

(b) **Acting in the public interest**

Ethical codes of conduct

Process of certification

Governance by association

These qualities distinguish a profession from an occupation.

	Dimension	Level
Company A	Power distance	High
Company B	Masculinity	High
Company C	Uncertainty avoidance	Low
Company D	Individualism	Low
	High power distance cultures accept greater centralisation, a top-down chain of command and closer supervision.	
	High masculinity cultures clearly differentiate gender roles. Masculine values of assertiveness, competition, decisiveness and material success are dominant.	
	Low uncertainty avoidance cultures respect flexibility and creativity. They have less task structure and written rules. There is more tolerance of risk, dissent, conflict and deviation from norms.	
	Low individualism cultures emphasise interdependence, reciprocal obligation and social acceptability. The organisation is seen as a family.	

Foundations in Accountancy/ACCA Business and Technology (FBT/BT)

Mock Examination 2

Questions	
Time allowed	2 hours

This exam is divided into two sections:

Section A – ALL 46 questions are compulsory and MUST be attempted
Section B – ALL SIX questions are compulsory and MUST be attempted

Please note that it is not possible to predict question topics in an examination of this nature. We have based the content of this Mock Exam on our long experience of the ACCA exams. We do not claim to have any endorsement of the question types or topics from either the examiner or the ACCA and we do not guarantee that either the specific questions or the general areas that are featured here will necessarily be included in the exams, in part or in whole.

We do not accept any liability or responsibility to any person who takes, or does not take, any action based (either in whole or in part and either directly or indirectly) upon any statement or omission made in this book. We encourage students to study all topics in the ACCA syllabus and this Mock Exam is intended as an aid to revision only.

**DO NOT OPEN UNTIL YOU ARE READY TO START UNDER
EXAMINATION CONDITIONS**

SECTION A

ALL 46 questions are compulsory and MUST be attempted

- 1 (1) Private companies can raise share capital by advertising to the general public.
(2) Private companies can raise share capital from venture capitalists

Are these statements true or false?

- Statement 1 is true and statement 2 is false
- Statement 1 is false and statement 2 is true
- Both statements are true
- Both statements are false

(2 marks)

- 2 Nysslit Lerner plc, an organisation of some 400 employees, has an average span of control of three, throughout its structure. From this, which of the following inferences might one make?

- The work is systematic and routine
- The level of complexity in the work is high
- The organisation is flat

(1 mark)

- 3 Which of the following is part of the research and development function of a business?

- The analysis of survey data on consumer behaviour, produced under contract by an independent market research company
- Creating new products and improving existing ones
- Contracting independent advertising agencies to promote the products being sold by the company

(1 mark)

- 4 Which of the following members of the finance function would be responsible for deciding how much credit should be given to customers?

- The financial manager
- The financial accountant
- The management accountant

(1 mark)

- 5 Mrs Grey likes swimming and playing badminton as part of her exercise routine. She has a budget of up to \$25 to spend each week on getting fit. Each trip to the swimming pool costs \$3, and each badminton session costs \$4.

Her marginal utility schedule is given below:

Number of trips	Marginal utility of swimming	Marginal utility of badminton
1	90	100
2	80	90
3	70	80
4	60	70
5	50	60

Which combination of activities gives Mrs Grey the highest utility?

-
- 6 You have received a letter from an estate agent, requesting financial information about one of your clients, who is applying to rent a property. The information is needed as soon as possible, by fax or e-mail, or the client will lose approval.

Which of the following ethical principles, identified in the ACCA code of ethics, is raised by the decision of whether, when and how to respond to this request?

- Objectivity
- Technical competence
- Confidentiality
- Professional behaviour

(2 marks)

-
- 7 A large, well-established construction company organises itself on a project basis, using temporary matrix and project team structures.

What cultural type is most likely to fit this organisation?

- Role culture
- Power culture
- Task culture

(1 mark)

-
- 8 Which of the following options sets out the required procedures for all of the various functions of a business?

- An accounting manual
- A function policy
- A management information manual
- A policy manual

(2 marks)

-
- 9 Which of the following is a purpose of a job evaluation?

- Identifying individuals' training and development needs
- Evaluating the organisation's recruitment and selection procedures
- Improving upward communication
- Demonstrating compliance with equal pay legislation

(2 marks)

- 10 Which of the following is an external stakeholder?
- Professional body
 Customer
 Bank of the organisation
- (1 mark)
-
- 11 Helen, Jack, Sue and Joe work in the finance department of Y Co which has separate financial accounting and management accounting functions. Helen works on inventory valuation, budgetary control and variance analysis. Jack deals with sales invoicing and debt collection. Sue deals with quarterly sales tax returns and corporation tax and Joe carries out risk assessments and assists in project planning. Which member of the department would report to the management accountant?
- Helen
 Jack
 Sue
 Joe
- (2 marks)
-
- 12 Homer and Marge work for similar companies but at Marge's company a mechanistic system of management exists, in contrast to the organic approach at Homer's firm. They are discussing some of the characteristics of each system, which are outlined below.
- Which TWO would Marge recognise from her workplace?
- Managers are responsible for co-ordinating tasks
 Insistence on loyalty to the organisation
 Job descriptions are less precise, it is harder to 'pass the buck'.
 Flexibility in job roles
- (2 marks)
-
- 13 Individuals may conform with the norms and customs of a group without real commitment.
- Which of the following terms describes such behaviour?
- Compliance
 Counter-conformity
 Internalisation
 Identification
- (2 marks)
-
- 14 Which of the following is a negative contribution of the audit committee, in a corporate governance framework?
- A lack of independence in reviewing the proposed approach of the external auditors
 Acting as a barrier between the main (executive) board and the external auditors
 Not allowing a forum to raise issues of concern
- (1 mark)
-

- 15 Which of the following is a feature of ineffective delegation by a manager?
- Specifying performance levels and the results expected of the subordinate
 - Obtaining the subordinate's agreement with the task and expected results
 - Ensuring that all the subordinate's decisions are confirmed or authorised by the superior
 - Ensuring that the subordinate reports the results of their decisions to the superior
- (2 marks)
-
- 16 In the context of fraud, which of the following statements is FALSE?
- Deliberate manipulation of depreciation figures is difficult because of its cash flow effects.
 - Fraudulently understating expenses will inflate the reported profit figure.
 - Selling goods to friends (with a promise of buying them back at a later date) is potentially fraudulent.
 - Employees within or outside the payroll department can perpetrate payroll fraud.
- (2 marks)
-
- 17 If you are a team leader, seeking to evaluate the effectiveness of your team, which of the following criteria should you use?
- Criteria:
- (1) Contribution to organisational objectives
 - (2) Fulfilment of group task objectives
 - (3) Satisfaction of the development needs of members
 - Criterion (2) only
 - Criteria (1) and (2) only
 - Criteria (2) and (3) only
 - Criteria (1), (2) and (3)
- (2 marks)
-
- 18 In the context of motivation theory, what are Douglas McGregor's Theory X and Theory Y?
- Extreme types of managers
 - Extreme sets of assumptions that managers may have about workers
 - Extreme types of employees
- (1 mark)
-

- 19 In the context of interpersonal skills for counselling, is the skill of seeing an issue from the other person's point of view and reflecting your understanding back to the other person.

Which of the following terms correctly completes this sentence?

Picklist:

- Rapport-building
Empathy
Active listening

(1 mark)

-
- 20 Which one of the following is NOT an offence relating to money laundering?

- Concealing the proceeds of criminal activity
- Tipping off
- Dealing in price affected securities
- Failing to report suspicion of money laundering

(2 marks)

-
- 21 Anna, Barry, Charles, Dilip and Elaine all work in the same department and form a communication network within the department.

When there is information to be communicated, Charles is given this information. He then communicates this to Barry, Dilip and Elaine.

Barry will then communicate this information to Anna.

Which of the following patterns of group communication is being used here?

- Wheel
- Chain
- Circle
- Y

(2 marks)

-
- 22 Lockett suggested a number of barriers to effective performance appraisal, including 'appraisal as unfinished business'. What is meant by this phrase?

- Appraisal interviews are subject to interruption or left incomplete
- The manager is embarrassed by the need to give feedback and set challenging targets, and leaves the interview with unresolved issues.
- Appraisal is used as a wrapping up of the unresolved performance issues of the past year, rather than focusing on future improvement and problem-solving
- Appraisal is seen as a sort of show-down, in which unresolved conflicts can be brought into the open

(2 marks)

- 23 In the context of work planning, a is an undertaking that has a defined beginning and end and is carried out to meet established goals within cost, schedule and quality objectives.

Which word or phrase correctly completes this definition?

Picklist:

- Contingency plan
Project
Strategy

(1 mark)

-
- 24 The management of RST Co recently held a meeting regarding its financial results for the last year. It has been suggested in the media that RST Co makes excessive profits. In order to combat this the management have decided to deliberately underestimate its financial performance for the last year.

Which of the following is a potential consequence of RST, fraudulently understating its results?

- Excessive distribution of profits to shareholders
- Restricted access to loan finance
- Unrealistic expectations in the financial markets
- Potential shortfalls in working capital

(2 marks)

-
- 25 The price elasticity of demand (PED) of good A is negative, its income elasticity of demand (IED) is positive and its cross elasticity of demand (XED) with respect to good X is negative. What is the nature of good A?

- A good bought for purposes of ostentation, complementary to X
- An inferior good, substitute for X
- A normal good, complementary to X

- 27 In the regulatory system surrounding financial accounting, which body has as a key objective the development of a single set of enforceable global accounting standards?
- The Accounting Standards Board
 - The International Accounting Standards Board
 - The European Union
- (1 mark)
-
- 28 Which TWO of the following are typical of informal groups within an organisation?
- Membership is voluntary
 - Tasks are assigned by management
 - Communication is open and informal
 - Members are held accountable to management for their tasks
- (2 marks)
-
- 29 Some meetings achieve very little because of hindrances. Sally is learning about these problems and how she can avoid them in her role as chairperson at the next project team meeting. Following conversations with other people in the business she has come up with four suggestions for making meetings more effective.
- Which TWO of the above are ways of avoiding participants being unclear about the purpose of the meeting?
- Name the person responsible for completing each action point, and assign a completion date
 - Agree goals in advance
 - Include all actions required and the assigned dates in the minutes
 - Prepare a focused agenda and ensure people stick to it
- (2 marks)
-
- 30 Which TWO of the following should be the purposes of an appraisal interview?
- To discuss employee performance
 - To discipline an employee
 - To agree an employee's salary review
 - To identify an employee's development needs
- (2 marks)
-

- 31 If a government increased its expenditure and reduced levels of taxation, the effect would be to (i)..... demand in the economy and to (ii)..... the size of the Public Sector Net Cash Requirement.

Which words correctly complete this statement?

(i)

Picklist:

Stimulate
Reduce
Raise

(ii)

Picklist:

Stimulate
Reduce
Raise

32 Which of the following statements is an example of lateral communication?

- Communication between middle managers and their first line supervisors
- Communication between heads of department, who report to the same divisional manager
- Communication between supervisors and their team members

(1 mark)

33 While out to lunch, you run into a client at the sandwich bar. In conversation, she tells you that she expects to inherit from a recently deceased uncle, and asks you how she will be affected by inheritance tax, capital gains tax and other matters – which you have not dealt with, in detail, for some years.

Which of the following principles of the ACCA Code of Ethics is raised by this scenario?

- Professional competence and due care
- Integrity
- Professional behaviour
- Confidentiality

(2 marks)

34 learning is a method in which managers are brought together as a problem-solving group to discuss a real work issue, and a facilitator helps them to identify how their interpersonal and problem-solving skills are affecting the process.

What word correctly completes this definition?

Picklist:

Experiential
Action
Off-the-job
Behavioural

(2 marks)

- 35 There are a number of different views on ethics within the finance department of TUV Co.
 Tina believes that actions should be judged by their outcomes or consequences.
 Chris states that there is an unchanging set of ethical principles that always applies.
 Will believes that right and wrong are culturally determined

Which view of ethics is given by Will?

- Ethical relativism
- Cognitivism
- Teleological
- Deontological

(2 marks)

- 36 Business are a set of moral principles to guide behaviour in business contexts.
 Which of the following words correctly completes the sentence?

Picklist:

- Objectives
- Controls
- Ethics

(1 mark)

- 37 Which TWO of the following are best shown using a bar chart?
- The nature of activities within an action plan
 - A sequence of activities within a project
 - The time required for different activities
 - Quantitative relationships between activities

(2 marks)

- 38 Emma, John, Pratish and Rekha all work for W Co. Emma ensures that goods are only purchased when they are required. John ensures that goods that are purchased from authorised suppliers. Pratish pays the suppliers' invoices and Rekha evaluates the financial stability of potential suppliers. Three of the members of Q Co work in the purchasing department and one works in the accounting department. Which member works in the accounting department?
- Emma
 - John
 - Pratish
 - Rekha

45 Julie and Nick are both on the same salary and grade at P Co. Julie is the finance director and Nick is the operations director. A new project team has been created to consider an alternative office location for P Co. Julie and Nick are part of this team. When Julie and Nick communicate with each other, what type of communication is this?

- Downward
- Diagonal
- Lateral

(1 mark)

46 The following qualities are some of those expected of an accountant, but which is a professional quality as opposed to a personal quality?

- Reliability
- Respect
- Timeliness
- Scepticism

(2 marks)

SECTION B

ALL SIX questions are compulsory and MUST be attempted

- 1 (a) Mintzberg defined three categories of managerial role as interpersonal, informational and decisional.

For each of the following managerial roles select the correct category from the above list

Negotiator

Spokesperson

Disseminator

Figurehead

Liaison

Disturbance handler

Picklist:

Interpersonal

Informational

Decisional

(3 marks)

- (b) Are the following statements about supervisors true or false?

Supervisors spend all their time on managerial aspects of the job

A supervisor is a filter between managerial and non-managerial staff

Picklist:

True

False

(1 mark)

(Total = 4 marks)

-
- 2 (a) Frank, Gloria, Helen and Ian are discussing how they should structure their newly formed company.

Frank wants a structure which would allow the newly recruited employees to be more flexible.

Gloria would prefer a structure where decisions can be made at a local level rather than centrally.

Helen wants a structure that will facilitate the recruitment of technical specialists for the business.

Ian's preference is for a structure that does not have bureaucratic obstacles that are present in other structures.

Which organisational structure would be preferred by each of the following?

Frank

Gloria

Helen

Ian

Picklist:

Functional
Geographic
Matrix

(2 marks)

- (b) Which TWO of the following are features of a boundaryless structure?

- The employee is a seller of skills
- Barriers are removed between the organisation and its suppliers
- The organisation only exists electronically
- The focus is on the customer
- Elimination of bureaucracy

(2 marks)

(Total = 4 marks)

- 3 (a) The Board of Directors of BCD Co discussed corporate governance concepts.

The finance director wants to provide financial projections to shareholders which were used as the basis for deciding to proceed with a major overseas investment.

The marketing director has decided not to authorise a proposed advertising campaign which she believes is misleading, despite the other directors pushing for the campaign to go ahead.

The HR director, who was responsible for introducing an unsuccessful training programme across the entire business, accepts that he should take the blame for this issue.

The chief executive has decided not to proceed with a proposed takeover of a competitor, that would not have increased the value of BCD Co, but would have given the directors higher status.

For each of the above scenarios, select the corporate governance concept being applied by:

The finance director

The marketing director

The HR director

The chief executive

Picklist:

Responsibility
Transparency
Judgement
Integrity

(2 marks)

- (b) Which of the following describes the minimum level of compliance an organisation must have?
- There is no minimum level
 - Legal obligations only
 - Legal obligations and non-legal regulations

(1 mark)

- (c) Managers have a duty of faithful service to an organisation. This is known as their

.....

Which phrase correctly fills in the blank?

Picklist:

- Financial responsibility
- Fiduciary responsibility
- Ethical position

(1 mark)

(Total = 4 marks)

- 4 (a) The following are all areas of legal issues that can affect an organisation. For each legal issue, select the appropriate area of law related to it:

Directors' duties

Minimum wage

Theft

Waste disposal

Picklist:

- Employment law
- Company law
- Criminal law
- Environmental law

(2 marks)

- (b) Are each of the following statements concerning the impact of technology on the role of accountants and auditors true or false?

Cloud accounting reduces the amount of teamwork accountants are involved in

Artificial intelligence frees the accountant to work on value-adding services.

Data analytics helps the auditor reduce business risks

Distributed ledger technology reduces the need for auditors to audit all transactions

Picklist:

- True
- False

(2 marks)

(Total = 4 marks)

- 5 (a) The following are qualities that might be found in accounting information
 Select FOUR from the list that accounting information should have if it is to be useful.
- Reliability
 - Irrelevance
 - Electronic
 - Completeness
 - Objectivity
 - Unformatted
 - Incomparability
 - Timeliness
- (2 marks)
- (b) Match the following finance tasks to the responsible person.
- | | | |
|--------------------|----------------------|----------------------------------|
| Statutory accounts | <input type="text"/> | <input type="button" value="▼"/> |

| Financial accountant | <input type="text"/> | <input type="button" value="▼"/> |
- (2 marks)
-
- (Total = 4 marks)
- 6 (a) FGH Co has a culture of informality in most of its communications at lower levels, but communications with and amongst members of the board are typically formal.
 In each of the following circumstances select the appropriate method of communication:
- | | | |
|---|----------------------|----------------------------------|
| Communicating the findings of an external review into investment possibilities to the board | <input type="text"/> | <input type="button" value="▼"/> |
| Formal document requiring directors' signatures to be sent to company lawyers | <input type="text"/> | <input type="button" value="▼"/> |
| A meeting between sales managers based in geographically distant locations | <input type="text"/> | <input type="button" value="▼"/> |
| Letting employees know about a staff meeting to be held in one month's time | <input type="text"/> | <input type="button" value="▼"/> |
- Picklist:**
- | | | |
|------------------|----------------------|----------------------------------|
| Postal service | <input type="text"/> | <input type="button" value="▼"/> |
| E-mail | <input type="text"/> | <input type="button" value="▼"/> |
| Report | <input type="text"/> | <input type="button" value="▼"/> |
| Video conference | <input type="text"/> | <input type="button" value="▼"/> |
- (2 marks)

(b) Which TWO of the following are effects on an organisation of its employees being ineffective?

- Staff turnover will increase
- Deadlines will be missed
- Problems are not dealt with as they arise
- Customer satisfaction will increase

(2 marks)

(Total = 4 marks)

Answers to Mock Exam 2

**DO NOT TURN THIS PAGE UNTIL YOU HAVE
COMPLETED THE MOCK EXAM**

SECTION A

- 1 Statement 1 is false and statement 2 is true

Rationale: The key difference between private and public companies is that only public companies can advertise their shares to the general public. Both private and public companies can raise share capital from venture capitalists.

Pitfalls: You had to get your 'private' and 'public' companies the right way round.

- 2 The level of complexity in the work is high

Rationale: The organisation has a narrow span of control: this would typically be the case if the work is complex, as it requires closer supervision.

Pitfalls: Remember: narrow span typically means tall organisation; wide span typically means flat organisation.

Ways in: Work through each option. Systematic/routine work would not need such a narrow span of control. With a control span of three in a fairly large organisation, the organisation must be tall...

- 3 Creating new products and improving existing ones

Rationale: The other options would be part of the marketing function.

- 4 The financial manager

Rationale: The financial manager, among other responsibilities, will decide how much credit should be given to customers.

Pitfalls: The management accountant presents accounting information to support management. The financial accountant reports the results and financial position of a business.

- 5 4 swimming trips and 3 badminton sessions

Rationale: Utility is greatest at the point where:

$$\frac{\text{Marginal utility of swimming}}{\text{Price of swimming trip}} = \frac{\text{Marginal utility of badminton}}{\text{Price of badminton session}}$$

$$= \frac{60}{3} = \frac{80}{4} = 20$$

= 4 swimming trips and 3 badminton sessions

Note: 4 swimming trips and 3 badminton sessions cost a total of \$24 and so are within the \$25 budget. Mrs Grey's overall total utility is restricted by her budget, so the total cost of any combination she might wish to choose must be less than \$25.

- 6 Confidentiality

Rationale: Confidentiality is the immediate ethical issue. You need the client's authority to disclose the information: you may also need to confirm the identity of the person making the request, and take steps to protect the confidentiality of the information if you send it (ie not using fax or e-mail). The other ethical principles do not apply here.

- 7 Task culture

Rationale: A task culture suits project management structures, with their focus on deliverables (project completion) rather than processes. Role culture suits bureaucratic cultures and power culture suits simple/entrepreneurial structures.

Pitfalls: Just because the organisation is large and well-established, don't immediately jump to the conclusion that it is a bureaucracy (role culture)!

- 8 A policy manual

Rationale: Every employee will be expected to have read the areas relevant to their functions and the policy manual should always be readily available for easy reference.

- 9 **Demonstrating compliance with equal pay legislation**
- Rationale:** Equal pay legislation requires that women be paid equal pay to men for work 'of equal value' (to the organisation); this is established by job evaluation. The others are potential purposes of a performance appraisal. Equal pay is about the value of the job, not the value of the job holder. If you hesitated over evaluating the organisation's recruitment and selection procedures, think of performance appraisal as a way of monitoring whether people really do as well in the job as the selection system predicted they would when they were hired!
- 10 **Professional body**
- Rationale:** External stakeholder groups – the government, local authorities, pressure groups, the community at large, professional bodies – are likely to have quite diverse objectives.
- 11 **Helen**
- Rationale:** The Financial Accountant is responsible for activities such as payroll, receivables and payables ledger, credit control, financial accounts and taxation. Jack and Sue would report to the financial accountant. The Treasurer (if there is one) would be responsible for project (investment) appraisal, and his or her priority would be funds management. Joe would report to the treasurer.
- Pitfalls:** These are essential distinctions: any combination of the tasks and titles could be tested.
- 12 **Managers are responsible for co-ordinating tasks**
- Insistence on loyalty to the organisation**
- Rationale:** The correct answers are: Managers are responsible for co-ordinating tasks; insistence on loyalty to the organisation. In contrast, Homer would recognise the other features as typical of an organic system of management.
- 13 **Compliance**
- Rationale:** Compliance is behaving in such a way as to conform, regardless of underlying commitment or attitude: it applies to organisations as well as individuals! Counter-conformity is rejection of group norms. Internalisation is 'inner' acceptance and ownership of the norms. Identification is a separate idea: it is one of the processes through which norms are reinforced in a group.
- 14 **Acting as a barrier between the main (executive) board and the external auditors**
- Rationale:** This may sound like an 'independence' benefit, but the key word is 'barrier': the main board needs to take responsibility for the financial statements and be open to question by auditors.
- 15 **Ensuring that all the subordinate's decisions are confirmed or authorised by the superior**
- Rationale:** There is a fine distinction between making the subordinate accountable and interfering. If the superior doesn't trust the subordinate to make decisions, they shouldn't have delegated at all. The other options should clearly be effective practice.
- 16 **Deliberate manipulation of depreciation figures is difficult because of its cash flow effects.**
- Rationale:** Depreciation is an expense that doesn't have any cash flow effect, so the figures are easily tampered with: eg understating depreciation to give a healthier net book value. Fraudulently understating expenses will inflate the reported profit figure is clearly true. Selling goods to friends (with a promise of buying them back at a later date) is potentially fraudulent is true because this can be used to create fictitious sales values or manipulate year end results. Employees within or outside the payroll department can perpetrate payroll fraud is true because, for example, any employee can falsify time-sheets, and payroll staff can channel payments to bogus staff accounts.

17 Criteria (1), (2) and (3)

Rationale: The criteria for team effectiveness are both fulfilment of task objectives (which should contribute to organisational objectives) and member satisfaction, where that contributes to the ability of the group to fulfil its task (eg in the development of members' skills and abilities).

18 Extreme sets of assumptions that managers may have about workers

Rationale: Theory X and Y are only managerial assumptions – which then influence the kinds of motivational approaches and leadership styles the manager will adopt. They do not describe actual types of people (managers or employees).

Pitfalls: You are often asked to show critical awareness and understanding of theories, so it is worth getting this distinction clear.

19 Empathy

Rationale: The closest distractor is active listening, as reflecting understanding is one of the ways a listener can be 'active'. (Other ways include questioning, summarising, showing attentive body language, giving feedback and so on.) Rapport-building is the skill of making another person feel at ease with you, and willing to communicate with you.

20 Dealing in price affected securities

Rationale: This could be insider dealing, if the person dealing was an insider and was using inside information.

21 Y

Rationale: This is an example of the Y network. Drawing out what is going on may help here.

22 Appraisal is used as a wrapping up of the unresolved performance issues of the past year, rather than focusing on future improvement and problem-solving

Rationale: This is what Lockett meant by the phrase. Appraisal interviews are subject to interruption or left incomplete as a simple distractor. The other options describe other barriers: 'Appraisal as chat' and 'Appraisal as confrontation'.

23 Project

Rationale: A project is distinguished from routine work because of these characteristics. A contingency plan is a plan for what should be done if changes or problems occur. A strategy is a long-term plan relating to the direction of the firm or business unit.

24 Restricted access to loan finance

Rationale: Finance may be hard to come by because the financial health of the firm (ability to maintain and pay off loans) is understated. The other options are impacts of fraudulently over-stating results.

Pitfalls: Ensure that you read the question carefully and address understated, not overstated, results.

Ways in: This should have been clear if you worked through each of the options. Once you identified that some of the distractors were overstatement impacts, you would have a good idea what to look for.

25 A normal good, complementary to X

Rationale: Goods of ostentation have positive PED. Inferior goods have negative IED. Substitutes have positive XED.

26 Forming, storming, norming, performing

Rationale: Forming is the tentative 'getting to know each other' stage; storming, the conflict that results as people begin to assert themselves; norming, the 'settling down' stage, as roles, behaviours and working methods are agreed; and performing, 'getting down to work'.

- Pitfalls:** This can be confusing: make sure you get the terminology right, because it is solid territory for exam questions.
- 27 The International Accounting Standards Board**
- Rationale:** The IASB has this as a key objective. The ASB used to issue Financial Reporting Standards in the UK, a role now performed by the FRC. The EU is interested in harmonisation of standards, but does not have global jurisdiction.
- Ways In:** You should have been tipped off to the international element by the word 'global'. Combine that with 'accounting standards' and you could take an educated guess at the correct answer, if you had to.
- 28 Membership is voluntary; Communication is open and informal.**
- Rationale:** An organisation can be described as a collection of groups both formal and informal.
- Pitfalls:** It is important not to underestimate the importance of groups within an organisation. Elton Mayo first established this point through the Hawthorne Experiments. It is also important to remember that there are alliances and power structures that exist within an organisation, other than those documented in an organisational chart.
- 29 Agree goals in advance and prepare a focused agenda and ensure people stick to it.**
- Rationale:** Ensuring meeting goals are agreed before the meeting and producing an agenda based around achieving the agreed goals should ensure attendees are fully aware of the meeting purpose.
- 30 To discuss employee performance; To identify an employee's development needs.**
- Rationale:** There are drawbacks to linking appraisal to salary review, not least that there may not be enough money to reward the employee for their performance.
- 31 Stimulate, Raise**
- Rationale:** Demand would be raised because firms and households would have more money (after tax) for consumption or saving/investment. The increased expenditure would not be covered by revenue from taxation, so the change would be financed by a higher PSNCR (borrowing mount).
- Pitfalls:** You have to be able to think through all the permutations of fiscal and monetary policies and their impacts on the economy and (where relevant) business decision-making.
- 32 Communication between heads of department, who report to the same divisional manager**
- Rationale:** Lateral communication is between those of equal rank.
- 33 Professional competence and due care**
- Rationale:** The principle of due care is that, having accepted an assignment, you have an obligation to carry it out to the best of your ability, in the client's best interests, and within reasonable timescales, with proper regard for the standards expected of you as a professional. In this scenario, any answer you give on the spot would risk being incomplete, inaccurate or out-of-date, with potentially serious consequences, if the client relies and acts on your reply. Integrity is honesty, fair dealing and truthfulness; professional behaviour is upholding the reputation of your profession; and confidentiality is not using or disclosing information given to you by employers or clients in the course of your work. (None of these issues applies directly here.)
- 34 Action**
- Rationale:** Experiential learning is 'learning by doing', usually involving self-managed learning by reflection, planning and adjustment. Action learning is classed as on-the-job learning, because it involves real work problems and groups. Behavioural and off-the-job are just distractors.

- 35 **Ethical relativism**
Rationale: This describes Will's view of ethics.
- 36 **Ethics**
Rationale: Ethics are 'moral principles': the other options set behavioural guidelines of a different sort.
- 37 **The time required for different activities, Quantitative relationships between activities.**
Rationale: Bar charts show data not sequences. They do not explain the nature of an activity.
- 38 **Pratish**
Rationale: Paying suppliers' invoices would be a function of the accounts department, once the purchasing department has authorised the invoices for payment. You may have hesitated over Rekha, but evaluating potential suppliers is a key element in supplier appraisal and selection, not a finance matter. (However, in some companies the finance department would do the supplier appraisal because of their technical skills or knowledge but this is not the norm.)
- 39 **Political, economic, social and technological factors**
Rationale: These are the external factors which impact the business.
- 40 **Opportunities and threats**
Rationale: Strengths and weaknesses are internal.
- 41 **IESBA**
Rationale: The IFAC code is now administered by the IESBA. The ACCA code of ethics is based on the IFAC code. FATF (Financial Action Task Force) promotes policies to combat money laundering.
- 42 **Detailed policies and procedures for administrative and accounting control**
Rationale: The other options relate to the 'control environment' which embraces the overall organisational and cultural context of control. They were highlighted as aspects of a strong control environment in the Turnbull report.
- 43 **Personal work patterns**
Rationale: You can take advantage of personal work patterns, which include times of high energy and focus as well as low. The other options all expose you to the demands of other people, which may be harder to manage.
- 44 **Patch management**
Rationale: Patch management is a cyber security solution in the form of a system procedure. The organisation ensures that the latest software updates are installed on the system when available.
- 45 **Lateral**
Rationale: Lateral (or horizontal) communication flows between people of the same rank, in the same section or department or in different sections or departments.
Ways in: Hopefully you would have been able to disregard downward because it suggests communication from superior to subordinate.
- 46 **Scepticism**
Rationale: The professional qualities are: independence, accountability, scepticism and social responsibility.

SECTION B

- 1 (a) **Negotiator:** Negotiation often occurs before a decision is taken – **decisional.**
Spokesperson: The manager provides information on behalf of the organisation to interested parties – **informational.**
Disseminator: Managers disseminate relevant information to subordinates – **informational.**
Figurehead: A chief executive spends time representing the company at conferences, dinners etc – **interpersonal.**
Liaison: Some managers spend a significant amount of time meeting peers rather than their subordinates – **interpersonal.**
Disturbance handler: A manager has to make decisions when there has been a deviation from the plan – **decisional.**
- (b) **False.** A supervisor spends time doing technical or operational work.
True. A supervisor is not a filter between managerial and non-managerial staff.
- 2 (a) **Frank:** Matrix. A matrix structure encourages flexibility of people
Gloria: Geographic. Local decision-making is a feature of geographic departmentation
Helen: Functional. Functional departmentation means that functional specialists can be recruited
Ian: Matrix. A matrix structure removes bureaucratic obstacles common with taller organisation structures
- (b) Barriers are removed between the organisation and its suppliers, Elimination of bureaucracy.
The employee is a seller of skills is a feature of a jobless structure. The organisation only exists electronically is a feature of virtual organisations. The focus is on the customer is a feature of output-focused structure.
- 3 (a) **The finance director:** Transparency. Open and clear disclosure describes transparency
The marketing director: Integrity. In working life integrity means adhering to principles of professionalism
The HR director: Responsibility. This demonstrates responsibility
The chief executive: Judgement. Judgement means making decisions that enhance the prosperity of the organisation
- (b) **Legal obligations only.**
Fulfilling legal obligations is the minimum standard of behaviour required by an organisation.
- (c) **Fiduciary responsibility.**
Managers have a fiduciary interest to act in the best interest of the organisation, not of themselves.
- 4 (a) **Minimum wage:** Employment law. Minimum wage comes under employment law.
Directors' duties: Company law. Directors' duties are set out in company law.
Criminal law: Criminal law. Theft is a criminal law matter.
Waste disposal: Environmental law. Waste disposal is an environmental law matter.

- (b) **False.** Cloud accounting allows accountants to work more collaboratively together and with their clients.
- True.** Artificial intelligence supports the intelligent processing of transactional information to free the accountant to work on value-adding services.
- False.** Data analytics allow predictive analytics to assist the auditor in targeting key business risks to improve their audit work. It does not help reduce business risk itself.
- True.** Distributed ledger technology allows asset ownership to be easily verified, reducing the need for auditors to audit all transactions.
- 5 (a) **Reliability, Completeness, Objectivity, Timeliness.**
 Accounting information should be Relevant, Comprehensible, Reliable, Complete, Objective, Timely and Comparable
- (b) **Statutory accounts:** Financial accountant
Job costing: Management accountant
Taxation: Financial accountant
 Financial accountants are involved in preparing information for users outside the organisation, such as statutory accounts and tax. Management accountants prepare information for use inside an organisation such as job costing.
- 6 (a) **Report.** A report is usually a comprehensive written record, often used for communicating findings to the board.
Postal service. As a physical signature is required, this needs to be sent by postal service.
Video conference. A video conference allows geographically distant people to have a visual meeting.
E-mail. E-mail allows all staff members to be contacted with one communication.
- (b) **Deadlines will be missed, Problems are not dealt with as they arise.**
 Staff turnover is not affected by ineffectiveness and customers are more likely to be dissatisfied.

Foundations in Accountancy/ACCA Business and Technology (FBT/BT)

Mock Examination 3

Questions	
Time allowed	2 hours

This exam is divided into two sections:

Section A – ALL 46 questions are compulsory and MUST be attempted

Section B – ALL SIX questions are compulsory and MUST be attempted

**DO NOT OPEN UNTIL YOU ARE READY TO START UNDER
EXAMINATION CONDITIONS**

SECTION A

ALL 46 questions are compulsory and MUST be attempted

- 1 Which of the following is another name for an entrepreneurial structure?
- Matrix structure
 - Complex structure
 - Flat structure
 - Simple structure
- (2 marks)
-

- 2 Stephanie is the typist for Ron, Martin and Josephine. Josephine is the department head and sets Stephanie's work priorities.

Josephine is in a meeting and Martin needs a letter to be typed urgently. Martin orders Stephanie to 'type his work now!'. Stephanie refuses, saying that Josephine has told her to type a report from Ron, as this is needed for a Board Meeting.

When Josephine returns from her meeting Martin complains and the situation degenerates to a shouting match between Ron and Martin. Josephine reviews the work to be done and tells Stephanie to type Ron's report first, then the minutes of the meeting Josephine has just attended, and then Martin's letter.

She explains to Martin that, although his letter is important, it only needs to catch that evening's post. Ron's report is needed for a Board meeting in two hours' time and the Board will also need to see the minutes of her meeting. All parties feel happy with the result.

How would you describe Josephine's response to the conflict?

Which word correctly completes the sentence above?

- Denial
 - Suppression
 - Compromise
 - Dominance
- (2 marks)
-

- 3 There are three broad pre-requisites or 'pre-conditions' that must exist in order to make fraud a possibility.

- Dishonesty, criminality and opportunity.
 - Deception, motivation and opportunity.
 - Dishonesty, motivation and opportunity.
- (1 mark)
-

- 4 Are the following statements true or false?

True	False
------	-------

Employees who notice fraud or malpractice in a workplace are obliged to reveal their knowledge to external authorities immediately.

The term given to an employee who reveals fraud or malpractice occurring in a workplace is whistle-blower

(2 marks)

- 5 What elements constitute the purchasing mix?
- Quantity, quality, product, price.
 - Quantity, quality, discount, delivery.
 - Quantity, quality, price, delivery.
- (1 mark)
-
- 6 Which three of the following are the professional qualities expected of an accountant?
- Moderation
 - Social responsibility
 - Authority
 - Independence
 - Scepticism
- (2 marks)
-
- 7 Which three of the following personal relationships are likely to constitute a threat to objectivity or the appearance of objectivity?
- The audit partner is married to the finance director of an audit client.
 - A junior member of the audit team plays football with a marketing assistant of a company audited by another office of the firm.
 - A senior member of the audit team is in a relationship with the financial controller of an audit client.
 - The financial controller of a company resigned from the company three months ago, is now working for the company's auditors and is working on the audit of the company she previously worked for.
 - The audit partner attends the annual dinner of the company.
- (2 marks)
-
- 8 A group of people who are not in the same geographical location, but work together using information and communication technology (ICT) to share data, allocate work and hold meetings is called a _____ team.
- Which of the following words most appropriately fills the gap?
- Multi-skilled
 - Virtual
 - Multi-disciplinary
- (1 mark)
-
- 9 Which of the following factors would lead to stability of price levels for a product?
- Supply decisions are based on the prices of an earlier time period.
 - Demand is based on the prices of the present time period.
 - The product has low price elasticities of demand and supply.
 - Output is affected by non-controllable factors such as climate.
- (2 marks)
-

- 10 Which of the following is an external stakeholder?
- Supplier
 - Professional body
 - Bank
 - Customer

 - The system that ensures director accountability to shareholders and stakeholders.
- (1 mark)
-

- 21 Willy Hackett has a problem with personal time management. He takes on lots of his manager's work and tries to fit it in with his own. The sheer size of the workload sometimes panics him. He is popular with his staff, though, because he always finds time to talk to them and listen to their problems - which include boredom at work. Sometimes Willy 'just doesn't know where the day has gone'.

Which of the following could Willy benefit from?

- Delegation only
 - Assertiveness and goal planning
 - Delegation, assertiveness and goal planning
 - Delegation, assertiveness, communication and goal planning
- (2 marks)
-

- 22 Chan, Will and Felipe are employed by an audit firm and conduct the audit of Friendly Faces Co. Felipe is in charge of the audit.

Friendly Faces Co acts as agents for children wanting to work in television. Friendly Faces have offered Felipe's daughter a part in a popular children's television programme.

In return, they want Felipe to sign off this year's audit report without mentioning the serious concerns he has over the solvency of Friendly Faces Co. Felipe accepts their offer and signs an unqualified audit report.

Chan has found out about the arrangement. Friendly Faces Co have also offered her son a part in the same programme.

What action would you recommend Chan takes?

- Accept the offer but report Felipe to the head of the audit firm anonymously to avoid conflict.
 - Refuse the offer and report Felipe to the head of the audit firm.
 - Accept the offer and keep quiet.
 - Do nothing in order to avoid conflict.
- (2 marks)
-

- 23 Julie is a valuable member of her team. She is creative and imaginative and solves difficult problems, although she sometimes ignores details.

Which one of Belbin's team roles does Julie fulfil?

- Specialist
 - Completer-finisher
 - Team worker
 - Plant
- (2 marks)
-

- 24 An accounting package automatically downloads bank transactions from the bank's system, saving the bookkeeper time entering the transactions manually.

What is this feature of the accounting package an example of?

- Artificial intelligence
 - Distributed ledger technology
 - Cloud computing
 - Automation
- (2 marks)

-

- 30 Velma plc is a large car manufacturer that has to regularly source thousands of component parts for input into its range of vehicles. The aim of a joint project between the Finance Director and the IT Director is to reduce the bargaining power of key suppliers and get the best price for the inputs to the business. Several options in terms of the use of IT have been suggested.

Which TWO of the following will reduce the bargaining power of suppliers?

- An extranet link to allow key suppliers access to future production schedules for Velma plc
- A database of all suppliers used by the business to date, with capability to blanket email invitation to tender requests.
- Access to an online marketplace set up as a joint venture in conjunction with other large vehicle manufacturers.
- Outsourcing the manufacture of whole systems (eg the braking system) to selected suppliers and sharing technical data with the chosen suppliers. (2 marks)

-
- 31 Which of the following statements is true?

- (1) An informal organisation exists within every formal organisation.
 - (2) The objectives of the informal organisation are the same as those of the formal organisation.
 - (3) A strong, close-knit informal organisation is desirable within the formal organisation
this practice?
 - Statement 1 only
 - Statements 1 and 3
 - Statements 2 and 3
 - Statement 3 only
- (2 marks)

-
- 32 Which of the following groups should look for signs of petty fraud as well as checking work that staff have completed?

- External auditors
- Board of Directors
- Operational managers
- Audit committee (2 marks)

- 33 What type of culture did Handy suggest suits a simple and small organisation run by an entrepreneurial owner or founder?

- Role
- Task
- Power (1 mark)

34 Are the following statements true or false?

	True	False
Drucker argued that developing people is a management function.	<input type="radio"/>	<input type="radio"/>
Drucker argued that the manager of a business has one basic function - economic performance	<input type="radio"/>	<input type="radio"/>

(2 mark)

35 Max and Tony run a successful parcel delivery service. By chance Max discovers that Tony has been issuing a large number of invoices for deliveries that have not been made.

When Max investigates further, he discovers that these invoices have been paid, but the funds received by the delivery firm have subsequently been used to pay a company called ABC.

Max discovers ABC is owned by Tony's wife. The payments to ABC were made to pay invoices issued to the parcel delivery company for accounting services provided by ABC. These services have never actually been carried out. Max is suspicious and reports Tony to the police. Eventually Tony is arrested for money laundering.

What phase in the money laundering process has Max's firm been involved in?

- Placement
- Layering
- Integration
- Failure to disclose

(2 marks)

36 XYZ Ltd has a job vacancy in one of its departments. Sonya Bykemate, the human resources manager, knows that there are people in the company who could do the job if they were promoted to it. There is also a reasonable pool of suitably skilled individuals available in the local area, who are easily reached through the employment agency used by the firm.

Which one of the following is a justification for recruiting externally rather than internally?

- Reduction of risk
- Motivation of the existing workforce
- Time needed for induction
- Innovation and adaptability

(2 marks)

37 Are the following statements relating to employment protection legislation true or false?

 - Acquiring transferable skills and competences.
- (2 marks)
-
- 40 Dan is a very valuable member of staff and so his manager, Lee, wants to make sure that he remains motivated and happy in his job. Lee knows that Dan has a high desire for success in everything that he does. Lee therefore wants to give Dan appropriate work to fulfil this desire.
- Which of the following features would NOT help to keep Dan motivated?
- A degree of personal responsibility
 - Goals that may not be achievable
 - Realistic levels of risk-taking
 - An element of clear feedback
- (2 marks)
-
- 41 The country of Sportland has recently had a downturn in its economy and is facing a recession. Many businesses are making large numbers of staff redundant, although all businesses are expected to recover in the long term.
- What type of unemployment is this?
- Frictional
 - Structural
 - Cyclical
- (1 mark)
-
- 42 Which of the following is most clearly a sign of an ineffective group?
- Internal disagreement and criticism
 - Competition with other groups
 - Passive acceptance of work decisions.
 - Achievement of individual targets
- (2 marks)
-

43 What does the term diversity mean?

- A business invests in many different activities in order to reduce risks
- The business does not discriminate against any groups based on gender or ethnic background
- The composition of the workforce reflects the population as a whole
- A policy of fast tracking individuals from minority groups

(2 marks)

44 Which of the following is NOT a valid advantages of having accounting standards?

- They discourage confusing variations in the methods used to prepare accounts
- They enforce conformity because companies are never allowed to depart from a standard.
- They are less rigid than enforcing conformity by legislation.
- They provide a focal point for debate and discussions about accounting practice.

(2 marks)

45 Michael is conducting his appraisal interviews. His philosophy is simple. He tells the subordinate in question how he has been assessed - good and bad - and then gives him or her a chance to put questions, suggest improvement targets, explaining shortcomings, identifying problems.

This approach is known as the:

- 'tell and sell' method.
- 'tell and listen' method.
- 'problem-solving' approach
- peer rating method.

(2 marks)

46 Which type of control aims to intercept data being transmitted into a system from outside via the internet?

- Access controls
- Firewall
- Data verification controls

(1 mark)

SECTION B

ALL SIX questions are compulsory and MUST be attempted

- 1 Here is information about four companies:

Company W consists mostly of project teams and task forces. The company has no clear leader and performance of the company is judged by results.

Company X is a well-established company with a formal structure. Employees are not particularly ambitious and do not overstep the boundaries of their authority.

Company Y is a company that exists to serve the individuals that make up the company.

Company Z is a small company run by an entrepreneur who makes all of the major business decisions. There are few formal rules across the company.

Required:

- (a) What type of culture is demonstrated by each company using Harrison and Hany's cultural stereotypes?

Company W

	▼
--	---

Company X

	▼
--	---

Company Y

	▼
--	---

Company Z

	▼
--	---

Picklist:

Role culture

(2 marks)

Task culture

Power culture

Person culture

- (b) A committee includes the following roles:

Chair

Secretary

For each of the following roles, state whether it is the duty of the Chair or the secretary

Chair Secretary

Give ruling on disputed points

Taking notes during a meeting

Communicating decisions taken in a meeting

Fixing the date of a meeting

(2 marks)

(Total = 4 marks)

- 2 (a) Each of the following individuals works for Carberry Co.
- Julie takes stationery from the office stationery cupboard home so that she can make notes for a work meeting.
- Ken has borrowed money from the office charity collection with the intention of repaying it as soon as possible.
- Michael is struggling to meet his deadline for a report for the Chief Executive, so he asks one of his colleagues to assist him.
- Nadia has adjusted the three-year cash flow forecasts for the company to increase the chances of obtaining a bank loan.

State whether each individual's behaviour is ethical or unethical.

	Ethical	Unethical	
Julie	<input type="radio"/>	<input type="radio"/>	
Ken	<input type="radio"/>	<input type="radio"/>	
Nadia	<input type="radio"/>	<input type="radio"/>	
Michael	<input type="radio"/>	<input type="radio"/>	

(2 marks)

- (b) There are different views about how much external pressures can modify business objectives.
- The view that objectives emerge from the differing views of shareholders, managers, employees, customers, suppliers and the public, but they are not all selected or controlled by management is known as the _____.

Which phrase correctly fills the blank above?

- Stakeholder view of company objective
- Framework of rules
- Consensus theory

(2 marks)

(Total = 4 marks)

- 3 State whether the following statements about internal audit are true or false

(a)	True	False
All organisations need to have an internal audit department.	<input type="radio"/>	<input type="radio"/>
The internal auditor should be independent	<input type="radio"/>	<input type="radio"/>
The internal auditor should report to the Finance Director.	<input type="radio"/>	<input type="radio"/>
The internal auditor may perform a social audit.	<input type="radio"/>	<input type="radio"/>
The internal auditor may review compliance with laws and regulations	<input type="radio"/>	<input type="radio"/>
Internal audit will assess the risk management and control culture of an organisation.	<input type="radio"/>	<input type="radio"/>

(2 marks)

- (b) Do the following statements relate to
- Internal audit
 - External audit
 - Both internal and external audit

Work relates to the operations of the organisation

Objective of work is to express an opinion on the financial statements

Picklist:

Internal audit

External audit

Both internal and external audit

(2 marks)

(Total = 4 marks)

- 4 Luis, Charlotte, Roy and Jessica all work for QWE Co

- (a) For each person, select the appropriate development tool for the situation:

Luis has just completed his first three-month period with QWE Co and is keen to get feedback on his performance level and areas for development.

Charlotte is new to her department and needs an experienced employee to show her how to perform the tasks that she will be expected to do.

Roy has just joined the company, but has ambitions to become a manager at QWE Co and wants to know how he can reach this goal in the long run.

Jessica has just been told she will need to relocate in order to continue working in the marketing department of QWE. She is concerned about several issues arising from this relocation and wants to work through these issues.

Picklist:

Coaching

Counselling

Appraisal

Mentoring

(2 marks)

- (b) Which TWO of the following are benefits to an organisation of using counselling?

- Identifies future managers
- Demonstrates commitment to employees
- Establishes learning targets
- Determines pay increases
- Reduces labour turnover
- Provides a role model for employees

(2 marks)

(Total = 4 marks)

- 5 (a) For each of the following teams, identify the correct stage from Tuckman's model.

Team W has been performing well for some time. It is now concentrating on self-maintenance and the initial task that the team was formed for is beginning to get overlooked.

Team X is fulfilling its objectives, unhindered by difficulties of growth and development.

Team Y consists of members trying to impress their own personality. There is wariness from each team member about introducing new ideas and the objectives of the team are currently unclear.

Team Z is beginning to see agreements about individual requirements and expectations. Procedures are evolving which should bring in methodical working for the team.

Picklist

Forming
Norming
Performing
Dorming

(2 marks)

- (b) Which TWO of the following steps would help to create a team identity?

- Dealing with conflict within the team openly
- Creating a separate space, either physical or virtual, for the team
- Creating a team uniform
- Encouraging interpersonal relationships within the team
- Encouraging competition with other groups

-
- 6 Highgate is a private limited company which is run by the three founders who are John, Oliver and Jemma. The family members also own 80% of the shares and as such control the company as well as running it.

The other 20% of the company is held by private investors who don't have any say in the day-to-day running of the business.

Highgate does not have many customers and is heavily reliant on one main customer (Archway) for a significant percentage of its revenue.

For each of the following, indicate whether they are internal, connected or external stakeholders.

Stakeholder type

John, Oliver and Jemma

The 20% shareholders

Archway

Picklist

Internal stakeholder
External stakeholder
Connected stakeholder

(2 marks)

(b) Which **TWO** of the following are advantages of a public sector organisation over a limited company?

- Fairness
- Accountability
- Efficiency
- Political interference
- No restriction on size

(2 marks)

(Total = 4 marks)

Answers to Mock Exam 3

**DO NOT TURN THIS PAGE UNTIL YOU HAVE
COMPLETED THE MOCK EXAM**

SECTION A

- 1 The correct answer is Simple structure.

Rationale: Mintzberg described this structure, where the strategic apex exerts a 'pull' to centralise.

Pitfalls: You had to get your 'private and 'public' companies the right way round.

- 2 The correct answer is: Suppression

Rationale: Josephine has smoothed over the problem to preserve working relationships, which is a suppression response.

Josephine has responded to the situation and so denial is not the correct answer. You may have hesitated over compromise but Josephine has imposed a solution, she has not bargained or negotiated, so this cannot be the correct solution. Again you may have felt tempted by dominance, but this would lead to lingering resentment and the scenario states that all parties feel happy with the result and so this cannot be the correct answer either.

- 3 The correct answer is: Dishonesty, motivation and opportunity.

Rationale: If one or more of them can be eliminated, the risk of fraud is reduced.

4

True False

Employees who notice fraud or malpractice in a workplace are obliged to reveal their knowledge to external authorities immediately.

✓

The term given to an employee who reveals fraud or malpractice occurring in a workplace is whistle-blower

✓

Rationale: Employees are not obliged to reveal their suspicions to external authorities. They may risk breaching important codes of ethics such as confidentiality. Alternatively they may feel that informing a senior member of staff would be adequate

- 5 The correct answer is: Quantity, quality, price, delivery.

Rationale: Some of the options include the word 'product', which is part of the marketing mix. Purchasing makes a major contribution to cost and quality management in any business.

- 6 The correct answer is:

- Independence;
- Scepticism;
- Social responsibility.

Rationale: Moderation and authority, whilst admirable in many contexts - are not a professional qualities specifically identified as expected of an accountant.

- 7 The correct answers are:

- The audit partner is married to the finance director of an audit client;
- A senior member of the audit team is in a relationship with the financial controller of an audit client;
- The financial controller of a company resigned from the company three months ago, is now working for the company's auditors and is working on the audit of the company she previously worked for.

Rationale: The ACCA's Code of Ethics and Conduct sets out that objectivity is threatened or may appear to be threatened as a consequence of a family or other close personal or business relationship. The threat is greater if the individuals concerned are in senior positions at the client or the audit firm. The threat is less where the individuals concerned are not directly involved in the audit or the financial function. A member should not personally take part in the conduct of the audit of a company if he or she has been an

officer or employee of the company during the previous two years. Normal social relationships between audit partners and their clients (such as attending the annual dinner) do not necessarily constitute a threat to objectivity.

- 8 The correct answer is: Virtual.

Rationale: Virtual teams and organisations are becoming more common as the potential of ICT is exploited. You should be aware of the extent to which distance is no longer a barrier to team working (or to staff selection, or outsourcing of tasks).

Multi-disciplinary teams bring together individuals from different functions, to pool their skills, experience and knowledge: a virtual team may be multi-disciplinary, but a multi-disciplinary team need not be virtual.

The same applies to multi-skilled teams (which bring together individuals, each of whom can switch flexibly between tasks) and project teams (formed to complete a particular project).

- 9 The correct answer is: Demand is based on the prices of the present time period.

Rationale: Price instability can be caused by problems on the supply side such as high prices in a previous period. Non-controllable factors influencing supply means there is an uncertain level of supply which will cause price fluctuations. Low price elasticity of demand and supply create price instability as small changes in the level of demand or supply lead to significant price changes.

- 10 Professional body

Rationale: External stakeholder groups – the government, local authorities, pressure groups, the community at large, professional bodies – are likely to have quite diverse objectives.

- 11

Yes	No
	✓
	✓
	✓
	✓

High levels of inflation

Economic growth

Zero unemployment

Balance of payments equilibrium

Rationale: Macro-economic policy objectives relate to managing economic growth, inflation, unemployment and the balance of payments.

The macroeconomic policy is to achieve full employment, meaning unemployment is low (not zero) and involuntary unemployment is short-term.

Low, stable inflation is a macroeconomic policy target.

- 12 The correct answer is: Distortion.

Rationale: Noise is the other main type of communication problem:

Noise usually takes the form of distractions and interferences in the environment in which communication takes place, affecting the clarity, accuracy or even arrival of the message.

Redundancy is a useful principle to apply to communication. If you use more than one channel of communication, even if the message fails to get through on one means, it may still arrive on another.

Feedback is the response that indicates to the sender that his message has (or has not) been received, properly interpreted and understood.

- 13 The correct answer is: Accounts; shareholders.

Rationale: There are usually detailed regulations on what the accounts must contain and this enables shareholders to assess how well the directors (or management board) have run the company.

- 14 **The correct answer is: An ad hoc committee.**
Rationale: An ad hoc committee is a fact-finding or special committee which achieves its specified purpose, reports and then disbands - like a task-force team.
An executive committee has powers to govern or administer.
A standing committee is formed for a particular purpose, but on a permanent basis, with routine business to perform at regular meetings.
A joint committee is not - as it may sound - simply an interdisciplinary team: it is a body formed to co-ordinate the activities of two or more committees.
- 15 **The correct answer is: A business owned by its workers or customers.**
Rationale: In many large commercial organisations, ownership is separate from control, but they are not cooperatives. A business that works closely with another is not a cooperative.
- 16 **The correct answer is: Develop; tasks; guidance.**
Rationale: Coaching is an approach whereby a trainee is put under the guidance of an experienced employee who shows the trainee how to perform tasks.
- 17 **The correct answer is: The means by which a firm increases the worth of its products.**
Activities incur costs, and, in combination with other activities, provide a product or service which earns revenue.
- 18 **The correct answer is: Recession, depression, recovery, boom**
Rationale: Business cycles or trade cycles are the continual sequence of rapid growth in national income, followed by a slowdown in growth and then a fall in national income.
- 19 **The two correct answers are:**
 - Compliance-based;
 - Integrity-based.**Rationale:** A compliance-based approach is primarily designed to ensure that the company acts within the letter of the law and that violations are prevented, detected and punished.
- 20 **The correct answer is:**
 - Procedures and processes according to which an organisation is directed and controlled.**Rationale:** All the other options are aspects of corporate governance, but not a complete definition.
- 21 **The correct answer is Delegation, assertiveness, communication and goal planning**
Rationale: Willy needs to delegate because he is overloaded, and his subordinates are bored. He needs assertiveness to say 'no', where appropriate, to his subordinates and even to his boss. He also needs to practise goal-planning to break down his workload and to prioritise and schedule his tasks.
You may have paused at (3), with the thought that Willy's communication skills and inclinations are, if anything, too good. However, they are not: he wastes time on communication. Learning to read faster, to write more concise reports and to sort out essential from non-essential communications also come into this area.
- 22 **The correct answer is: Refuse the offer and report Felipe to the head of the audit firm.**
Accepting the offer and keeping quiet is dishonest. Accepting the offer and then reporting Felipe anonymously shows a lack of integrity. Doing nothing in order to avoid conflict may be understandable but shows a lack of professional behaviour.

23 The correct answer is: Plant.

Other characteristics of the plant include being unorthodox and becoming too preoccupied to communicate effectively.

24 The correct answer is automation

Automation is where systems perform repetitive and routine tasks. Booking bank transactions automatically is an example of this.

Artificial intelligence implies that the system learns from data and is therefore able to assist a human operator make business decisions.

Distributed ledger technology, also referred to as blockchain, is where several organisations or individuals share an agreed record of events. In this case, the record of events is only the banks record - there are no other parties that have the right to update the records.

Cloud computing refers to computer software or hardware resources that are accessed via the internet. The accounting package might well be a cloud based system, but that is not mentioned in the question.

25

	Yes	No
Line management	✓	
Colleagues	✓	
The appraisee	✓	
Customers	✓	

Rationale: The 360 degree appraisal is a technique that involves feedback being obtained from various different sources who come into contact with the appraisee.

This ensures a much more thorough and comprehensive assessment than would be possible with a straightforward line management appraisal.

26 The correct answer is: High levels of staff turnover

This will be examined in the internal position audit of the company rather than the environmental analysis which looks at matters external to the company.

27 The correct answer is: Independent non-executive directors.

Independent non-executive directors should form the remuneration committee who should set directors' remuneration.

28 The correct answer is: Disguising, converting, transferring or removing criminal property.

Purchasing stolen goods is not an offence linked to money laundering.

Failure of an engineering company to obtain satisfactory evidence of identity where a transaction is for a small amount is not an offence linked to money laundering.
Membership is voluntary; Communication is open and informal.

29 The two correct answer are:

- Recording transactions in 'books of prime entry'
- Preparing financial statements for the use of external shareholders

Rationale: Financial accounting is concerned with preparing financial statements for external shareholders. It starts with the recording of transactions in the books of prime entry, includes categorising those transactions appropriately, and on the basis of this, preparing financial statements.

Budgets and variance reports are used by internal management and are therefore part of the role of the management accountant.

30 The two correct answer are:

- A database of all suppliers used by the business to date with capability to email invitation to tender requests;
- Access to an online marketplace set up as a joint venture in conjunction with other large vehicle manufacturers.

Both of these options should mean that Velma plc has access to a large number of suppliers who will then have to compete on price & terms to win each contract.

To discuss employee performance; To identify an employee's development needs.

Rationale: There are drawbacks to linking appraisal to salary review, not least that there may not be enough money to reward the employee for their performance.

31 The correct answer is: Statement 1 only.

Note that formal and informal organisations are NOT mutually exclusive. The informal organisation is the network of informal inter-personal and inter-group relationships that exists within every organisation.

This is likely to have its own priorities and even objectives, though they may not be easily apparent or consistent over time and across the breadth of the informal organisation.

These objectives and priorities may or may not be the same as those of the formal organisation.

Statement 3 requires some thought: a strong, close-knit informal organisation can improve morale and communication within the formal organisation, but can also divert energy and loyalty from it. Also, if the objectives of the informal organisation are not aligned with those of the formal, there is danger of serious conflict. **Stimulate, Raise**

32 The correct answer is: Operational managers.

Operational managers should be alert for signs of petty fraud, as well as checking the work staff have done and also being aware of what staff are doing.

33 The correct answer is: Power

Rationale: The power culture is based around personalities, flexibility and informality; this is most appropriate to simple organisations.

34

True	False
------	-------

Drucker argued that developing people is a management function. ✓

Drucker argued that the manager of a business has one basic function - economic performance ✓

Drucker emphasised the economic objectives of managers in business but he also grouped the work of managers into five categories including:

- Setting objectives
- Organising the work
- Motivating employees
- Measurement
- Developing people

35 The correct answer is: Layering.

Max's firm has been involved in the transfer of monies from business to business to conceal the original source.

- 36 The correct answer is: Innovation and adaptability.
- The great advantage of external recruitment is in bringing 'new blood' and a fresh viewpoint to potentially 'stale' situations : therefore innovation and adaptability is the correct answer.
- Straightforward enough, once you've worked out the relevance and implications of the four options. There are pressures to promote from within, from the familiarity of the promotee: reduction of risk - he is a 'known quantity' to the organisation, unlike the external recruit, with whom it will be risking possible disappointment or incompatibility. Promotion of insiders is also visible proof of the organisation's willingness to develop its employees' careers, which can enhance motivation and avoid some resentments. Promotees will not have to be instructed, coached, 'broken-in' and otherwise 'socialised' into the methods, norms, politics, culture and personal relationships of the organisation to the extent that an outsider will.
- 37
- | | True | False |
|--|-------------------------------------|-------------------------------------|
| Wrongful dismissal relates to the method of dismissal | <input checked="" type="checkbox"/> | |
| Unfair dismissal is dismissal that has breached the contract of employment | | <input checked="" type="checkbox"/> |
| Dismissal that has breached the contract of employment is wrongful dismissal not unfair dismissal. | | |
- 38 The correct answer is: Position power.
- The only valuable definitions of leadership, as distinguished from management, stress its capacity to secure from others more than mere compliance with the requirements imposed by organisational authority. A leader is therefore someone who does not have to depend on position power alone.
- 39 The correct answer is: Providing justification for a promotion.
- Personal development implies a wide range of activities. A personal development plan is a clear developmental action plan for an individual which incorporates a wide set of developmental opportunities, including formal training.
- 40 The correct answer is: Goals that may not be achievable.
- Goals that present a huge challenge will not achieve the manager's wish to keep Dan motivated: they are more likely to oppress and worry him. Dan's manager should give him moderately difficult tasks and goals that present a challenge and an opportunity to display ability.
- 41 The correct answer is: Cyclical.
- This is cyclical unemployment. During decline and recession years, the demand for output and jobs falls, and unemployment rises to a high level.
- When the economy picks up again, demand for jobs picks up again as well. This is why it is cyclical unemployment..
- 42 The correct answer is: Passive acceptance of work decisions.
- Members of an effectively functioning group will take an active interest in decisions affecting their work, rather than passively accepting them.
- Internal disagreement and criticism can constitute healthy communication within the group in that they will encourage compromise and agreement, rather than having decisions and opinions forced upon the group members
- Competition with other groups brings the group closer together as the members work towards a common goal in competing with other groups perceived as a threat or an enemy.

- 43 The correct answer is The composition of the workforce reflects the population as a whole.
A business invests in many different activities in order to reduce risks is an example of diversification.
Non discrimination is likely to be part of diversity, but diversity goes further than non-discrimination.
A policy of fast tracking individuals from minority backgrounds may help to achieve a more diverse mix on employees - however, the organisation could be accused of "positive discrimination".
- 44 It is not true that companies can never depart from a standard. In rare cases, it may be necessary to depart from a standard in order to show a true and fair view.
- 45 The correct answer is: 'tell and listen' method
Three types of approach to appraisal interviews are identified by Maier. Michael's approach is 'tell and listen' method. It's a fairly participative approach, with the assessor taking on the dual role of critic and counsellor, and does not assume that the sole key to performance improvement is in the employee himself:
'Problem-solving' approach is a step further in this direction, where the assessor abandons the role of critic altogether. Discussion is centred not on the assessment but on the employee's work problems, which are worked through together with the assessor/counsellor.
'Tell and sell' method is the more one-sided approach. The manager tells the subordinate how he's been assessed, and then tries to 'sell' (gain acceptance of) the evaluation and the improvement plan.
Peer rating is where an individual is assessed and counselled by colleagues of the same level in the organisation hierarchy, rather than by his superiors, not the case here.
- 46 The correct answer is firewall. This is a system that monitors incoming and outgoing network traffic. a network.

SECTION B

- 1 (a)
- | | |
|-----------|----------------|
| Company W | Task culture |
| Company X | Role culture |
| Company Y | Person culture |
| Company Z | Power culture |
- (b)
- | | Chair | Secretary |
|--|-------|-----------|
| Give ruling on disputed points | ✓ | |
| Taking notes during a meeting | | ✓ |
| Communicating decisions taken in a meeting | | ✓ |
| Fixing the date of a meeting | | ✓ |
- 2 (a)
- | | Ethical | Unethical |
|---------|---------|-----------|
| Julie | ✓ | |
| Ken | | ✓ |
| Nadia | | ✓ |
| Michael | ✓ | |
- (b) The correct answer is consensus theory.
With the stakeholder view, management does select or control all the objectives
- 3 (a)
- | | True | False |
|--|------|-------|
| All organisations need to have an internal audit department. | | ✓ |
| The internal auditor should be independent | ✓ | |
| The internal auditor should report to the Finance Director. | | ✓ |
| The internal auditor may perform a social audit. | ✓ | |
| The internal auditor may review compliance with laws and regulations | ✓ | |
| Internal audit will assess the risk management and control culture of an organisation. | | ✓ |
- (b)
- | | |
|--|----------------|
| Work relates to the operations of the organisation | Internal audit |
| Objective of work is to express an opinion on the financial statements | External audit |

4	(a)	Luis has just completed his first three-month period with QWE Co and is keen to get feedback on his performance level and areas for development.	Appraisal
		Charlotte is new to her department and needs an experienced employee to show her how to perform the tasks that she will be expected to do.	Coaching
		Roy has just joined the company, but has ambitions to become a manager at QWE Co and wants to know how he can reach this goal in the long run.	Mentoring
		Jessica has just been told she will need to relocate in order to continue working in the marketing department of QWE. She is concerned about several issues arising from this relocation and wants to work through these issues.	Counselling
Justification:			
		<ul style="list-style-type: none"> • Luis wants feedback and development points, which are part of an appraisal process. • Charlotte will benefit from coaching where an experienced employee will guide her through the tasks. • Roy is looking for a long-term mentoring programme. • The aim of counselling is to help a person work through a problem. 	
(b)		The correct answers are:	
		<ul style="list-style-type: none"> • Demonstrates commitment to employees. • Reduces labour turnover and absenteeism. 	
		Counselling mostly shows care for employees, which can reduce labour turnover and absenteeism.	
5	(a)	Team W has been performing well for some time. It is now concentrating on self-maintenance and the initial task that the team was formed for is beginning to get overlooked.	Dorming
		Team X is fulfilling its objectives, unhindered by difficulties of growth and development.	Performing
		Team Y consists of members trying to impress their own personality. There is wariness from each team member about introducing new ideas and the objectives of the team are currently unclear.	Forming
		Team Z is beginning to see agreements about individual requirements and expectations. Procedures are evolving which should bring in methodical working for the team.	Norming
(b)		The correct answers are:	
		<ul style="list-style-type: none"> • Creating a separate space, either physical or virtual, for the team • Creating a team uniform 	
		The other options would all help to create team solidarity.

How have you used this Practice & Revision Kit?

(Tick one box only)

- On its own (book only)
- On a BPP in-centre course _____
- On a BPP online course
- On a course with another college
- Other _____

Why did you decide to purchase this Practice & Revision Kit? (Tick one box only)

- Have used complementary Interactive Text
- Have used BPP Texts in the past
- Recommendation by friend/colleague
- Recommendation by a lecturer at college
- Saw advertising
- Other _____

During the past six months do you recall seeing/receiving any of the following?

(Tick as many boxes as are relevant)

- Our advertisement in ACCA Student Accountant
- Our advertisement in Teach Accounting
- Other advertisement _____
- Our brochure with a letter through the post
- ACCA E-Gain email
- BPP email
- Our website www bpp com

Which (if any) aspects of our advertising do you find useful?

(Tick as many boxes as are relevant)

- Prices and publication dates of new editions
- Information on Practice & Revision Kit content
- Facility to order books
- None of the above

Have you used the companion Interactive Text for this subject? Yes No

Your ratings, comments and suggestions would be appreciated on the following areas
